The family forms of historic Europe have been fascinating in their variety. Their importance for the historical development of our continent would be difficult to exaggerate; for our relationship with the peoples of the other continents of the world as well. This book is an attempt to recover the different familial systems and compare them with one another. The studies range from Russia, Poland, Hungary and Austria to Scandinavia, Flanders and Britain. All the influences which have affected the character and composition of European households are taken into account. The analysis covers their function as productive work groups, in the procreation and bringing up of children, and in the support of the elderly, and their relationship with the wider society and its norms along with its political organization, central and local. Claims that inheritance customs and inheritance practice and the occupation of the household head exerted a powerful influence on the size and composition of households are subjected to rigorous and systematic investigation.

This book provides an overview of approaches to language and culture, and it outlines the broad interdisciplinary field of anthropological linguistics and linguistic anthropology. It identifies current and future directions of research, including language socialization, language reclamation, speech styles and genres, language ideology, verbal taboo, social indexicality, emotion, time, and many more. Furthermore, it offers areal perspectives on the study of language in cultural contexts (namely Africa, the Americas, Australia and Oceania, Mainland Southeast Asia, and Europe), and it lays the foundation for future developments within the field. In this way, the book bridges the disciplines of cultural anthropology and linguistics and paves the way for the new book series Anthropological Linguistics.

This study is an exploration of lived religion and gender across the Reformation, from the 14th–18th centuries. Combining conceptual development with empirical history, the authors explore these two topics via themes of power, agency, work, family, sainthood and witchcraft. By advancing the theoretical category of ‘experience’, Lived Religion and Gender reveals multiple femininities and masculinities in the intersectional context of lived religion. The authors analyse specific case studies from both medieval and early modern sources, such as secular court records, to tell the stories of both individuals and large social groups. By exploring lived religion and gender on a range of social levels including the domestic sphere, public devotion and spirituality, this study explains how late medieval and early modern people performed both religion and gender in ways that were vastly different from what ideologists have prescribed. Lived Religion and Gender covers a wide geographical area in western Europe including Italy, Scandinavia and Finland, making this study an invaluable resource for scholars and students concerned with the history of religion, the history of gender, the history of the family, as well as medieval and early modern European history.

The fifth volume of The Oxford History of Historical Writing offers essays by leading scholars on the writing of history globally since 1945. Divided into two parts, part one selects and surveys theoretical and interdisciplinary approaches to history, and part two examines select national and regional historiographies throughout the world. It aims at once to provide an authoritative survey of the field and to provoke cross-cultural comparisons. This is chronologically the last of five volumes in a series that explores representations of the past across the globe from the beginning

of writing to the present day.

Conceived as another chapter in the European history of religions (Europäische Religionsgeschichte), this book deals with the intense dynamics of the overlapping political, ethnic, and denominational constellations in Reformation and post-Reformation Transylvania. Navigating along multiple narrative tracks, and attempting to treat the religious history of an entire region over a limited time period in a differentiated, polyfocal way, the book represents a departure from the master narratives of any singularly oriented religious history. At the same time, the present work seeks to contribute to laying the groundwork at the micro- and meso-contextual level of East-Central European confessionalization processes, and to developing interpretive models for these processes in the region.

AP® World History: Modern Crash Course, For the New 2020 Exam, Book + Online Zondervan Academic

This book radically re-conceptualises the origins of the European Union as a trans- and supranational polity as it emerged between the Schuman Plan of May 1950 and the first enlargement of the European Communities at the start of 1973. Drawing upon social science theories and debates as well as recent historical research, Wolfram Kaiser and Morten Rasmussen in their introductory chapters discuss innovative ways of narrating the history of the EU as the emergence of a transnational political society and supranational political system. Building on these insights, eight chapters based on multilateral and multi-archival research follow each with case studies of transnational networks, public sphere and institutional cultures and policy-making which illustrate systematically related aspects of the early history of the EU. In the concluding chapter, leading political scientist Alex Warleigh-Lack demonstrates how greater interdisciplinary cooperation, especially between contemporary history and political studies, can significantly advance our knowledge of the EU as a complex polity. This book will be of interest to students and scholars of Politics, European Studies and History.

Church History, Volume Two chronicles the events, the triumphs, and the struggles of the Christian movement from the years leading up to the Reformation through the next five centuries to the present-day. Looking closely at the integral link between the history of the world and that of the church, Church History paints a portrait of God's people within the context of the times, cultures, and developments that both influenced and were influenced by the church. FEATURES: Maps, charts, and illustrations spanning the time from the thirteenth century to today. Explanations of all the major denominational movements, traditions, and schisms during and after the Reformation. Overviews of the Christian movement in Africa, eastern Europe, Asia, and Latin America to cover the scope of the ecumenical environment of the twenty-first century. Insights into the role and influence of politics, culture and societal norms, and technology on the Western church. Unbiased details on the major theological controversies and issues of each period. AUTHORS' PERSPECTIVE: Authors John D. Woodbridge and Frank A. James III wrote this history of the church from the perspective that such a history is the story of the greatest movement and community the world has known—as imperfect as it still is. It's a human story of a divinely called people who want to live by a divine revelation. It's a story of how they succeeded and how they failed and of how they are still trying to live out their calling. From the Reformation theologians in Europe to the revivalists, apologists, and Christian thinkers all over the world, the historical figures detailed are people who have struggled with the meaning of the greatest event in history—the coming of the Son of God—and with their role in that event and in the lives of God's people.

The Discovery of Islands consists of a series of linked essays in British history, written by one of the world's leading historians of political thought and published over the past three decades. Its purpose is to present British history as that of several nations interacting with - and sometimes seceding from - an imperial state. The commentary presents this history as that of an archipelago,

expanding across oceans to the Antipodes. Both New Zealand history and the author's New Zealand heritage inform this vision, presenting British history as oceanic and global, complementing (and occasionally criticising) the presentation of that history as European. Professor Pocock's interpretation of British history has been hugely influential in recent years, making *The Discovery of Islands* a resource of immense value for historians of Britain and the world.

As the culminating volume in the DCP3 series, volume 9 will provide an overview of DCP3 findings and methods, a summary of messages and substantive lessons to be taken from DCP3, and a further discussion of cross-cutting and synthesizing topics across the first eight volumes. The introductory chapters (1-3) in this volume take as their starting point the elements of the Essential Packages presented in the overview chapters of each volume. First, the chapter on intersectoral policy priorities for health includes fiscal and intersectoral policies and assembles a subset of the population policies and applies strict criteria for a low-income setting in order to propose a "highest-priority" essential package. Second, the chapter on packages of care and delivery platforms for universal health coverage (UHC) includes health sector interventions, primarily clinical and public health services, and uses the same approach to propose a highest priority package of interventions and policies that meet similar criteria, provides cost estimates, and describes a pathway to UHC.
