BRADFORD ABBEY

Routledge Handbook on the Global History of Nursing NIP Peter Lang
In the years since the end of apartheid, South Africans have enjoyed a progressive constitution, considerable access to social services for the poor and sick, and a booming economy that has made their nation into one of the wealthiest on the continent. At the same time, South Africa experiences extremely unequal income distribution, and its citizens suffer the highest prevalence of HIV in the world. As Archbishop Desmond Tutu has noted, "AIDS is South Africa's new apartheid." In *Ancestors and Antiretrovirals*, Claire

Laurier Decoteau backs up Tutu's assertion with powerful arguments about how this came to pass. Decoteau traces the historical shifts in health policy after apartheid and describes their effects, detailing, in particular, the changing relationship between biomedical and indigenous health care, both at the national and the local level. Decoteau tells this story from the perspective of those living with and dying from AIDS in Johannesburg's squatter camps. At the same time, she exposes the complex and often contradictory ways that the South African government has failed to balance the demands of neoliberal capital with the considerable health needs of its population. *The Human Cost of African Migrations* Routledge

The modern reputation of Friends in the United States and Europe is grounded in the relief work they have conducted in the presence and aftermath of war. Friends (also known as Quakers) have coordinated the feeding and evacuation of children from war zones around the world. They have helped displaced persons without regard to politics. They have engaged in the relief of suffering in places as far-flung as Ireland, France, Germany, Ethiopia, Egypt, China, and India. Their work was acknowledged with the award of the Nobel Peace Prize in 1947 to the American Friends Service Committee (AFSC) and the Friends Service Council of Great Britain. More often, however, Quakers live, worship, and work quietly, without seeking public attention

for themselves. Now, the Friends are a truly worldwide body and are recognized by their Christ-centered message of integrity and simplicity, as well as their nonviolent stance and affirmation of the belief that all people--women as well as men--may be called to the ministry. The expanded second edition of the *Historical Dictionary of the Friends (Quakers)* relates the history of the Friends through a chronology, an introductory essay, an extensive bibliography, and over 700 cross-referenced dictionary entries on concepts, significant figures, places, activities, and periods. This book is an excellent access point for scholars and students, who will find the overviews and sources for further research provided by this book to be enormously helpful.

SAMT NYU Press

News footage of disease in Africa is a familiar sight. Yet these outbreaks are often presented out of context, with no reference to the conditions that have triggered them.

MISTRA's new book, *Epidemics and the Health of African Nations*, aims to redress that. Researchers and practitioners from

within the continent explore why Africa is so vulnerable to disease, and show how this vulnerability is closely linked to political and economic factors. They demonstrate how these same factors determine the way epidemics are treated. Authors extract lessons from case studies in different parts of Africa; challenge conventional frameworks about disease to argue for a 'syndemics' approach that takes into account the interrelationship between disease and political and socio-economic contexts; explore challenges of Africa's future. They argue that a well-functioning health system is at the core of a country's capacity to counter an epidemic. This volume brings African experts together to probe possible solutions to the continent's heavy burden of disease. The insights offered will be helpful in devising policy for the control of disease and the combatting of epidemics in Africa.

Africa Digest Routledge
A quiet revolution has been sweeping through the writing of nursing history over the last decade, transforming it into a robust and reflective area of

scholarship. *Nursing History and the Politics of Welfare* highlights the significant contribution that researching nursing history has to make in settling a new intellectual and political agenda for nurses. The seventeen international contributors to this book look at nursing from different perspectives, as it has developed under different regimes and ideologies and at different times, in America, Australia, Britain, Germany, India, The Phillipines and South Africa. They highlight the role of politics and gender in understanding nursing history and propose strategies for achieving greater recognition for nursing, and bringing it into line with other related health care professions.

Fragmented Families, Poverty, and Women's Reproductive

Narratives in South

Africa Scarecrow Press

During the Second World War, more than 4,000 civilian nurses enlisted as Nursing Sisters, a specially created all-female officers' rank of the Canadian Armed Forces. They served in all three armed force branches and all the major theatres of war, yet nursing as a form of war work has long been

under-explored. An Officer and a Lady fills that gap. Cynthia Toman analyzes how gender, war, and medical technology intersected to create a legitimate role for women in the masculine environment of the military and explores the incongruous expectations placed on military nurses as "officers and ladies."

The Photochemistry of Carotenoids UBC Press

This text represents the work of a partnership between South African teachers, students and practitioners who currently serve as advocates of the Public and Development Management discipline. It features a selection of cases which reflect the variety of South African experiences.

Juta's Manual of Nursing

Juta and Company Ltd
In an era of globalization, population growth, and displacements, migration is now a fact of life in a constantly shifting economic and political world order. This book contributes to the discourse on the beneficiaries, benefactors, and the casualties of African displacement. While the few existing studies have emphasized economic motivation as the primary factor

triggering African migration, this volume treats a range of issues: economic, socio-political, pedagogical, developmental, and cultural. Organized with a multidisciplinary thrust in mind, this book argues that any discussion of African migration, whether internal or external, must be conceived as only one aspect of a more complex, organic, and global patterning of "flux and reflux" necessitated by constantly shifting dynamics of world socio-economic, cultural, and political order.

The Impact of AIDS: Psychological and Social Aspects of HIV Infection, 3rd Edition University of Wisconsin Pres

A focus on the legal aspects of medicine, ethical issues, and community-based work distinguishes this education manual for nurses from previous volumes in the series. Discussion questions and self-assessments are included in each chapter whose subjects include care for women with special needs, disabled clients, the elderly, and patients with HIV/AIDS or a malignant disease.

Hospital and Nursing Year Book of Southern Africa

Juta and Company Ltd
This text gives an account of the course charted by black nurses in South Africa as they rose to the challenge of a foreign, Western system of nurse education and training. It records the professional and academic advances made by an indigenous people in this field within a relatively short time.

Medical Proceedings

Adonis & Abbey Publishers Ltd

An examination of post-apartheid politics This volume explores some of the key features of popular politics and resistance before and after 1994. It looks at continuities and changes in the forms of struggle and ideologies involved, as well as the significance of post-apartheid grassroots politics. Is this a new form of politics or does it stand as a direct descendent of the insurrectionary impulses of the late apartheid era? Posing questions about continuity and change before and after 1994 raises key issues concerning the nature of power and poverty in the country. Contributors suggest that expressions of popular politics are deeply set within South African political culture and still have the capacity

to influence political outcomes. The introduction by William Beinart links the papers together, places them in context of recent literature on popular politics and 'history from below' and summarises their main findings, supporting the argument that popular politics outside of the party system remain significant in South Africa and help influence national politics. The roots of this collection lie in post-graduate student research conducted at the University of Oxford in the early twenty-first century. *A Bold Profession* CRC Press

This is an innovative investigation of pluralism in health care. Using both extensive archival material and oral histories it examines relationships between indigenous healing, missionary medicine, and 'western' biomedicine. The book includes the different regions within South Africa although focusing in most detail on the Cape, the earliest area of white settlement. In a wide-ranging survey the division in medicine between 'western' and indigenous medicine is analysed through an exploration of the

evolving practices of healers, missionaries, doctors and nurses. The book considers the extent to which there was a strategic crossing of boundaries in the construction of hybrid practices by these practitioners, and the extent to which patients pursued health by sampling diverse care options. Starting with missionary penetration during the early nineteenth century, the volume outlines interventions by the colonial state in medicine and public health, and the continued resilience of indigenous healing in the face of this. The book ends by relating past to present in scrutinising the legacy of historical structures - including those of the apartheid state - for current health care, and in briefly discussing the huge challenges that the HIV/Aids pandemic poses in impacting on them. The book thus provides an inclusive history of medicine for the 'New' South Africa.

Race Relations Jonathan Ball Publishers

Written by leading experts in the area of carotenoid research, this book gives a comprehensive overview of a various

topics in the field. The contributions review the basic hypotheses about how carotenoids function and give details regarding testing different molecular models using state-of-the-art experimental methodologies.

South African Medical Journal Springer

A CHOICE Outstanding Academic Title 2014! 2014 winner of the American Association for the History of Nursing's Mary M. Roberts Award for Exemplary Historical Research and Writing! The Routledge Handbook on the Global History of Nursing brings together leading scholars and scholarship to capture the state of the art and science of nursing history, as a generation of researchers turn to the history of nursing with new paradigms and methodological tools. Inviting readers to consider new understandings of the historical work and worth of nursing in a larger global context, this ground-breaking volume illuminates how research into the history of nursing moves us away from a reductionist focus on diseases and treatments and towards more inclusive ideas about the experiences of illnesses

on individuals, families, communities, voluntary organizations, and states at the bedside and across the globe. An extended introduction by the editors provides an overview and analyzes the key themes involved in the transmission of ideas about the care of the sick. Organized into four parts, and addressing nursing around the globe, it covers: New directions in the history of nursing; New methodological approaches; The politics of nursing knowledge; Nursing and its relationship to social practice. Exploring themes of people, practice, politics and places, this cutting edge volume brings together the best of nursing history scholarship, and is a vital reference for all researchers in the field, and is also relevant to those studying on nursing history and health policy courses.

Bantoe African Books Collective

Feeling lost or overwhelmed? Is your life in need of the healing power of the Lord? Soothe your soul with these amazing and encouraging sermons from one of God's devoted followers, Rev. Dr. Mankekolo Mahlangu-Ngcobo.

Containing forty inspiring sermons, *Restore Me* delivers a message of hope, love, and faith. From her humble beginnings in South Africa to her flight to America and a new, frightening life, Mahlangu-Ngcobo draws upon her own struggles as well as current events to bring insight and wisdom to her writings. Covering all areas of our spiritual, emotional, social, economic, and political lives, her sermons will bring restoration to your spirit. In clear, concise language, Mahlangu-Ngcobo offers wisdom and insight to help you navigate your daily journey. She explores the doubts, fears, and perplexities we all experience and shows you how to find new understanding and guidance. Each sermon contains the scriptures pertinent to the discussion, allowing you to absorb the Word of the Lord and use it each and every day. Short enough to be read on your lunch hour or coffee break, these sermons are, as one reader called it, "vitamin for the soul." Get your daily dose of grace and love with *Restore Me* today!

Baragwanath Hospital,

Soweto NYU Press
Thuli Madonsela achieved in seven years as Public Protector what few accomplish in a lifetime; her legacy and contribution cannot be overstated. In her final days in office she compiled the explosive State of Capture report and, two years before that, *Secure in Comfort*, the report on President Jacob Zuma's Nkandla residence. Praised and vilified in equal measure, Madonsela frequently found herself on centre stage in the increasingly fractious South African political scene. Yet, despite the intense media scrutiny, Madonsela remains something of an enigma. Who is this soft-spoken woman who stood up to state corruption? Where did she develop her views and resolve? In *No Longer Whispering to Power* Thandeka Gqubule, journalist and one of the 'SABC 8' fired and rehired by the broadcaster, attempts to answer these questions, and others, by exploring aspects of Madonsela's life: her childhood years and family, her involvement in student politics, her time in prison, her contribution to the Constitution, and her life in law.

Yesterdays, the Story of

Richmond Juta
2 Books & CD-ROM.
Written specifically for southern African nursing students by southern African nursing professionals, this 2-part volume provides the learner with comprehensive information on all the systems contained in the human body. The content has been carefully selected to build on existing knowledge, and adopts a scientific approach that integrates nursing processes throughout the chapters. Topics include the nurse's role in the management of patients/clients with medical and surgical problems; the role of the nurse as a primary caregiver, educator, advisor and advocate of patient's rights; and suggestions to enhance the patient/nurse relationship. The book is organised into two parts: Part I - Cross-Systems and Part II - The Systems.

No Longer Whispering to Power University of Chicago Press

This collection of essays reflects the current interdisciplinary and international nature of the history of nursing scholarship. Covering a range from the eighteenth to the twentieth century,

this book draws on research from eleven different countries to address: the issues of professionalism within nursing the social and ethical issues which are woven into the relationship between the nurse/midwife and her patient/client the trans-cultural dimensions nurses create when they move from one culture to another and the recent developments in historiography.

Cumulated Index Medicus iUniverse

This volume contains a selection of key contributions to the discussion on the psychological and social implications on HIV infection. It contains up-to-date and authoritative papers by senior practitioners and researchers in the field of the psychological and social aspects of HIV infection. The book will appeal to those involved in providing care for people with HIV infections, be they physicians and nurses or psychologists, social workers and psychiatrists, as well as those involved in preventing the spread of the HIV infection. From the start of the HIV epidemic, the psychological and social

aspects of the AIDS infection have been recognized. What could have been regarded simply as an infectious disease was soon acknowledged as a global problem that raised important issues about its transmission and prevention; economic, ethical and legal questions regarding the mental health consequences and the need for access to medical and social care.

An Officer and a Lady Routledge

In rural South African clinics, Black nurses were charged with administering life-saving health care measures despite a lack of equipment and personnel, often while navigating the intersections of traditional African healing practices and changing gender relations. A Bold Profession is an homage to their dedication to the well-being of their communities.

Pace Routledge

Fragmented Families addresses a central question in the demographic debates on poverty and fertility transition in southern Africa: In what ways do women's recurrent encounters with poverty serve to shape their

sexual unions, social relationships and reproductive practices? The book focuses on the lives of a group of mothers and daughters from fifteen families in a demarcated part of the Winterveld area in South Africa, and draws attention to historical, socio-cultural, political and economic concerns in order to place in context or make sense of reproductive dynamics and family life at the micro-level. Vignettes, drawn from fieldwork, highlight the particularities of the area: the persistence of historical tensions, diverse livelihoods and complex gender relationships. The intergenerational stories of the women suggest

that they live with immense and increasing adversity and that strategies to contend with them sometimes include attempts to assert control over sexual encounters and reproductive outcomes. The book contributes to a continuing debate on how changing socio-economic conditions could influence prospects for and the nature of fertility transition in African countries. The study concurs with alternative arguments that shifts toward lower levels of fertility might be due, in certain contexts, to experiences of severe hardship rather than favourable economic circumstances. Instead of seeking security and risk-

aversion through bearing many children the response of indigent women in this area has been largely to resist reproduction, at particular stages of their lives, whilst using sexual relationships and child-bearing as strategies to manipulate and secure resources. In reflecting on methodological approaches, the book draws attention to the limitations of survey research in efforts to elicit 'accurate' representations of reproductive behaviour and fertility preferences, and emphasises the usefulness of more engaged, qualitative and long-term fieldwork endeavours in building substantive insights on women's familial and reproductive lives.
