Thirteen former presidents and prime ministers discuss how they helped their countries end authoritarian rule and achieve democracy. National leaders who played key roles in transitions to democratic governance reveal how these were accomplished in Brazil, Chile, Ghana, Indonesia, Mexico, the Philippines, Poland, South Africa, and Spain. Commissioned by the International Institute for Democracy and Electoral Assistance (International IDEA), these interviews shed fascinating light on how repressive regimes were ended and democracy took hold. In probing conversations with Fernando Henrique Cardoso, Patricio Aylwin, Ricardo Lagos, John Kufuor, Jerry Rawlings, B. J. Habibie, Ernesto Zedillo, Fidel V. Ramos, Aleksander Kwasniewski, Tadeusz Mazowiecki, F. W. de Klerk, Thabo Mbeki,

and Felipe González, editors Sergio Bitar and Abraham F. Lowenthal focused on each leader's principal challenges and goals as well as their strategies to end authoritarian rule and construct democratic governance. Context-setting introductions by country experts highlight each nation's unique experience as well as recurrent challenges all transitions faced. A chapter by Georgina Waylen analyzes the role of women leaders, often underestimated. A foreword by Tunisia's former president, Mohamed Moncef Marzouki, underlines the book's relevance in North Africa, West Asia, and beyond. The editors' conclusion distills lessons about how democratic transitions have been and can be carried out in a changing world, emphasizing the importance of political leadership. This unique book should be valuable for political leaders, civil society activists, journalists, scholars, and all who want to support democratic transitions.

Law, Volume I: Rules is a comprehensive analysis of the customary rules of international humanitarian law applicable in international and non-international armed conflicts. In the absence of ratifications of important treaties in this area, this is clearly a publication of major importance, carried out at the express request of the international community. In so doing, this study identifies the common core of international humanitarian law binding on all parties to all armed conflicts. Comment Don:RWI.

Examines the distinct difference between how the people and the founding fathers viewed the new Constitution and how it is interpreted over two hundred years later and maintains that originally the people were the ones responsible for seeing that its concepts were properly implemented.

Philippine Political Law Oxford Handbooks

This book draws on the extensive literature on populism, democracy, and emerging markets as well as interviews with senior government officials, experts, and journalists in the Philippines and beyond. This book is the first to analyze the significance and implications of the rise of Filipino president Rodrigo Duterte within a rapidly-changing Asia Pacific region. As China's power in the Pacific grows rapidly, nations that have traditionally been US allies, such as the Philippines, are experiencing political convulsions; Duterte's open willingness to realign towards China (at the expense of America) in exchange for infrastructure investment is one of the clearest indicators of what China's rise might look like for nations around the

world. Timely, precise, accessible and fast-paced, this book will be of value to scholars, journalists, policy-makers, and China watchers.

The New Constitution of the Philippines Annotated Penguin

The growing economic and political significance of Asia has exposed a tension in the modern international order. Despite expanding power and influence, Asian states have played a minimal role in creating the norms and institutions of international law; today they are the least likely to be parties to international agreements or to be represented in international organizations. That is changing. There is widespread scholarly and practitioner interest in international law at present in the Asia-Pacific region, as well as developments in the practice of states. The change has been driven by threats as well as opportunities. Transnational issues such as climate change and occasional flashpoints like the territorial disputes of the South China and the East China Seas pose challenges while economic integration and the proliferation of specialized branches of law and dispute settlement mechanisms have also encouraged greater domestic implementation of international norms across Asia. These evolutions join the long-standing interest in parts of Asia (notably South Asia) in post-colonial theory and the history of international law. The Oxford Handbook of International Law in Asia and the Pacific brings together pre-eminent and emerging specialists to analyse the approach to and influence of key states of the region, as well as whether truly 'Asian' trends can be identified and what this might mean for international order.

The People Themselves Oxford University Press, USA

For twelve years Robert Blecker, a criminal law professor, wandered freely inside Lorton Central Prison, armed only with cigarettes and a tape recorder. *The Death of Punishment* tests legal philosophy against the reality and wisdom of street criminals and their guards. Some killers' poignant circumstances should lead us to mercy; others show clearly why they should die. After thousands of hours over twenty-five years inside maximum security prisons and on death rows in seven states, the history and philosophy professor exposes the perversity of justice: Inside prison, ironically, it's nobody's job to punish. Thus the worst criminals often live the best lives. *The Death of Punishment* challenges the reader to refine deeply held beliefs on life and death as punishment that flare up with every news story of a heinous crime. It argues that society must redesign life and death in prison to make the punishment more nearly fit the crime. It closes with the final irony: If we make prison the punishment it should be, we may well abolish the very death penalty justice now requires.

The application and interpretation of the four Geneva Conventions of 1949 and their two Additional Protocols of 1977 have developed significantly in the seventy years since the International Committee of the Red Cross (ICRC) first published its Commentaries on these important humanitarian treaties. To promote a better understanding of, and respect for, this body of law, the ICRC commissioned a comprehensive update of its original Commentaries, of which this is the third volume. The Third Convention, relative to the treatment of prisoners of war and their protections, takes into account developments in the law and practice in the past seven decades to provide up-to-date interpretations of the Convention. The new Commentary has been reviewed by humanitarian law practitioners and academics from around the world. This new Commentary will be an essential tool for anyone involved with international humanitarian law.

Constitutionalism and Rights explores the ambivalent relationship between the American tradition of constitutionalism and the notions of rights that have emerged over the last three centuries. The six essays focus systematically on selected tensions between these two fundamental strands in the American tradition of liberty and self-government. Discussed are: ideas of rights and constitutionalism generally; mechanisms and procedures necessary to assure rights in a large bureaucratic state;

rights as expressed in public welfare programs; innovations employed by the eighteenth-century Framers to achieve limited government as a means to securing fair and equal individual freedom; the dependence of rights on institutional devices and the rule of law; the need for public virtue (balancing individual rights with self-sacrifice for the common good) if the American constitutional system is to survive; and the dangers of individualism and individual rights posed by modern liberalism. The essayists are prominent scholars representing the disciplines of political science, government, and law. They all state their confidence in the American constitutional system, but they also voice doubts about the future if problems are not redressed. The editors conclude their introduction by expressing hope that this volume "will clarify some important issues and help us remember essential lessons of the past, as we continue in this great public conversation." Constitutionalism and Rights is the first of a three-volume series examining significant features of the Constitution. The series, inspired by the bicentennial of that great achievement, consists of essays presented by scholars at three conferences on the Constitution held at Brigham Young University in 1985, 1986, and 1987, and several additional essays written especially for these volumes.

European Convention on Human Rights – Article 10 – Freedom of expression 1.

Everyone has the right to freedom of expression. This right shall include freedom to hold opinions and to receive and impart information and ideas without interference by public authority and regardless of frontiers. This article shall not prevent States from requiring the licensing of broadcasting, television or cinema enterprises. 2. The exercise of these freedoms, since it carries with it duties and responsibilities, may be subject to such formalities, conditions, restrictions or penalties as are prescribed by law and are necessary in a democratic society, in the interests of national security, territorial integrity or public safety, for the prevention of disorder or crime, for the protection of health or morals, for the protection of the reputation or rights of others, for preventing the disclosure of information received in confidence, or for maintaining the authority and impartiality of the judiciary. In the

context of an effective democracy and respect for human rights mentioned in the Preamble to the European Convention on Human Rights, freedom of expression is not only important in its own right, but it also plays a central part in the protection of other rights under the Convention. Without a broad guarantee of the right to freedom of expression protected by independent and impartial courts, there is no free country, there is no democracy. This general proposition is undeniable. This handbook is a practical tool for legal professionals from Council of Europe member states who wish to strengthen their skills in applying the European Convention on Human Rights and the case law of the European Court of Human Rights in their daily work.

Truly gripping is the detailed narration of what actually took place during the Senate and House debates. This is valuable documentation for most civil society pro- and anti-RHadvocates who can only occasionally, or sometimes never, gain access to the floor debates. What was actually said, or not said--the assertions, the rebuttals, the continuing attacks and defenses--offer intriguing insights into how contentious laws are passed in this country. A compelling read for all.

Interdisciplinary exploration of Asian understandings of human dignity and human rights in courts, religion, and socio-political changes.

The Death of Punishment St. Martin's Press

From London to Libya, from Istanbul to Iceland, there is great interest among comparative constitutional scholars and practitioners about when a proposed constitution is likely to succeed. But what does it mean for a constitution to succeed? Are there universal criteria of success, and which apply across the board? Or, is the choice of criteria entirely idiosyncratic? This edited volume takes on the idea of constitutional success and shows the manifold ways in which it can be understood. It collects essays from philosophers, political scientists, empiricists and legal scholars, that approach the definition of constitutional success from many different angles. It also brings together case studies from

Africa, Europe, Latin America, the Middle East and Asia. By exploring a varied array of constitutional histories, this book shows how complex ideas of constitutional success play out differently in different contexts and provides examples of how success can be differently defined under different circumstances.

FIDIC contracts are the most widely used contracts for international construction around the world and are used in many different jurisdictions, both common law and civil law. For any construction project, the General Conditions of Contract published by FIDIC need to be supplemented by Particular Conditions that specify the specific requirements of that project subject to the relevant laws. FIDIC Contracts in Asia Pacific provides readers with detailed guidance and resources for the preparation of the Particular Conditions that will comply with the requirements of the applicable laws for a number of the jurisdictions in which FIDIC contracts are used. The laws that apply to the governing law of the contract, construction works and dispute resolution in each jurisdiction are identified. This book offers chapters on the FIDIC Conditions of Contract for Underground Works, and the perspective of a bilateral aid agency on the use of FIDIC contracts. Each jurisdiction features an outline of its construction industry and information on the impact of Covid-19 on both the execution of construction projects and the operation of construction contracts. This book is essential reading for construction

professionals, lawyers and students of construction law using FIDIC contracts.

A Treatise on the Law of Public Offices and Officers JHU Press

This ground-breaking collection of essays outlines and explains the unique development of Latin American jurisprudence. It introduces the idea of the *Ius Constitutionale Commune en América Latina* (ICCAL), an original Latin American path of transformative constitutionalism, to an Anglophone audience for the first time. It charts the key developments that have transformed the region and assesses the success of the constitutional projects that followed a period of authoritarian regimes in Latin America. Coined by scholars who have been documenting, conceptualizing, and comparing the development of Latin American public law for more than a decade, the term ICCAL encompasses themes that cross national borders and legal fields, taking in constitutional law, administrative law, general public international law, regional integration law, human rights, and investment law. Not only does this volume map the legal landscape, it also suggests measures to improve society via due legal process and a rights-based, supranational and regionally rooted constitutionalism. The editors contend that with the strengthening of democracy, the rule of law, and human rights, common problems such as the exclusion of wide sectors of the population from having a say in government, as well as corruption, hyper-presidentialism, and the weak normativity of the law can be combatted more effectively in future.
