## WILEY BOYER

### Psychology of Aging Springer

Americans are living longer, and the elder population is growing larger. To meet the ongoing need for quality information on elder health, the Encyclopedia of Aging and Public Health combines multiple perspectives to offer readers a more accurate and complete picture of the aging process. The book takes a biopsychosocial approach to the complexities of its subject. In-depth introductory chapters include coverage on a historical and demographic overview of aging in America, a guide to biological changes accompanying aging, an analysis of the diversity of the U.S. elder population, legal issues commonly affecting older adults, and the ethics of using cognitively impaired elders in research. From there, over 425 entries cover the gamut of topics, trends, diseases, and phenomena: -Specific populations, including ethnic minorities, custodial grandparents, and centenarians -Core medical conditions associated with aging, from cardiac and pulmonary diseases to Parkinson's and Alzheimer's -Mental and emotional disorders -Drugs/vitamins/alternative medicine -Disorders of the eyes, feet, and skin -Insomnia and sleep disorders; malnutrition and eating disorders -Sexual and gender-related concerns -And a broad array of social and political issues, including access to care, abuse/neglect, veterans' affairs, and assisted suicide Entries on not-quite-elders' concerns (e.g., midlife crisis, menopause) are featured as well. And all chapters and entries include references and resource lists. The Encyclopedia has been developed for maximum utility to clinicians, social workers, researchers, and public health professionals working with older adults. Its multidisciplinary coverage and scope of topics make this volume an invaluable reference for academic and public libraries.

### Multidisciplinary Perspectives on Aging Springer

"The book goes well beyond the information in undergraduate texts and provides stimulating and useful coverage of key topics in biopsychosocial aging. Psychology is not prepared for the future growth of our older adult population, and I suggest Psychology of Aging: A Biopsychosocial Perspective as required reading for students" --William E. Haley, PhD; Professor; School of Aging Studies; College of Behavioral and Community Sciences, Tampa, FL "This book distinguishes itself from previous publications on the topic with a thorough review of the history profession of geropsychology and its timely inclusion of chapters on brain imaging techniques and the aging

brain, cultural differences in aging ethnic and sexual minorities, cognitive interventions, and more. This book is a must read for undergraduate and graduate students studying aging, and one I will definitely recommend to students new to the area." --Sherry A. Beaudreau, Ph.D., ABPP, VA Palo Alto Health Care System and Stanford University School of Medicine "Brian Yochim and Erin Woodhead have created an invaluable tool for learning about and teaching geropsychology...This book will serve as a seminal text in training psychologists, social workers, and many other disciplines in the psychology of aging." --Erin E. Emery-Tiburcio, Ph.D., ABPP, Rush University, Chicago, IL The only graduate text to encompass the full range of issues regarding the psychology of aging This is the first graduate-level text that offers a comprehensive, in-depth chronicle of issues surrounding the psychology of aging emphasizing psychology, with a foundation in the biology, and an expansion into the sociological aspects of aging. The text is divided into three sections: biological underpinnings of aging, psychological components of aging, and social aspects of aging. Among the multitude of topics addressed are biological theories of aging, neuroimaging methods in aging research, neuroplasticity, cognitive reserve and cognitive interventions, a detailed overview of neurocognitive disorders in aging such as Alzheimer's disease and Lewy body disease, relationships in aging, work vs. retirement, cultural issues in aging, and aging and the legal system, to name just a few critical topics. With an emphasis on promoting critical thinking, the text is enriched with discussion questions in each chapter along with suggestions for more in-depth readings. In addition it includes chapter PowerPoints and an Instructor's Manual with sample syllabi for a 10-week course and a 15-week course. Written for graduate students in multiple gerontology-related disciplines, the text is also of value to individuals studying nursing, medicine, social work, biology, and occupational, physical, and speech therapies. Key Features: Addresses the biological underpinnings of aging, psychological components, and social aspects Written by a variety of experts on each area Emphasizes critical thinking throughout the text Presents discussion questions in each chapter Includes PowerPoints and an Instructor's Manual with sample syllabi Tailored to graduate students from multiple disciplines embarking on clinical or research careers involving older adults.

### **Primary Care Revisited SAGE**

The power of the gerontological imagination -- Causality -- Life course analysis -- Multifaceted change -- Heterogeneity -- Accumulation process -- Ageism -- The gerontological imagination at work in scientific communities

### Gerontology Springer Nature

This book presents a kaleidoscopic view of the positive layers of ageing as well as key interventions

that can help generate and maintain positivity and well-being among the elderly. It explores the connections of ageing with spirituality, nature and existentialism, and leisure to encourage creativity, individuation, happiness and emotional detachment. It further examines various interventions such as end-of-life care, mindfulness and yoga, retrospection and life-review, etc. which may improve the overall quality of life by promoting the health of the elderly. The book focuses on authentic ageing, transpersonal gerontology, the concept of elder child, geriatric interventions, and caregiving, and suggests practical improvements in health and facilities for the elderly. It also covers aspects of the inner life of the prolonged ailing or dying person from a mental health perspective and emphasizes on the value of positive ageing. A guide to applied geriatrics and geriatric psychology, with its simple style and clear methods in end-to-end praxis, the book shows how mental well-being can be fostered in the elderly to help them find meaning and purpose in old age. This book will interest students, teachers and researchers of psychology, positive psychology, geropsychology and gerontological studies, sociology and social work, public health, medical education and geriatric nursing. It will also be useful to practitioners including psychologists, counsellors, gerontologists, mental health professionals and NGOs working with the elderly, and the interested reader.

Aging, Society, and the Life Course, Fourth Edition Springer Publishing Company

Print+CourseSmart

Adult Cognition Presses Université Laval

Praise for the first edition: "This book is exemplary in amassing demographic, policy, and sociopsychological data from around the world... The content of the book is rich with current information seldom accumulated into one source. I recommend this volume to gerontologists, aging studies undergraduate and graduate students... demographers, and global studies scholars." Dr. Carol A. Gosselink, *PsycCritiques* Written by leading scholars, this esteemed text on global aging is distinguished by its unique perspective on universal similarities and sociocultural differences across nations. Fully revised, updated, and reorganized, the second edition presents comprehensive coverage of major topics in social gerontology and expands its treatment of health behavior, health care, families, caregiving, older workers, and retirement. It delivers new information on living environments, religious beliefs and practices; environmental threats; cross-cultural views of dementia; ageism in advertising; age-friendly communities; global immigration and cultural assimilation, and end-of-life caregiving. The second edition also offers additional case studies, first-person narratives and focused essays to enhance core material and a greater number of non-Western contributors. The topical essays reflect changing mores and current issues affecting societies and the aging experience. Discussion questions conclude each chapter, and an Instructor's Manual and PowerPoint slides are available to instructors. Print version of the book includes free, searchable, digital access to entire contents. New to the Second Edition: Expanded content on health beliefs and health behavior, religious belief and practice, environmental threats, housing and living environments, physical security, consumer control of health care, family life, and more. Additional topics on global immigration and cultural assimilation, age portrayals in advertising, voluntarism, and the use of social media in caregiving. Abundant new and expanded essays. New case studies and first-person narratives. Many more non-Western contributors. Key Features: Delivers

comprehensive coverage of major topics in gerontology. Uses a unique comparative, cross-national perspective. Authored by world-renowned aging scholars. Includes case studies/essays/personal narratives to enliven core information. Provides the most comprehensive demographic data on aging around the world.

Health and Wellbeing in Late Life Springer Publishing Company

This book looks at the relationships between the physical-social environment and the elderly in Europe and Latin America, from the Environmental Gerontology perspective and through geographical and psychosocial approaches. It addresses the main environmental issues of population ageing, based on an understanding of the complex relationships, adjustments and adaptations between different environments (home, residence, public spaces, landscapes, neighbourhoods, urban and rural environment) and the quality of life of the ageing population, associated with residential strategies and other aspects related to health and dependency. The different levels of socio-spatial analysis are also explored: macro (urban and rural environments, regions and landscapes), meso (neighbourhood, public space) and micro (personal, home and institution). New theoretical and methodological approaches are proposed to analyse the attributes and functions of the physical-social environment of the elderly, as well as new ways of living the ageing process. All will have to respond to the challenges of urbanisation, globalisation and climate change in the 21st century. Also, the different experiences and challenges of public planning and management professionals involved with the growing ageing population are presented, and will require greater association and collaboration with the academic and scientific fields of Environmental Gerontology.

Mobile e-Health Springer Science & Business Media

Designated a Doody's Core Title! THE GROUNDBREAKING TEXT ON GERONTOLOGY, UPDATED TO ADDRESS THE INTERDISCIPLINARY NATURE OF THE STUDY OF AGING. What is Gerontology? How Does Aging Affect the Mind and the Body? How Does Social Context Influence Aging and Life Course Development? What are the Needs and Interests of an Older Population? These questions are sparking the most important research in gerontology, and this third edition of the perennial text brings the research and its resulting theories from across the various disciplines into one broad overview of gerontology. This interdisciplinary approach is key to developing a strong "gerontological imagination," a necessary base for the study of gerontology. Use this volume to discover the cellular realities of aging alongside the social forces that play a role in developing Alzheimer's. Study the effects of nutrition and exercise in older lives and learn how the demographics of aging affect them. By combining knowledge from different disciplines, Wilmoth and Ferraro have created a comprehensive picture of gerontology today that will enhance any course instruction and provide a new window into the future of the discipline. Springer Publishing--Serving the Healthcare and Helping Professions for More Than 55 Years

Aging, Society, and the Life Course, Fifth Edition Springer

An introduction to theoretical and empirical research, with chapters written by experts from many disciplines. Annotation copyrighted by Book News, Inc., Portland, OR

Positive Ageing Springer Publishing Company

This open access book addresses the current debate on extended working life policy by considering

the influence of gender and health on the experiences of older workers. Bringing together an international team of scholars, it tackles issues as gender, health status and job/ occupational characteristics that structure the capacity and outcomes associated with working longer. The volume starts with an overview of the empirical and policy literature; continues with a discussion of the relevant theoretical perspectives; includes a section on available data and indicators; followed by 25 very concise and unique country reports that highlight the main extended working life (EWL) research findings and policy trajectories at the national level. It identifies future directions for research and addresses issues associated with effective policy-making. This volume fills an important gap in the knowledge of the consequences of EWL and it will be an invaluable source for both researchers and policy makers.

***Social Policy for an Aging Society*** Springer Science & Business Media

Drawing on interdisciplinary, cross-national perspectives, this open access book contributes to the development of a coherent scientific discourse on social exclusion of older people. The book considers five domains of exclusion (services; economic; social relations; civic and socio-cultural; and community and spatial domains), with three chapters dedicated to analysing different dimensions of each exclusion domain. The book also examines the interrelationships between different forms of exclusion, and how outcomes and processes of different kinds of exclusion can be related to one another. In doing so, major cross-cutting themes, such as rights and identity, inclusive service infrastructures, and displacement of marginalised older adult groups, are considered. Finally, in a series of chapters written by international policy stakeholders and policy researchers, the book analyses key policies relevant to social exclusion and older people, including debates linked to sustainable development, EU policy and social rights, welfare and pensions systems, and planning and development. The book's approach helps to illuminate the comprehensive multidimensionality of social exclusion, and provides insight into the relative nature of disadvantage in later life. With 77 contributors working across 28 nations, the book presents a forward-looking research agenda for social exclusion amongst older people, and will be an important resource for students, researchers and policy stakeholders working on ageing.

***Extended Working Life Policies*** Springer

This important book brings together some of the best known international scholars working within a critical gerontology perspective. Together, they review and update our understanding of how the field has developed over the last twenty-five years and, through the lens of 'passionate scholarship', provide a challenging assessment of the complex practical and ethical issues facing older people, and those who conduct research on ageing, in the 21st century. The contributions extend the critical gerontological approach conceptually, methodologically and practically. They offer close and scholarly analysis of policies affecting the lives of older people and provide insights into why research is done in particular ways. Special attention is paid to feminist contributions and new approaches to working in partnership with older people; age discrimination and ageism; the impact of neo-liberal policies and the passage of various human rights instruments; the re-medicalisation of later life; the participation of older people in research; and justice between generations. The editors and contributors offer suggestions for promoting change, and an exciting set of visions and perspectives for the renewal and development of critical gerontology in the years ahead. Critical

Perspectives on Ageing Societies will be a valuable resource for all students, academics and practitioners interested in ageing and the life course.

***Sexuality and Aging*** Springer Science & Business Media

For some time now, the study of cognitive development has been far and away the most active discipline within developmental psychology. Although there would be much disagreement as to the exact proportion of papers published in developmental journals that could be considered cognitive, 50% seems like a conservative estimate. Hence, a series of scholarly books to be devoted to work in cognitive development is especially appropriate at this time. The Springer Series in Cognitive Development contains two basic types of books, namely, edited collections of original chapters by several authors, and original volumes written by one author or a small group of authors. The flagship for the Springer Series is a serial publication of the "advances" type, carrying the subtitle Progress in Cognitive Development Research. Volumes in the Progress sequence are strongly thematic, in that each is limited to some well-defined domain of cognitive-developmental research (e. g. , logical and mathematical development, semantic development). All Progress volumes are edited collections. Editors of such books, upon consultation with the Series Editor, may elect to have their works published either as contributions to the Progress sequence or as separate volumes. All books written by one author or a small group of authors will be published as separate volumes within the series. A fairly broad definition of cognitive development is being used in the selection of books for this series.

***Gerontology*** Springer Publishing Company

This book addresses current issues in the neuroscience and ethics of dementia care, including philosophical as well as ethical legal, and social issues (ELSI), issues in clinical, institutional, and private care-giving, and international perspectives on dementia and care innovations. As such, it is a must-read for anyone interested in a well-researched, thought-provoking overview of current issues in dementia diagnosis, care, and social and legal policy. All contributions reflect the latest neuroscientific research on dementia, either broadly construed or in terms of the etiologies and symptoms of particular forms of dementia. Given its interdisciplinary and international scope, its depth of research, and its qualitative emphasis, the book represents a valuable addition to the available literature on neuroethics, gerontology, and neuroscientific memory research.

***Ageing, Society, and the Life Course, Fourth Edition*** Springer Nature

This handbook presents an overview of studies on the relationship of active ageing and quality of life. It addresses the new challenges of ageing from the paradigm of positive ageing (active, healthy and successful) for a better quality of life. It provides theoretical perspectives and empirical studies, including scientific knowledge as well as practical experiences about the good ageing and the quality of later life around the world, in order to respond to the challenges of an aged population. The handbook is structured in 4 sections covering theoretical and conceptual perspectives, social policy issues and research agenda, methods, measurement instrument-scales and evaluations, and lastly application studies including domains and geographical contexts. Chapter 5 is available open access under a Creative Commons Attribution 4.0 International License via [link.springer.com/div](http://link.springer.com/div)

***The Gerontological Imagination*** Springer Publishing Company

This newest edition of a core graduate level textbook has added six new chapters to further enrich the gerontological imagination, and encourage an interdisciplinary approach to the study of aging.

Academically rigorous yet clear and accessible, the text provides the most current findings from leading gerontological researchers and practitioners. New and updated chapters examine biology, exercise science/nutrition, communication science, geriatric medicine and nursing, demography, anthropology, economics, human development, psychology, political science, sociology, social work, and law, to provide broadly drawn perspectives on the study of aging. Special emphasis is placed on current challenges regarding policy and service delivery in the face of fiscal uncertainty. Additionally, this new edition covers international outlooks on aging given the increasing influence of globalization on individual lives. By interweaving knowledge from a broad range of disciplines, Wilmoth and Ferraro have created a comprehensive picture of gerontology today that will enhance course instruction and provide a new window into the future of the discipline. New chapters address: Geriatric medicine and nursing Communication disorders and aging International and cross-cultural perspectives on aging Public policy and the needs of diverse aging populations Geriatric social work Legal perspectives on aging Key Features: Interweaves current gerontological research and ideas from multiple disciplines Addresses biology, psychology, human development, sociology, and economics as they relate to gerontology Presents additional disciplinary perspectives including exercise science/nutrition, communication science, geriatric medicine and nursing, demography, anthropology, political science, social work, and law. Includes Ferraro's classic chapter on "The Gerontological Imagination"

*Aging, Society, and the Life Course, Sixth Edition* Springer Nature

This volume intends to re-establish social gerontology as a discipline that has pragmatic links to policy and practice. Collectively, the chapters enrich public debates about the moral, cultural and economic questions surrounding aging, thereby ameliorating the "problems" associated with aging societies. This volume is uniquely cross-cultural, theory-driven and cross-disciplinary. It fills a gap in the gerontological scholarship of the global south that is predominantly descriptive and empirical. Based on original research, this volume examines in particular the sociological question of inequality and its intersection with age, gender, health, family and social relations. In the process, the studies herein highlight the unique historical, institutional and social systems that govern the subjective experience of aging in diverse contexts globally. Specifically, societies in transition including India, Lebanon, Nigeria, Japan, China, Israel and in Europe are studied while connecting the micro-social experience of aging (loneliness, wellbeing, discrimination, relationships and resilience) with larger temporal and political contexts. This exercise generates intellectual capital that reformulates links between aging research and policy in innovative ways. Overall, the volume echoes the global scientific commitment to understand the socio-cultural process of aging in transitional societies and utilizes rich opportunities for cross-fertilization of ideas, disciplines and methods to advance the gerontological promise of critical inquiry, training and practice.

*Handbook of the Life Course* Springer Nature

This open access book takes a multidisciplinary approach to provide a holistic understanding of late old age, and situates the aged person within the context of family, caregivers, clinical and other institutions. All through the book, the author discusses preparedness for an aging individual as well as the society in the Indian context. The book highlights inevitable but mostly neglected health issues like depression, dementia, fall, and frailty and provides detailed analyses of solutions that are

practicable in low resource settings. It also brings up intergenerational differences and harmony in the context of holistic care of older Indians. Alongside clinical perspectives, the book uses narratives of elderly patients to dwell on the myriad of problems and issues that constitute old age healthcare. Demonstrating cases that range from the most influential to the most underprivileged elderly in India, the book enlightens multiple caregivers—doctors, nurses, and professional caregivers as well as family members—about the dynamic approach required in dealing with complex issues related to late old age. The narratives make the book relatable and interesting to non-academic readers, with important lessons for gerontological and geriatric caregiving. It is also of use to older adults in preparing for active aging.

**Annual Review of Gerontology and Geriatrics, Volume 38, 2018** Springer Publishing Company

As people age, they are at increased risk of having their basic human rights threatened or violated. When age is perceived as incompetence, it can easily lead to discrimination that impacts human rights. Based on the premise that social policy must reflect human rights principles, this graduate-level textbook views the challenges associated with aging as opportunities for policy development that stresses the rights of older adults rather than needs. The text distinguishes between "needs" and "rights" and describes those policies and services that best ensure that the rights of older adults are actually met—particularly programs that enable people to remain in their own communities so they can benefit from continued integration and participation in society. Issues and challenges surrounding such efforts, and gaps in social policies faced by specific subsets of older people, are critically examined. The book first analyzes current aging policies and rights and considers the Older Americans Act as a basic policy framework. With an eye to promoting independence, the book discusses issues of income, housing, transportation, health, and home care and what constitutes a "livable community," along with policies that promote wellbeing and focus on preventing senior abuse and exploitation. Challenges faced by older workers are covered, as are issues particular to family caregivers, older women, and grandparents as caregivers. Gaps in social policies for LG BT seniors and older members of specific ethnic groups are discussed. Particular attention is given to global issues and aging policies in diverse countries and the ways in which they reflect human rights concerns. Each chapter concludes with probing discussion questions for classroom use. KEY FEATURES: Presents a human rights framework for aging policy Distinguishes between needs and rights of older persons Focuses on policies and programs that can help older people to remain in the community Explores the issues and challenges of specific older populations Discusses global responses and concerns with regard to older persons and human rights Carole B. Cox, MSW, PhD, is professor at the Graduate School of Social Service, Fordham University. She is a fellow of the Gerontological Society of America and a Fulbright scholar. She is the author of more than 50 journal articles and chapters dealing with various aspects of aging and caregiving, with extensive research on caregivers for persons with dementia, their needs, and their use of services. Her recent work includes a study of the impact of dementia on the workplace. Her caregiving research also includes that of grandparents raising grandchildren, leading to the development of a curriculum, *Empowering Grandparents Raising Grandchildren: A Training Manual for Group Leaders* (Springer Publishing Company, 2000). She is the editor of *To Grandmother's House We Go and Stay: Perspectives on Custodial Grandparents* (Springer Publishing Company, 2000). Her other books include *Home Care*

for the Elderly: An International Perspective, coauthored with Abraham Monk (1991); *The Frail Elderly: Problems, Needs, and Community Responses* (1993); *Ethnicity and Social Work Practice*, coauthored with Paul Ephross (1998); *Community Care for an Aging Society: Policies and Services* (Springer Publishing Company, 2005); and *Dementia and Social Work Practice* (Springer Publishing

Company, 2007).  
*Quality of Life in Old Age* Springer Nature
