Your Baby Can Read! Book 3 Crown

The sixth book of the Iliad includes some of the most memorable and best-loved episodes in the whole poem: it holds meaning and interest for many different people, not just students of ancient Greek. Book 6 describes how Glaukos and Diomedes, though fighting on opposite sides, recognise an ancient bond of hospitality and exchange gifts on the battlefield. It then follows Hector as he enters the city of Troy and meets the most important people in his life: his mother, Helen and Paris, and finally his wife and baby son. It is above all through the loving and fraught encounter between Hector and Andromache that Homer exposes the horror of war. This edition is suitable for undergraduates at all levels, and students in the upper forms of schools. The Introduction requires no knowledge of Greek and is intended for all readers interested in Homer.

Artists are increasingly interested in producing work that is not only beautifully designed and produced, but is also environmentally friendly and socially responsible. In *Sustainable Ceramics*, pioneer Robert Harrison draws on more than four decades of making, and a wealth of experience shared by other artists to present practical possibilities for ceramic artists. This book covers all the factors to consider when going 'green', from fuels and alternative firing technology to energy-saving methods, sustainable ways to collect and use clay itself, and ways to deal with or recycle waste materials and save water. He suggests

simple and achievable methods by which to reduce the carbon footprint of ceramic art, and draws on interviews and examples throughout by practitioners who reclaim, reuse and recycle in their studio or work. *Sustainable Ceramics* is an essential resource for any ceramicist, studio or school looking for ideas on how to reduce the impact of their practice on the environment.
