The most northerly of Britain's island groups, Shetland is so far removed from the rest of the UK that it usually appears as an inset on maps. Although relatively little known to those from outside the islands, Shetland is a magnificent terrain for walkers, especially those who love to really

explore and get away from the beaten track. The coastal walking here includes some of the finest in the country, with superb cliffs, towering sea stacks, caves and natural arches seemingly around every corner. Added to this is Shetland's better known claim to fame for its spectacular seabird colonies ¿ huge gannetries, moorland packed with arctic and great skuas, arctic terns in the more sheltered spots, and everyone's favourite ¿ the puffins. The islands also enjoy a dense population of otters, many seals, and a chance to see killer whales or other giants of the deep. Beyond all this natural grandeur, Shetland's history is fascinating too. The archaeological attractions are much less known than those on Orkney, but sites such as Jarlshof have amazingly preserved remains from prehistory right up to more recent times. These include iron age villages, chambered cairns, viking longhouses, pictish carvings, and impressive brochs ¿ including the most complete of all these iron-age defensive towers, on Mousa. This guide describes twenty high-altitude treks of 2-9 days in the mountains of Tajikistan, covering the Fann Mountains, Pamirs and northern ranges, plus five day hikes near the capital, Dushanbe, and a 10-day trek in the Afghan Wakhan Corridor. As well as detailed route description and 1:100,000 mapping for each trek, there is a wealth of practical advice on transport and visas, trekking support, equipment, cultural awareness, safety and security, as well as background notes on history, flora and fauna and a Tajik-Russian-Pamiri-English glossary. The guide can be used either to plan an independent trek or to select, prepare for and enhance an organised expedition. Known as 'the Roof of the World', Tajikistan is one of the most mountainous countries on Earth, with 93% of its landmass considered mountainous territory. This is where the mighty Himalaya meet the Tian Shan, Karakoram and Hindu Kush, and a centuries-old network of trails criss-crosses the remote terrain, linking isolated villages and shepherds' camps. Although infrastructure is fragile and tourism in its infancy, this Central Asian nation presents some outstanding opportunities for the adventurous trekker. The hand-picked routes showcase Tajikistan's breathtaking landscapes of lofty snow-capped peaks, turquoise lakes and sweeping high-altitude plateaus. Trekking here is also a rich cultural experience: in addition to wild camping, many of the treks include the opportunity to experience the fascinating local culture and warm hospitality in a traditional homestay, meeting those who call this remote wilderness home. This guide will be your companion to discovering Tajikistan, a country with so much to offer and one of Central Asia's best kept secrets.

A large part of academic literature, business literature as well as practices in real life are resting on the assumption that uncertainty and risk does not exist. We all know that this is not true, yet, a whole variety of methods, tools and practices are not attuned to the fact that the future is uncertain and that risks are all around us. However, despite risk management entering the agenda some decades ago, it has introduced risks on its own as illustrated by the financial crisis. Here is a book that goes beyond risk management as it is today and tries to discuss what needs to be improved further. The book also offers some cases.
