Chicago is famous for its role in fostering modern architecture. Now Jeanne Gang, founder of Studio Gang Architects, is giving the epithet "Chicago School" a new meaning. Her recently completed 82-story Aqua residential tower is already an icon of the Chicago skyline and has been universally hailed as a masterwork for the young firm. Reveal presents an in-depth look at the firm's unique work and working process through drawings, diagrams, sketches, and photographs that illuminate the evolution of each of the book's eight featured projects, both public and private, and ranging in size from exhibition to high-rise.

The Spanish conquest of the Americas in the 16th century was one of the most important and cataclysmic events in history. Spanish expeditions endured incredible hardships in order to open up the lands of the 'New World', and few stories in history can match these for drama and endurance. In *Conquistadors*, Michael Wood follows in the footsteps of some of the greatest of the Spanish adventurers travelling from the forests of Amazonia to Lake Titicaca, the deserts of North Mexico, the snowpeaks of the Andes and the heights of Machu Picchu. He experiences the epic journeys of Cortes, Pizarro, Orellana and Cabeza de Vaca, and explores the turbulent and terrifying events surrounding the Spanish conquest of the Aztec and Inca empires. Wood brings these stories to vivid life, highlighting both the heroic accomplishments and the complex moral legacy of the European invasion. *Conquistadors* is Michael Wood at his best - thoughtful, provocative and gripping history.

Kidnapped and sold into slavery in the American South, freeman Solomon Northup spent twelve years in bondage before being freed. Twelve Years a Slave is Northup's moving memoir, revealing unimaginable details of the horrors he faced as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Written in the year after Northup was freed and published in the wake of Harriet Beecher Stowe's Uncle Tom's Cabin, Northup's story was quickly taken up by abolitionist groups and news organizations as part of the fight against slavery, and continues to resonate more than a century after the end of the American Civil War.

Is American English in decline? Are regional dialects dying out? Is there a difference between men and women in how they adapt to linguistic variations? These questions, and more, about our language catapulted Robert MacNeil and William Cran—the authors (with Robert McCrum) of the language classic *The Story of English*—across the country in search of the answers. *Do You Speak American?* is the tale of their discoveries, which provocatively show how the standard for American English—if a standard exists—is changing quickly and dramatically. On a journey that takes them from the Northeast, through Appalachia and the Deep South, and west to California, the authors observe everyday verbal interactions and in a host of interviews with native speakers glean the linguistic quirks and traditions characteristic of each area. While examining the histories and controversies surrounding both written and spoken American English, they address anxieties and assumptions that, when explored, are highly emotional, such as the growing influence of Spanish as a threat to American English and the special treatment of African-American vernacular English. And, challenging the purists who think grammatical standards are in serious deterioration and that media saturation of our culture is homogenizing our speech, they surprise us with unpredictable responses. With insight and wit, MacNeil and Cran bring us a compelling book that is at once a celebration and a potent study of our singular language. Each wave of immigration has brought new words to enrich the American language. Do you recognize the origin of 1. blunderbuss, sleigh, stoop, coleslaw, boss, waffle? Or 2. dumb, ouch, shyster, check, kaput, scram, bummer? Or 3. phooey, pastrami, glitch, kibbitz, schnozzle? Or 4. broccoli, espresso, pizza, pasta, macaroni, radio? Or 5. smithereens, lollapalooza, speakeasy, hooligan? Or 6. vamoose, chaps, stampede, mustang, ranch, corral? 1. Dutch 2. German 3. Yiddish 4. Italian 5. Irish 6. Spanish

Also available in an open-access, full-text edition at <http://oaktrust.library.tamu.edu/handle/1969.1/85767> In this engaging and intriguing work, renowned Japanese psychologist Hayao Kawai examines his own personal experience of how a Japanese became a Jungian psychoanalyst and how the Buddhism in him gradually reacted to it. Kawai reviews his method of psychotherapy and takes a fresh look at I in the context of Buddhism. His analysis, divided into four chapters, provides a new understanding of the human psyche from the perspective of someone rooted in the East. Kawai begins by contemplating his personal koan: "Am I a Buddhist and/or a Jungian?" His honest reflections parallel Jung's early skepticism about Buddhism and later his positive regard for Buddha's teachings. He then relates how the individuation process is symbolically and meaningfully revealed in two philosophical and artistic picture series, one Eastern and one Western. After exploring the Buddhist conception of the ego and the self, which is the opposite of to the Western view, Kawai expands psychotherapy to include sitting in silence and holding contradictions or containing opposites.

Drawing on his own experience as a psychoanalyst, Kawai concludes that true integration of East and West is both possible and impossible. Buddhism and the Art of Psychotherapy is an enlightening presentation that deepens the reader's understanding of this area of psychology and Eastern philosophy.

Hiroshima is the story of six people—a clerk, a widowed seamstress, a physician, a Methodist minister, a young surgeon, and a German Catholic priest—who lived through the greatest single manmade disaster in history. In vivid and indelible prose, Pulitzer Prize-winner John Hersey traces the stories of these half-dozen individuals from 8:15 a.m. on August 6, 1945, when Hiroshima was destroyed by the first atomic bomb ever dropped on a city, through the hours and days that followed. Almost four decades after the original publication of this celebrated book, Hersey went back to Hiroshima in search of the people whose stories he had told, and his account of what he discovered is now the eloquent and moving final chapter of Hiroshima.

Imagine that you are living in a country that does not recognize you as a citizen in spite of the fact that your people have maintained a continuous existence there for several centuries. If that was not enough of a traumatic experience, consider that because of your racial, ethnic and religious identity other ethnic groups that are fighting the brutal military regime in your country for their self-determination and human rights consider you as "settlers" from a neighboring country. It must be your worst nightmare when you realize that half of your people (almost 2 million) have been forced to take asylum or refuge outside, and you may be the next in line to seek a way out of this living hell of xenophobia, discrimination, intolerance, racism and bigotry.The victims are the Rohingya people of Burma (Myanmar). Because of their religion, race, ethnicity, color and language they are the most discriminated and persecuted people in our planet. Some argue that they are also one of the most forgotten. The Myanmar military regime has denied their citizenship rights, claiming that they are illegal settlers from nearby Bangladesh who have moved into Arakan during the British occupation of Burma in the 19th century. Is there any truth to such allegations? Does the military junta apply the same litmus test against all ethnic and religious groups in matters of citizenship? What is the basis for a nation's claim to self-determination? Must a people wander in the wilderness for two millennia and suffer repeated persecution, humiliation and genocide to qualify? How about the rights of a minority community to survive with their culture and traditions intact? Do they need to be 'children' of a 'higher' God to qualify? What makes the children of a 'lesser' God to be forgotten and denied the same treatment and privilege that was granted hitherto to other nations?For much of its history, Burma has been ruled by military. As has once again been demonstrated recently they are brutal, savage and tyrannical. They have ignored people's verdict in the election and imprisoned leaders and workers of the democracy movement. They cannot be guarantors or protectors of human rights of anyone, let alone religious and ethnic minorities. Do you know that the Rohingyas - face cruel restriction on marriage and those married without government authorization are paraded naked on the streets?- Are restricted from traveling outside their villages?- Have no legal right to own land or property?- Are restricted from getting education, finding work, getting medical and health care? - Are subjected to land confiscation, forced eviction and destruction of homes, offices, schools, mosques, shops, etc., and face religious persecution on a daily basis? - Are victims of staged riots, forced starvation, arbitrary taxation, extortion, arrest, torture and extra-judicial killings?- Are forced to do slave labor for establishment of government infrastructure, new Buddhist settlements, pagodas and monasteries on evicted lands with the government intent of changing the landscape and demography of Arakan?- Are forced to convert to Buddhism &/or worship Buddha? Do you know that when it comes to the Rohingya people, the Burmese government doesn't uphold any of the Articles of the Universal Declaration of Human Rights?Nothing can excuse us from the criminal silence that we practice in not voicing our concern about the plight of the Rohingya people. "The Forgotten Rohingya" makes a strong case for mobilizing concerned citizens of our

globe to ease their sufferings. The author analyzes origin of the Rohingya people and offers ideas to solve their problem. The author also discusses problems of xenophobia and racism, which are so rampant in this country of many races, ethnicities and religions. He also analyzes the role of Daw Suu Kyi and failure of Burma's orange revolution.

Antennas in Matter provides both an introduction to and a comprehensive description of the properties of antennas and probes embedded within or near material bodies such as the earth, the ocean, or a living organism. The theory and application of antennas designed to transmit and receive information between points above the earth's surface are for the most part well understood. This book presents a full treatment of a sequence of research that has become increasingly important in recent years--the use of underground antennas for communication with miners and subway trains and for the geophysical exploration of the earth's crust; underwater antennas; antennas embedded in or near living organisms for biomedical and diagnostics in tissue and layered media with electromagnetic properties as diverse as those of fat, muscle, and bone. The book has been designed to serve a dual purpose: the first and third parts, covering fundamentals and measurements, form a self-contained introduction for undergraduates and researchers in geophysics and bioengineering; the second part provides a detailed presentation of the theory for graduate students and researchers in electrical engineering and physics. The approach integrates analytical, numerical, and experimental methods for the solution of a variety of problems involving antennas and electromagnetic wave propagation in or near matter.

"She longed to plunge a dagger into his handsome back. She had mastered the arts of war, not love. Disguised as a man, she fought as fiercely as any Scots warrior. Then an English soldier with blazing blue eyes stormed her castle walls and exposed Jamelyn's shocking secret. The last defender of Raven's Keep was not a man but a shapely auburn-haired beauty! Even after the treacherous king made her marry Justin, her conqueror, she vowed never to surrender. Yet a smoldering passion lay between them, ready to burst into a roaring inferno. The novel of a passionate woman who could fight anything-- except love."--Back cover.

The wars in Afghanistan and Iraq have highlighted again the precarious situation aid agencies find themselves in, caught as they are between the firing lines of the hostile parties, as they are trying to alleviate the plight of the civilian populations. This book offers an illuminating case study from a previous conflict, the Italo-Ethiopian war of 1935-36, and of the humanitarian operation of the Red Cross during this period. Based on fresh material from Red Cross and Italian military archives, the author examines highly controversial subjects such as the Italian bombings of Red Cross field hospitals, the treatment of Prisoners of War by the two belligerents; and the effects of Fascist Italy's massive use of poison gas against the Ethiopians. He shows how Mussolini and his ruthless regime, throughout the seven-month war, manipulated the International Committee of the Red Cross (ICRC) - the lead organization of the Red Cross in times of war, helped by the surprising political naïveté of its board. During this war the ICRC redefined its

role in a debate, which is fascinating not least because of its relevance to current events, about the nature of humanitarian action. The organization decided to concern itself exclusively with matters falling under the Geneva Conventions and to give priority to bringing relief over expressing protest. It was a decision that should have far-reaching consequences, particularly for the period of World War II and the fate of Jews in Nazi concentration camps.

Disaster response has been described as the last resort of the amateur: an unkind assessment but not without a grain of truth. Disaster generates an emotional response, and new disaster organisations are born with each new disaster. Lessons of the past on disaster management have to be learned anew. The need to increase the professionalism of disaster response is evident. All the more so as, in disaster terms, the world is getting worse, not better. Disasters become more complex, frequently involving the interaction of a disaster event, politics and technology. The last few years have also seen a growth in research into the area of disaster response. Too often, however, disaster researchers and disaster organisations have gone their separate ways. There is a need for these two groups to get together to devise more practical and professional approaches to disaster response. The "World Disasters Report," produced by the International Federation of Red Cross and Red Crescent Societies with the Centre for Research on the Epidemiology of Disasters, is a contribution to this effort of professionalisation. It provides facts and statistics, analysis and an exploration of trends, to dispel a number of myths about disasters and to define and advocate good practice. This is the first volume of Annual Reports which will become a vital tool for all those involved in the area of disaster response.

Exploring the concept and history of visual and graphic epistemologies, this engrossing collection of essays by artists, curators, and scholars provides keen insights into the many forms of connection between visibility and legibility. With more than 130 color and black-and-white photographs, *Visible Writings* sheds new light on the visual dimensions of writing as well as writing's interaction with images in ways that affect our experiences of reading and seeing. Multicultural in character and historical in range, essays discuss pre-Colombian Mesoamerican scripts, inscriptions on ancient Greek vases, medieval illuminations, Renaissance prints, Enlightenment concepts of the legible, and the Western "reading" of Chinese ideograms. A rich array of modern forms, including comics, poster art, typographic signs, scribbles in writers' manuscripts, anthropomorphic statistical pictograms, the street writings of 9/11, intersections between poetry and painting, the use of color in literary texts, and the use of writing in visual art are also addressed. *Visible Writings* reaches outside the traditional venues of literature and art history into topics that consider design, history of writing, philosophy of language, and the emerging area of visual studies. Marija Dalbello, Mary Shaw, and the other contributors offer both scholars and those with a more casual interest in literature and art the opportunity, simply stated, to see the writing on the wall.
