Since the beginning of archery as a sport in America, archers have looked to easily obtained, quality wooden dowels as a source for arrow shafts. Times have changed, and while the quality of dowels has gone down, their use by beginning and do-it-yourself archers has never been higher. The Dowel Arrow Handbook is for those who wish to make their own arrows for target archery and hunting, while showing how to build arrows that are not only accurate, but safe to use.

For those who could get their hands on it, the self-published edition of 'Blue Mountain Buckskin' inspired generations of home tanners. This underground classic, the first real quality guide to brain tanning

-- tens of thousands of copies sold -- is now being published and made widely available for the first time. 'Blue Mountain Buckskin' is a complete how-to guide to tanning buckskin at home, using the methods Native Americans and outdoorsmen have preferred for thousands of years. It also includes 40 pages on creating garments, pouches, moccasins and other traditional uses of the deer. *The Backyard Bowyer* University of Missouri Press

Expert bowhunter and archery traditionalist Dan Bertalan has compiled the most complete bowmaking text available today. By traveling coast to coast and consulting America's top bowmakers, he has gathered the best information on how to build your own recurve longbow, improve your hunting skills, care properly for a bow, and more. Including descriptive photographs, diagrams, a complete glossary of terms, and reviews of particular bows that include draw/force measurements and hand-shot arrow speeds, this illuminating book will provide hunters, collectors, and others with invaluable insight into this specialized world. Skyhorse Publishing is proud to publish a broad range of books for hunters and firearms enthusiasts. We publish books about shotguns, rifles, handguns, target shooting, gun collecting, self-defense, archery, ammunition, knives, gunsmithing, gun repair, and wilderness survival. We publish books on deer hunting, big game hunting, small game hunting, wing shooting, turkey hunting, deer stands, duck blinds, bowhunting, wing shooting, hunting dogs, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

Theologians virtually ignore the economic commentary in the Bible. In the few cases where it gets any attention, economic commentary in the Gospels and other New Testament writings tend to lapse into simplistic class warfare nostrums. Liberation theologians import Marxism wholesale (but they try to sell it retail) into theology. Academic historians of 1st Century Palestine/Judea have been pushing an account of a poor peasant Jesus leading a poor peasant's revolt based on the idea of mass displaced workers in Lower Galilee. The problem is the actual archeological findings paint a picture of an industrious and entrepreneurial economy during Jesus's time there. Reading the Gospels in light of archeology and history, which are now available to us, gives us a very different picture than the one you've been told regarding what Jesus taught about work and money.

How our collective intelligence has helped us to evolve and prosper Humans are a puzzling species. On the one hand, we struggle to survive on our own in the wild, often failing to overcome even basic challenges, like obtaining food, building shelters, or avoiding predators. On the other hand, human groups have produced ingenious technologies, sophisticated languages, and complex institutions that have permitted us to successfully expand into a vast range of diverse environments. What has enabled us to dominate the globe, more than any other species, while remaining virtually helpless as lone individuals? This book shows that the secret of our success lies not in our innate intelligence, but in our collective brains—on the ability of human groups to socially interconnect and learn from one another over generations. Drawing

insights from lost European explorers, clever chimpanzees, mobile hunter-gatherers, neuroscientific findings, ancient bones, and the human genome, Joseph Henrich demonstrates how our collective brains have propelled our species' genetic evolution and shaped our biology. Our early capacities for learning from others produced many cultural innovations, such as fire, cooking, water containers, plant

knowledge, and projectile weapons, which in turn drove the expansion of our brains and altered our physiology, anatomy, and psychology in crucial ways. Later on, some collective brains generated and recombined powerful concepts, such as the lever, wheel, screw, and writing, while also creating the institutions that continue to alter our motivations and perceptions. Henrich shows how our genetics and biology are inextricably interwoven with

cultural evolution, and how culture-gene interactions launched our species on an extraordinary evolutionary trajectory. Tracking clues from our ancient past to the present, *The Secret of Our Success* explores how the evolution of both our cultural and social natures produce a collective intelligence that explains both our species' immense success and the origins of human uniqueness.
