JOYCE DEANDRE

The Cambridge Guide to Teaching English to Speakers of Other Languages Cambridge University Press
This volume presents a union of theoretical and practical pedagogical perspectives on materials design and development. This volume provides an incisive overview of the current state of materials design in language teaching. Seventeen original chapters explore the issues involved in the design, implementation, and evaluation of materials in language programs in a wide

variety of settings and contexts. This stimulating collection considers different approaches to materials design - including teacher-developed classroom materials, commercial materials, and technology-driven materials. Discussion questions and tasks follow each chapter to make this volume useful to both prospective and practicing teachers alike.

The Cambridge Guide to Pedagogy and Practice in Second Language Teaching
Cambridge University Press

Based on original research, this book explores the fundamental relationship between research and practice in English language teaching. *Teacher Research in Language Teaching* uses empirical evidence taken from an international

survey of over 1,700 teachers and educational managers, over a period of six years. It examines their views of research, whether they read ELT research, and whether they do their own research. The author goes on to explore the process which teachers go through in learning to do research, and the research cultures within teaching institutions. The book concludes with a review of the key findings to emerge from the research and a discussion of strategies through which language teacher research engagement can be promoted more productively.

Lessons from Nothing Cambridge University Press

The possession of an adequate level of teacher language awareness (TLA) is an essential attribute of any competent L2 teacher. The author sets out to explore the nature of TLA with particular reference to grammar, and to examine the relationship between teachers' language awareness and their handling of language-related issues in their teaching. The purpose of the book is to encourage those involved in language education to think more deeply about TLA: its importance, its nature, and its impact upon teaching (and, potentially, upon learning). The book aims to make teachers more aware of the significance of their handling of language, and to help teacher educators to adopt a more principled approach to the planning of those parts of their programmes associated with TLA.

English Language Teaching Materials

Cambridge University Press

The field of TESOL (Teaching English to Speakers of Other Languages) stands at an active crossroads – issues of language, culture, learning, identity, morality, and spirituality mix daily in classrooms around the world. What roles might teachers' personal religious beliefs play in their professional activities and contexts? Until recently, such questions had been largely excluded from academic conversations in TESOL. Yet the qualitative research at the core of this book, framed and presented within a teacher knowledge paradigm, demonstrates that personal faith and professional identities and practices can, and do, interact and interrelate in ways that are both meaningful and problematic. This study's Christian TESOL teacher participants, working overseas in Southeast Asia, perceived, explained, and interpreted a variety of such connections within their lived experience. As a result, the beliefs-practices nexus deserves to be

further theorized, researched, and discussed. Religious beliefs and human spirituality, as foundational and enduring aspects of human thought and culture, and thus of teaching and learning, deserve a place at the TESOL table.

About Language Cambridge Scholars Publishing

This work explores the importance of meaningful action for language teaching and learning, paying tribute to the enduring influence of Earl Stevick. With contributions from 19 ELT authors and influential academics, *Meaningful Action* draws upon and acknowledges the huge influence of Earl Stevick on language teaching. Stevick's work on 'meaningful action' explored how learners can engage with activities that appeal to sensory and cognitive processes, ensuring that meaning is constructed by the learner's internal characteristics, and by their relationship with other learners and the teacher. This edited volume focuses on meaningful action in three domains: learner internal factors and relationships between the people involved in the learning process; classroom activity; and diverse frameworks supporting language learning.
