This open access volume presents a comprehensive account of all aspects of biological invasions in South Africa, where research has been conducted over more than three decades, and where bold initiatives have been implemented in attempts to control invasions and to reduce their ecological, economic and social effects. It covers a broad range of themes, including history, policy development and implementation, the status of invasions of animals and plants in terrestrial, marine and freshwater environments, the development of a robust ecological theory around biological invasions, the effectiveness of management interventions, and scenarios for the future. The South African situation stands out because of the remarkable diversity of the country, and the wide range of problems encountered in its varied ecosystems, which has resulted in

a disproportionate investment into both research and management. The South African experience holds many lessons for other parts of the world, and this book should be of immense value to researchers, students, managers, and policy-makers who deal with biological invasions and ecosystem management and conservation in most other regions.

Do you know what the hardest thing for a Dutch learner is? Finding PROPER reading material that they can handle...which is precisely the reason we've written this book! Teachers love giving out tough, expert-level literature to their students. Books that present many new problems to the reader and force them to search for words in a dictionary every five minutes - it's not entertaining, useful or motivating for the student at all, and many soon give up on learning at all! In this book, we have compiled 20 easy-to-read, compelling and fun stories that will allow you to expand your vocabulary and give you the tools to improve your grasp of the beautiful Dutch tongue. How Dutch Short Stories for Beginners works: - Each story is exciting and entertaining with realistic dialogues and day-to-day situations. - The summaries follow a synopsis in Dutch and in English of what you just read, both to review the lesson and for you to see if you understood what the tale was about. - At the end of those summaries, you'll be provided with a list of the most relevant vocabulary involved in the lesson, as well as slang and sayings that you may not have understood at first glance! - Finally, you'll be provided with a set of tricky questions in Dutch, providing you with the chance to prove that you learned something in the story. Don't worry if you don't know the answer to any - we will provide them immediately after, but no cheating! We want you to feel comfortable while learning the tongue; after all, no language should be a barrier for you to travel around the world and expand your social circles! So look no further! Pick up your copy of Dutch Short Stories for Beginners and start learning Dutch right now!

Why do people buy health insurance? Conventional theory holds that people purchase insurance because they prefer the certainty of paying a small premium to the risk of getting sick and paying a large medical bill. This book presents a new theory of consumer demand for health insurance. It holds that people purchase insurance to obtain additional "income" when they become ill.

Het compactestadbeleid is in Nederland ongeveer een kwart eeuw oud. Het werd gedreven door de vier grote steden in de Randstad, die zich na de economische crises van de jaren zeventig en het gevoerde (gebundeld) deconcentratiebeleid geconfronteerd zagen met een enorm verlies aan midden- en hogere inkomensgroepen. Tegelijkertijd ontstonden nieuwe inzichten over het belang van krachtige steden in de opkomende mondiale netwerkeconomie. In combinatie daarmee kwamen ook duurzaamheid, mobiliteit en kwaliteit van het landelijk gebied in relatie tot die stedelijke opgave op de agenda. Vanuit die achtergrond werd het compactestadbeleid vanaf midden jaren tachtig op nationaal niveau geformaliseerd. De doorgezette mondialisering, informatisering, de veranderende economie en het toenemend belang van duurzame ruimtelijke ontwikkeling vragen om een hernieuwde invulling van compactestadbeleid. De actuele setting is wezenlijk anders dan die van zo'n kwart eeuw geleden.

The intent in this book is to tear away the veil of secrecy that surrounds incestuous abuse in white South Africa by presenting five in-depth personal accounts of this heinous form of sexual exploitation as told by the survivors. Each of these accounts includes an analysis of important incest-related issues raised by the survivor's story. Another objective is to explore the connections between the often cruel sexual exploitation of girls by their white male relatives and the brutal exploitation of black people by white men in South Africa.

Primary Care for Older People is a contemporary reference work on health problems in later life written exclusively by primary care professionals for primary care professionals that: integrates nursing and medical perspectives on clinical practice and service organisation. understands that well-intentioned changes in practice and service provision can have harmful effects on patients, professionals and the health service is still able to offer positive guidance to individual practitioners, practices and Primary Care Groups, about best practice and innovative multi-disciplinary care for an ageing population. It is aimed at doctors, nurses, health visitors and social workers who are trying to combine care of individuals with an understanding of the needs of whole communities. Its themes are relevant to teachers in different professional disciplines, to members of Primary Care Group and Trust Boards, to

planners and managers of primary care services, as well as to practitioners. The authors bring to this book their experience in general practice and community nursing, their expertise in service development and management, and their awareness of primary care research. Dr. Steve Iliffe has been an inner-city general practitioner in London since 1978, and is Reader in General Practice at the Royal Free and University College Medical School, where he is co-director of the Centre for Ageing Population Studies (CAPS) and manages the Primary Care for Older Peoples research and development programme. He can be contacted at [s.iliffe@ucl.ac.uk](mailto:s.iliffe@ucl.ac.uk). Vari Drennan has been a community health service manager, specialist health visitor for older people and health visitor since 1980 and is currently a senior lecturer in primary care nursing in the Department of Primary Care and Population Sciences at the Royal Free and University College Medical School. She can be contacted at [v.drennan@ucl.ac.uk](mailto:v.drennan@ucl.ac.uk), *Investors Chronicle and Money Market Review* Emerald Group Publishing. This is the book which, when first published in 1965, caused such an uproar in the US State Department that a sharp note of protest was sent to Kwame Nkrumah and the \$25million of American "aid" to Ghana was promptly cancelled.

Beguinages ('begijnhoven') are unique to the Low Countries. Originally, beguine communities were disseminated over a

large area comprising the northern and southern Low Countries, northern France, and parts of present-day Germany and Switzerland. The typical 'court' beguinages, however, are represented most strongly in the southern Low Countries, where a considerable number of them still exist. On account of their historical, architectural, and socio-religious value, a selection of thirteen beguinages was recognized as World Heritage by Unesco in 1998. Only recently, research has paid closer attention to the material culture of beguinage life, including literacy and book culture among beguines. *Beguinae in cantu instructae* focuses on another 'new' aspect of this musical culture, and for the first time describes and studies the sources of the beguines' musical life. The volume fills a void in current musicology and beguine scholarship, sketching the previously unassessed quality, quantity, stylistic diversity, and historical and geographical dissemination of the repertory. On the one hand, a number of source studies yield a deeper insight into several aspects of the preserved patrimony, which proves to be both rich and diverse. The 'story behind the music' provides the context necessary for a full understanding of the sources. On the other hand, this book aims at stimulating further exploration of the music by providing a repertory of all music manuscripts and prints that have been found thus far. *Beguinae in cantu instructae* will inform the general reader on new aspects of beguine life; furthermore, it will provide amateur and professional musicians with new material (from the Middle Ages to the late 18th century) and historians and musicologists with a basis for further study and research.

This Element provides a concise review of the existing literature on content, antecedents and consequences of economic news coverage. It tests and refines prominent assumptions and hypotheses in this area. Relying on communication science theories such as framing, news values and media dependency theories, we first outline and explain how media cover the economy. Additionally, it demonstrates that coverage has a fundamental impact above and beyond the state of the economy, both on economic perceptions and political attitudes of citizens, as well as on political decision makers and media reputation of a wide variety of organizations.

This book presents the outcomes of four years of educational research in the EU-supported project called ROLE (Responsive Online Learning Environments). ROLE technology is centered around the concept of self-regulated learning that creates responsible learners, who are capable of critical thinking and able to plan their own learning processes. ROLE allows learners to independently search for appropriate learning resources and then reflect on their own learning process and progress. To accomplish this, ROLE's main objective is to support the development of open personal learning environments (PLE's). ROLE provides a framework consisting of "enabler spaces" on the one hand and tools, content, and services on the other. Utilizing this framework, learners are invited to create their own controlled and preferred learning environments to trigger and motivate self-regulated learning. Authors of this book are

researchers, developers and teachers who have worked in the ROLE project and belong to the ROLE partner consortium consisting of 16 internationally renowned research institutions, including those from 6 EU countries and China. Chapters include numerous practical tutorials to guide the reader in creating innovative and useful learning widgets and present the best practices for the development of PLE's.

Does trust still matter in health care and who does it matter to? Have trust relations changed in the 'New' NHS? What does trust mean to patients, clinicians and managers? In the NHS trust has traditionally played an important part in the relationships between its three key actors: the state, health care practitioners and patients. However, in recent years the environments in which these relationships operate have been subject to considerable change as the NHS has been modernised. Patients are now expected to play a more active role, both

in self-managing their illness and in choice of care provider and clinicians are expected to work in teams and in partnership with managers. This unique book explores the importance of trust, how it is lost and won and the extent to which trust relationships in health care may have changed. The book combines theoretical and empirical analysis, while also examining the role of policy. Calnan and Rowe analyse data collected from interviews with patients, health care professionals and managers in primary care and acute care settings. Among the issues covered are: The importance of trust to their relationships What constitutes high and low trust behaviour The changing nature of trust relations between patients, clinicians and managers How trust can be built and sustained How interpersonal trust affects institutional trust Trust Matters in Health Care is key reading for policy makers, health care professionals and managers in the public and private sector, and a useful resource for educators and students within health and social care and management studies.
