"The health-care  
 revolution continues . . .  
 an accessible, science-  
 based approach to  
 wellness." —Andrew Weil,  
 MD What if we could  
 make basic, sustainable  
 lifestyle changes that  
 could prevent us from  
 getting cancer? What if  
 those with cancer could  
 improve their chances of  
 living long, vibrant lives?  
 The evidence is now clear:  
 at least 50 percent of  
 cancer deaths can be  
 prevented by making  
 healthy lifestyle changes.  
 But many—patients and  
 doctors included—still  
 don't realize the simple  
 changes we can make to  
 increase chances of  
 survival, or aid in the  
 healing process for those  
 with a diagnosis.  
 Introducing the concept of  
 the "Mix of Six," Lorenzo  
 Cohen and Alison Jefferies  
 make an informed case

that by focusing on six  
 key areas of health and  
 wellness, you can support  
 treatment or reduce your  
 risk for developing cancer  
 altogether. An accessible,  
 prescriptive guide to  
 wellness based on the  
 latest scientific findings,  
 Anticancer Living outlines  
 a path to radically  
 transform health, delay or  
 prevent many cancers,  
 support conventional  
 treatments, and  
 significantly improve  
 quality of life. "Anticancer  
 Living will empower  
 millions of people with  
 information they can use  
 to reduce their risk of  
 getting cancer and  
 improve their chances of  
 surviving a cancer  
 diagnosis. Highly  
 recommended!" —Dean  
 Ornish, MD, author of *The  
 Spectrum*

This long-awaited  
 textbook is the most  
 comprehensive  
 introduction to a broad  
 swath of combinatorial  
 and discrete  
 mathematics. The text  
 covers enumeration,  
 graphs, sets, and  
 methods, and it includes  
 both classical results and  
 more recent  
 developments. Assuming  
 no prior exposure to  
 combinatorics, it explains  
 the basic material for  
 graduate-level students in  
 mathematics and  
 computer science.  
 Optional more advanced  
 material also makes it  
 valuable as a research  
 reference. Suitable for a  
 one-year course or a one-  
 semester introduction,  
 this textbook prepares  
 students to move on to  
 more advanced material.  
 It is organized to  
 emphasize connections  
 among the topics, and  
 facilitate instruction, self-  
 study, and research, with  
 more than 2200 exercises  
 (many accompanied by  
 hints) at various levels of  
 difficulty. Consistent  
 notation and terminology  
 are used throughout,  
 allowing for a discussion  
 of diverse topics in a  
 unified language. The

thorough bibliography, containing thousands of citations, makes this a valuable source for students and researchers alike.

*Smart Health Choices* For Press

The rubric "Quality of Life" first came to the explicit attention of the medical profession a little over thirty years ago. Despite the undoubted fact that each one of us has his or her own Quality of Life, be it good or bad, there is still no general agreement about its definition, or the manner in which it should be evaluated. Although much has been written about quality of life, this work has been largely concerned with population-based studies, especially in health policy and health economics. The importance of "individual" quality of life has been neglected, in part because of a failure to define quality of life itself with sufficient care, in part perhaps because of a belief that it is impossible to develop a meaningful method of measuring individual variables. The editors of this book believe that the primary focus of quality of life is and must continue to be the individual, who alone can define it and assess its changing

personal significance. The challenge of presenting this belief

*A Complete Concordance to the Holy Scriptures of the Old and New Testament, Or, A Dictionary and Alphabetical Index to the Bible .. Tyndale House Publishers*

Twenty-five years ago my doctors had no cure for my cancer. So I went on a quest to find my own treatment. This is my story... Glenn Sabin was diagnosed with "incurable" leukemia (CLL). He embarked on a journey researching lifestyle changes, and conducted a personal experiment, chronicled through Harvard, now part

of the medical literature.

N Of 1

Twenty-five years ago my doctors had no cure for my cancer. So I went on a quest to find my own treatment. This is my story...In 1991, Glenn Sabin was a 28-year-old newlywed diagnosed with chronic lymphocytic leukemia (CLL)-a disease doctors called "uniformly fatal." Treatments could buy him some time and eventually ease his discomfort, but there was no conventional cure. Glenn's prognosis was clear: he was going to die.Although Glenn and his wife, Linda, continued to consult with doctors, cancer specialists and top oncologists, Glenn made a monumental decision: he would become his own health advocate. While he continued to "watch and wait," Glenn would figure out how to stay alive.No one could predict when a large-scale clinical trial would discover a cure for CLL, so Glenn began his own, medically monitored and carefully researched lifestyle changes. He would conduct his own, single patient clinical trial.He would become an

"n of 1."Today, Glenn is not only alive, but a 2012 biopsy at Harvard confirmed that his bone marrow contains no leukemic cells. His case is now part of the medical literature.In n of 1, author Glenn Sabin takes readers along his remarkable journey with 'incurable' cancer, where he discovers:●No two cancers are exactly alike. Our bodies, minds and diseases are unique, and need to be treated as such.●Knowledge and empowerment are your best allies against a life-limiting diagnosis.●Lifestyle changes are a powerful way to help prevent, manage and reduce the recurrence of disease-- and to improve your quality of life.●A strong support system and a clear mind may significantly improve your health.
