"In forty years, Earth's population will reach ten billion. Can our world support that? What kind of world will it be? Those answering these questions generally fall into two deeply divided groups- Wizards and Prophets, as Charles Mann calls them in this balanced, authoritative, nonpolemical new book. The Prophets, he explains, follow William Vogt, a founding environmentalist who believed that in using more than our planet has to give, our prosperity will lead us to ruin. Cut back! was his mantra. Otherwise everyone will lose! The Wizards are the heirs of Norman Borlaug, whose research, in effect, wrangled the world in service to our species to produce modern high-yield crops that then saved millions from starvation. Innovate! was Borlaug's cry. Only in that way can everyone win! Mann delves into these diverging viewpoints to assess the four great challenges humanity faces-food, water, energy, climate change-grounding each in historical context and weighing the options for the future. "--

Emotions, Technology, Design, and Learning provides an update to the topic of emotional responses and how technology can alter what is being learned and how the content is learned. The design of that technology is inherently linked to those emotional responses. This text addresses emotional design and pedagogical agents, and the emotions they generate. Topics include design features such as emoticons, speech recognition, virtual avatars, robotics, and adaptive computer technologies, all as relating to the emotional responses from virtual learning. Addresses the emotional design specific to agent-based learning environments Discusses the use of emoticons in online learning, providing an historical overview of animated pedagogical agents Includes evidence-based insights on how to properly use agents in virtual learning environments Focuses on the development of a proper architecture to be able to have and express emotions Reviews the literature in the field of advanced agent-based learning environments Explores how educational robotic activities can divert students' emotions from internal to external

In this long-anticipated sequel to his jarring takedown of professional sports, *The Fix Is In*, internationally recognized game fixing expert and scholarly authority Brian Tuohy further reveals the truths all sports fans need to know. Based on dedicated research and previously unreleased FBI files, each chapter exposes sports in a manner none of the major leagues' broadcast partners would dare attempt. No sport or league is spared as Tuohy rips through not only the likes of the NFL, NBA, MLB, NHL, and NASCAR, but also the PGA, UFC, eSports, horse racing, boxing, and both NCAA football and basketball. Along the way, championships are revealed as frauds, referees are exposed as accomplices, and legends are demolished. No sports fans should watch another game

until they read this book and understand what truly is being presented as "pure" in America's professional sports leagues.

An update edition of Solomon's Code—now *The A.I. Generation*—the thought-provoking examination of artificial intelligence and how it reshapes human values, trust, and power around the world. Whether in medicine, money, or love, technologies powered by forms of artificial intelligence are playing an increasingly prominent role in our lives. As we cede more decisions to thinking machines, we face new questions about staying safe, keeping a job and having a say over the direction of our lives. The answers to those questions might depend on your race, gender, age, behavior, or nationality. New AI technologies can drive cars, treat damaged brains and nudge workers to be more productive, but they also can threaten, manipulate, and alienate us from others. They can pit nation against nation, but they also can help the global community tackle some of its greatest challenges—from food crises to global climate change. In clear and accessible prose, global trends and strategy adviser Olaf Groth, AI scientist and social entrepreneur Mark Nitzberg, along with seasoned economics reporter Dan Zehr, provide a unique human-focused, global view of humanity in a world of thinking machines.

The essays in *Web Writing* respond to contemporary debates over the proper role of the Internet in higher education, steering a middle course between polarized attitudes that often dominate the conversation. The authors argue for the wise integration of web tools into what the liberal arts does best: writing across the curriculum. All academic disciplines value clear and compelling prose, whether that prose comes in the shape of a persuasive essay, scientific report, or creative expression. The act of writing visually demonstrates how we think in original and critical ways and in ways that are deeper than those that can be taught or assessed by a computer. Furthermore, learning to write well requires engaged readers who encourage and challenge us to revise our muddled first drafts and craft more distinctive and informed points of view. Indeed, a new generation of web-based tools for authoring, annotating, editing, and publishing can dramatically enrich the writing process, but doing so requires liberal arts educators to rethink why and how we teach this skill, and to question those who blindly call for embracing or rejecting technology.

Macroeconomics is the most engaging introductory economics resource available to students today. Using real businesses examples to show how managers use economics to make real decisions every day, the subject is made relevant and meaningful. Each chapter of the text opens

with a case study featuring a real business or real business situation, refers to the study throughout the chapter, and concludes with An Inside Look—a news article format which illustrates how a key principle covered in the chapter relates to real business situations or was used by a real company to make a real business decision. Solved problems in every chapter motivate learners to confidently connect with the theory to solve economic problems and analyse current economic events.

Aneurin - Nye - Bevan was one of the pivotal Labour figures of the post-war era. As Minister for Health in Attlee's government, his role in the foundation of the NHS, the world's largest publically-funded health service and the centre-piece of the Opening Ceremony of the 2012 London Olympics, changed the face of British society forever. The son of a coal miner from South Wales, Bevan was a life-long champion of social justice and the rights of working people and became one of the leading proponents of Socialist thought in Britain. He was also vehement in his dislike of the Conservative Party - going so far as to oppose the wartime coalition between Attlee and Churchill. Whilst he admired the Marxist critique of capitalism - and felt that the drive for private consumer affluence in the 1950s flew in the face of social good - he was certainly no communist. He was a passionate believer in public ownership but had a complex relationship with the unions, which may have prevented him from becoming party leader. In this book, acclaimed author Nicklaus Thomas-Symonds provides the first full-life biography of Bevan in over two decades, from his birth in Tredegar in the South Wales Valleys in 1897 to his death from stomach cancer at the age of 62 in 1960. Thomas-Symonds considers not just Bevan's political career but also his upbringing, his career in local government in Wales and his relationship with his wife, and fellow Labour MP, Jennie Lee. Drawing on first-hand interviews as well as recently released sources, he provides a unique portrait of one of the great British statesmen of the twentieth century.

The Beijing-Islamabad axis plays a central role in Asia's geopolitics, from India's rise to the prospects for a post-American Afghanistan, from the threat of nuclear terrorism to the continent's new map of mines, ports and pipelines. China is Pakistan's great economic hope and its most trusted military partner; Pakistan is the battleground for China's encounters with Islamic militancy and the heart of its efforts to counter-balance the emerging US-India partnership. For decades, each country has been the other's only 'all-weather' friend. Yet the relationship is still little understood. The wildest claims about it are widely believed, while many of its most dramatic developments are hid- den from the public eye. This book sets out the recent history of Sino-Pakistani ties and their ramifications for the West, for India, for Afghanistan, and for Asia as a whole. It tells the stories behind some of its most sensitive aspects, including Beijing's support for Pakistan's nuclear program, China's dealings with the Taliban, and the Chinese military's planning for crises in Pakistan. It describes a relationship increasingly shaped by Pakistan's internal strife, and the dilemmas China faces between the need for regional stability and the imperative for strategic competition with India and the USA.

*ACCA Skills F7 Financial Reporting (International and UK) Revision Kit 2014* Vintage

The goal of a high quality, cost-effective and accessible health care for patients is achieved through constructing a team-based and patient-centered health care delivery system. The expanded role of pharmacists uplifts them to patient care from dispensing and manufacturing or marketing of drugs. Along with doctors and allied health professionals, pharmacists are increasingly recognized as an integral part of the patient care team. Furthermore, colleges of pharmacy need to revise and up-date their curricula to accommodate the progressively increasing development in the pharmaceutical education and the evolving new roles of practicing

pharmacists in patient care settings. This book focuses on the expanded role of the pharmacists in total patient care including prescribing, dispensing, compounding, administering and monitoring of drugs at home, hospital, community, hospice, critical care, changeover and other care settings. The sector is emerging in both developed and under-developed countries. Overburdened by patient loads and the explosion of new drugs physicians turned to pharmacists more and more for drug information especially within institutional settings. And today's patient care pharmacists are taking more interests in medication review and reconciliation, patient education and counseling, creating drug therapy regimen and monitoring compliance. The purpose of this book is to guide the pharmacists in their daily interactions with patients and to ensure collaboration with other health professionals. The contents are mostly based on recently published articles related to patient care, with most recent ideas and activities followed by the patient care pharmacists around the globe. However, a pharmacist implements the care plan in collaboration with other health care professionals and the patient or caregiver. Along with professional guidelines, the book discusses the concepts and best practices of patient interaction, patient rights, and ethical decision-making for the professional pharmacist, apprentice and student. In every chapter, the role of pharmacists in that chapter specific issues are detailed explicitly so that a professional pharmacist or a student can figure out his or her do's and don'ts in that specific situation. Moreover, further reading references are listed as future recommendations. So, the book is an archive of potential references too. Among so many books about patient care, either doctors' or nurses' roles are highlighted. The proposed book highlights the pharmacists' roles and responsibilities to the most, separated from those of doctors and nurses, with the most recent information obtained from most publications in several journals, books, bulletins, newsletter, magazines etc.

[The Complete Book of Chinese Characters with Their Stories in Colour, Volume 1](#) Broadview Press

This anthology takes a broad approach to ethics, incorporating traditional topics and texts while bringing in voices and themes that are too often excluded. A substantial section on ethical theory is provided, as are readings on topics such as oppression, sex, identity, the environment, life and death, war and terror, and caring for others. Accessible introductions and discussion questions are included throughout to contextualize material for the student reader without playing favorites among the positions at issue.

How do people come up with truly original ideas? The answer is to think outside the box—way outside. For the past decade, Cyril Bouquet, Jean-Louis Barsoux, and Michael Wade, professors of innovation and strategy at IMD Business School, have studied inventors, scientists, doctors, entrepreneurs, and artists. These people, or “aliens,” as the authors call them, are able to make

leaps of creativity, and use five patterns of thinking that distinguish them from the rest of us.

These five patterns—Attention, Levitation, Imagination, Experimentation, and Navigation—lead to a fresh and flexible approach to problem-solving. Alien thinkers know how to free the imagination so it can detect hard-to-observe patterns. They practice deliberate ways to retreat from the world in order to see the big picture underlying a problem. And they approach ideas in systematic ways that reflect the constraints of reality. Through surprising and compelling stories, the authors show how readers can use this method to develop out-of-this-world ideas. ALIEN Thinking can help any of us find innovative solutions to the most difficult problems.

Rivers host vibrant multispecies communities in their waters and along their banks, and, according to queer-trans-feminist river scientist Cleo Wölfle Hazard, their future vitality requires centering the values of justice, sovereignty, and dynamism. At the intersection of river sciences, queer and trans theory, and environmental justice, *Underflows* explores river cultures and politics at five sites of water conflict and restoration in California, Oregon, and Washington. Incorporating work with salmon, beaver, and floodplain recovery projects, Wölfle Hazard weaves narratives about innovative field research practices with an affectively oriented queer and trans focus on love and grief for rivers and fish. Drawing on the idea of underflows—the parts of a river's flow that can't be seen, the underground currents that seep through soil or rise from aquifers through cracks in bedrock—Wölfle Hazard elucidates the underflows in river cultures, sciences, and politics where Native nations and marginalized communities fight to protect rivers. The result is a deeply moving account of why rivers matter for queer and trans life, offering critical insights that point to innovative ways of doing science that disrupt settler colonialism and new visions for justice in river governance.

*Retail Buying* Bloomsbury Publishing USA

India has become known in the US, the UK, Canada and Australia as ‘the world's largest democracy’, a ‘natural ally’, the ‘democratic counterweight’ to China and a trading partner of ‘massive economic potential’. This new foreign policy orthodoxy assumes that India will join with these four states and act just as any other democracy would. A set of political and think tank elites has emerged which seek to advance the cause of a culturally superior, if ill-defined, ‘Anglosphere’. Building on postcolonial and constructivist approaches to international relations, this book argues that the same Eurocentric assumptions about India pervade the foreign policies of the Anglosphere states, international relations theory and the idea of the Anglosphere. The assertion of a shared cultural superiority has long guided the foreign policies of the US, the UK, Canada and Australia, and this has been central to these states' relationships with postcolonial India. This book details these difficulties through historical and contemporary case studies, which reveal the impossibility of drawing India into Anglosphere-type relationships. At the centre of India-Anglosphere relations, then, is not a shared resonance over liberal ideals, but a postcolonial clash over race, identity and

hierarchy. A valuable contribution to the much-needed scholarly quest to follow a critical lens of inquiry into international relations, this book will be of interest to academics and advanced students in international relations, Indian foreign policy, Asian studies, and those interested in the ‘Anglosphere’ as a concept in international affairs.

Samson/Daft/Donnet's Management is a robust foundation text providing a balance of broad, theoretical content with an engaging, easy-to-understand writing style. It covers the four key management functions - planning, organising, leading and controlling - conveying to students the elements of a manager's working day. Along with current management theory and practice, the authors integrate coverage of innovation, entrepreneurship, agile workplaces, social media and new technology throughout. This sixth edition features a new author on the team and contains updates to content based on recent research. Real-life local and international examples showcase the ongoing changes in the management world. Focusing on a 'skills approach', they bring concepts to life for students, supporting motivation, confidence and mastery. Each part concludes with a contemporary continuing case study, focusing on car company Toyota as it faces managerial challenges and opportunities in the region.
