As she was  
growing up,  
Anita Venes  
forgot many  
things about  
her origins -  
who she was,  
where  
everybody  
else was, why  
she had a  
strange name  
which people  
kept  
changing. She

worked hard  
to forget  
about the  
past, avoiding  
questions  
about her  
parents and  
other family  
members who  
had all  
disappeared.  
This was often  
the case for  
an abandoned  
child growing  
up in the care  
system in the  
1940s. It was  
best to focus  
on the future  
when you  
might have  
some control  
over events.  
Fostering  
experiences  
can be good -  
for Anita they  
were not. This  
is her story, a  
story of  
survival and

inspiring courage to overcome the traumas of her abusive childhood. She chose to work with severely disabled children and that developed into her passion for over 40 years, eventually achieving the rewarding role of headteacher of a new school. The memorable stories of those years feature in *The Broken Tree*, and Anita also goes into detail about her search for her long-lost

family members and the impact each made upon her life. This includes the journey of finding her brother, an internationally famous clown and mime artist, known as Potts. His story is still to be told. Tragic at times, her tale is ultimately uplifting and inspirational for all those who struggle in life to overcome the hand they've been dealt. *The Scarlet Tree* W. W. Norton & Company In a book

destined to become a classic, biologist and acclaimed nature writer Bernd Heinrich takes readers on an eye-opening journey through the hidden life of a forest.

Harper Collins "Only God can make a tree," wrote Joyce Kilmer in one of the most celebrated of poems. In their book, authors Suzuki and Grady extend that celebration. The richly detailed text

and Bateman's original art pay tribute to this ubiquitous organism that is too often taken for granted. *The Island of Missing Trees* Tilbury House Publishers and Cadent Publishing Recounts the childhood remembrance s of an orphaned Native American boy living with his Cherokee grandparents in a mountain log cabin in eastern Tennessee during the 1930s.

 The enchanting autobiography of the seven-time James Beard Award-winning cookbook author and acclaimed actress who taught America how to cook Indian food. Whether climbing the mango trees in her grandparents' orchard in Delhi or picnicking in the Himalayan foothills on meatballs stuffed with raisins and mint, tucked into freshly

baked spiced pooris, Madhur Jaffrey's life has been marked by food, and today these childhood pleasures evoke for her the tastes and textures of growing up. Following Jaffrey from India to Britain, this memoir is both an enormously appealing account of an unusual childhood and a testament to the power of food to prompt memory, vividly bringing to life

a lost time and place. Also included here are recipes for more than thirty delicious dishes from Jaffrey's childhood. The Trees in My Forest Farrar, Straus and Giroux (Byr) Trees capture the imagination of the stoniest hearted, and enjoyment of them extends way beyond a core interest in plants and gardening. They represent permanence and longevity and have become

symbolic of the health of our planet. People plant trees to mark events of public and private importance, and parks and arboretums attract thousands of visitors each year to witness the annual spectacles of spring and fall — or simply to enjoy the trees. In this book, Toomer explores the fascinating subject of collecting trees from a historical, practical, and philosophical standpoint

and in doing so illuminates the very special relationship that exists between humans and trees. What inspires so many of us to become tree collectors? How do we choose what to collect, and what makes us narrow it down to witch hazels or magnolias? And he looks at the different motivations behind tree collections ranging from aesthetic criteria to collections planted for

education value or for scientific research. For those interested in planting a handful of trees, for armchair tree collectors, for those who collect trees on a large scale — in private and public gardens, cemeteries, urban landscapes, schools, and, of course, arboretums — this is a hugely inspiring, well-structured, comprehensive treatment of the subject that provokes

thought and provides practical advice on everything from budgets and maintenance to plant selection, labeling, and public safety. Tree UNM Press NEW YORK TIMES BEST SELLER • From the world's leading forest ecologist who forever changed how people view trees and their connections to one another and to other living things in the forest—a moving, deeply

personal journey of discovery Suzanne Simard is a pioneer on the frontier of plant communication and intelligence; her TED talks have been viewed by more than 10 million people worldwide. In this, her first book, now available in paperback, Simard brings us into her world, the intimate world of the trees, in which she brilliantly illuminates the fascinating and vital

truths--that trees are not simply the source of timber or pulp, but are a complicated, interdependent circle of life; that forests are social, cooperative creatures connected through underground networks by which trees communicate their vitality and vulnerabilities with communal lives not that different from our own. Simard writes--in inspiring, illuminating, and accessible ways—how

trees, living side by side for hundreds of years, have evolved, how they learn and adapt their behaviors, recognize neighbors, compete and cooperate with one another with sophistication, characteristics ascribed to human intelligence, traits that are the essence of civil societies--and at the center of it all, the Mother Trees: the mysterious, powerful forces that connect and sustain the others that

surround them. And Simard writes of her own life, born and raised into a logging world in the rainforests of British Columbia, of her days as a child spent cataloging the trees from the forest and how she came to love and respect them. And as she writes of her scientific quest, she writes of her own journey, making us understand how deeply human scientific inquiry exists beyond data

and technology, that it is about understanding who we are and our place in the world.

In this remarkable and often unsettling book, Sumana Roy gives us a new vision of what it means to be human in the natural world.

Increasingly disturbed by the violence, hate, insincerity, greed and selfishness of her kind, the author is drawn to the idea of

becoming a tree. 'I was tired of speed', she writes, 'I wanted to live to tree time.'

Besides wanting to emulate the spacious, relaxed rhythm of trees, she is drawn to their non-violent ways of being, how they tread lightly upon the earth, their ability to cope with loneliness and pain, the unselfishness with which they give freely of themselves and much more. She gives us new

readings of the works of writers, painters, photographers and poets (Rabindranath Tagore and D. H. Lawrence among them) to show how trees and plants have always fascinated us. She studies the work of remarkable scientists like Jagadish Chandra Bose and key spiritual figures like the Buddha to gain even deeper insights into the world of trees. She writes of those who have

wondered what it would be like to have sex with a tree, looks into why people marry trees, explores the death and rebirth of trees and tells us why a tree was thought by forest-dwellers to be equal to ten sons. Mixing memoir, literary history, nature studies, spiritual philosophies and botanical research, *How I Became a Tree* is a book that will prompt readers to think of

themselves and the natural world that they are an intrinsic part of, in fresh ways. It is that rarest of things - A truly original work of art. [The Education of Little Tree](#) London : Lutterworth Press As *The Giving Tree* turns fifty, this timeless classic is available for the first time ever in ebook format. This digital edition allows young readers and lifelong fans to continue the legacy and love of a

classic that will now reach an even wider audience. "Once there was a tree...and she loved a little boy." So begins a story of unforgettable perception, beautifully written and illustrated by the gifted and versatile Shel Silverstein. This moving parable for all ages offers a touching interpretation of the gift of giving and a serene acceptance of another's capacity to love in return. Every day the

boy would come to the tree to eat her apples, swing from her branches, or slide down her trunk...and the tree was happy. But as the boy grew older he began to want more from the tree, and the tree gave and gave. This is a tender story, touched with sadness, aglow with consolation. Shel Silverstein's incomparable career as a bestselling children's book author and illustrator began with

Lafcadio, the Lion Who Shot Back. He is also the creator of picture books including A Giraffe and a Half, Who Wants a Cheap Rhinoceros?, The Missing Piece, The Missing Piece Meets the Big O, and the perennial favorite The Giving Tree, and of classic poetry collections such as Where the Sidewalk Ends, A Light in the Attic, Falling Up, Every Thing On It, Don't Bump the Glump!, and

Runny Babbit. And don't miss the other Shel Silverstein ebooks, Where the Sidewalk Ends and A Light in the Attic! The Cottonwood Tree The Fellowship Press The Education of Little Tree tells of a boy orphaned very young, who is adopted by his Cherokee grandmother and half-Cherokee grandfather in the Appalachian mountains of Tennessee during the Great Depression.

"Little Tree" as his grandparents call him is shown how to hunt and survive in the mountains, to respect nature in the Cherokee Way, taking only what is needed, leaving the rest for nature to run its course. Little Tree also learns the often callous ways of white businessmen and tax collectors, and how Granpa, in hilarious vignettes, scares them away from his illegal attempts to

enter the cash economy. Granma teaches Little Tree the joys of reading and education. But when Little Tree is taken away by whites for schooling, we learn of the cruelty meted out to Indian children in an attempt to assimilate them and of Little Tree's perception of the Anglo world and how it differs from the Cherokee Way. A classic of its era, and an enduring book for all ages, The Education of Little Tree has

now been redesigned for this twenty-fifth anniversary edition.

A new method for the practical identification and recognition of trees -- and an important supplement to existing botanical methods. The book is in two parts: Pictorial Keys and Master Pages. The Keys are designed for easy visual comparison of details which look alike, narrowing the identification

of a tree to one of a small group -- the family or genus. Then, in the Master Pages, the species of the tree is determined, with similar details placed together to highlight differences within the family group, thus eliminating all other possibilities. The details of the Oak trees on this plate are an example of the system. All of the more than 1500 photographs were made specifically for

use in this book and were taken either in the field or of carefully collected specimens. Where possible, details such as leaves, fruit, etc., appear in actual size, or in the same scale. *How I Became a Tree* Simon and Schuster Carly Simon's New York Times bestselling memoir, *Boys in the Trees*, reveals her remarkable life, beginning with her storied childhood as the third daughter of

Richard L. Simon, the co-founder of publishing giant Simon & Schuster, her musical debut as half of The Simon Sisters performing folk songs with her sister Lucy in Greenwich Village, to a meteoric solo career that would result in 13 top 40 hits, including the #1 song "You're So Vain." She was the first artist in history to win a Grammy Award, an Academy Award and a Golden Globe Award, for her

<p>song "Let the River Run" from the movie Working Girl. The memoir recalls a childhood enriched by music and culture, but also one shrouded in secrets that would eventually tear her family apart. Simon brilliantly captures moments of creative inspiration, the sparks of songs, and the stories behind writing "Anticipation" and "We Have No Secrets" among many others.</p>	<p>Romantic entanglements with some of the most famous men of the day fueled her confessional lyrics, as well as the unraveling of her storybook marriage to James Taylor.</p> <p><i>Tree Identification Book</i> Paw Prints</p> <p>The story of Wangari Maathai, a native Kenyan, who taught the people living in the highlands how to plant trees and care for the land.</p> <p><i>A Tree Grows in Brooklyn</i></p>	<p>UNM Press</p> <p>A boy grows up to make positive change in his community. After suffering much heartache, Sundar decides change must come to his small Indian village. He believes girls should be valued as much as boys and that land should not be needlessly destroyed. From the daily lives of wild herdsmen and

the drama of predator kills to the field biologists investigating Africa's wild creatures and the anthropologist s seeking humanity's origins in the rift valley, this National Book Award finalist is a classic of journalistic observation. *Lab Girl* Timber Press  
An exquisite, lovingly crafted meditation on plants, trees, and our place in the natural world, in the tradition of Robin Wall Kimmerer's *Braiding*

*Sweetgrass* and Annie Dillard's *Pilgrim at Tinker Creek* "I was tired of speed. I wanted to live tree time." So writes Sumana Roy at the start of *How I Became a Tree*, her captivating, adventurous, and self-reflective vision of what it means to be human in the natural world. Drawn to trees' wisdom, their nonviolent way of being, their ability to cope with loneliness and pain, Roy movingly

explores the lessons that writers, painters, photographers, scientists, and spiritual figures have gleaned through their engagement with trees—from Rabindranath Tagore to Tomas Tranströmer, Ovid to Octavio Paz, William Shakespeare to Margaret Atwood. Her stunning meditations on forests, plant life, time, self, and the exhaustion of being human evoke the

spacious, relaxed rhythms of the trees themselves. Hailed upon its original publication in India as “a love song to plants and trees” and “an ode to all that is unnoticed, ill, neglected, and yet resilient,” *How I Became a Tree* blends literary history, theology, philosophy, botany, and more, and ultimately prompts readers to slow down and to imagine a reenchanting world in which

humans live more like trees. Tree Harper Collins "Fans of R.J. Palacio's *Wonder* will appreciate this feel-good story of friendship and unconventional smarts." —Kirkus Reviews *Ally* has been smart enough to fool a lot of smart people. Every time she lands in a new school, she is able to hide her inability to read by creating clever yet disruptive distractions. She is afraid

As her confidence grows, Ally feels free to be herself and the world starts opening up with possibilities. She discovers that there's a lot more to
