CARNEY LAMBERT

Chemical Engineer Society for Mining, Metallurgy, and Exploration Inc.

The crash of the minerals super cycle is being felt by the global phosphate industry. Fortunate phosphate companies are watching their profits drop manyfold, and the not-so-lucky ones are turning to survival mode. The recent market squeeze and ever-increasing environmental pressures have, however, presented opportunities for developing technologies for extracting the most valuable elements from phosphate. This compilation from the 2015 Beneficiation of Phosphates Conference includes insights from dozens of internationally respected experts on key breakthroughs that will shape the industry in the years ahead. Learn from the best and the brightest in the industry. Topics include: • Recovery of rare

earths from phosphate • Uranium recovery from phosphoric acid
• Recovery of magnesium from high-dolomite phosphate rock •
Phosphoric acid purification via byproducts production

Research Investigations for the Year Nelson Thornes

Some vols., 1920-1949, contain collections of papers according to subject.

Laboratory Investigation of Thornburg Los Ochos Ore

Bring your science lessons to life with Scientifica. Providing just the right proportion of 'reading' versus 'doing', these engaging resources are differentiated to support and challenge pupils of varying abilities.

Research Investigations for the Year 1924-1925

Laboratory Investigation of Riverton Stockpile Ore

A Study of the Factors Affecting the Efficiency of Carbonate Leaching

Facts and Figures Pertaining to Utah

Report of Investigations
