Babies Baby's Very First

Every new parent purchases at least one high-contrast board book, and this one, with its bold, more abstract art, stands out from the crowd. Featuring graphic images that are perfect for infants, parents and babies will love exploring this book together. Infants can distinguish the colors black and white because of their high contrast. But what is the next color infants see? Red! The images in this book have been created based on decades of research and refinement and are accompanied by bouncy, rhyming text.

Baby's First Book: Shapes Greenwillow Books

You will be amazed at how your baby responds to black and white images from the day they are born. Black and White Baby Book: People High-Contrast, Black & White Book For Newborns Book Size: 8.5 x 8.5 Get comfortable, snuggle up with your baby and slowly look through this charming high-contrast, black and white book. Allow your baby to develop his/her mind with this easy to see introduction to PEOPLE. The book includes bold images to help stimulate your child's developing mind. Designed for babies 6 weeks to 6 months, the bold black-and-white high-contrast images will engage your baby and provide a calming, natural learning experience. These pictures maximize visual stimulation and appear to encourage infant development in the early months. Babies respond to the strong contrast between black and white, which helps to stimulate development within your baby's eyes. Helping your child develop his or her vision by looking at high-contrasting black-and-white images is a good start for nurturing your baby's visual development. High contrast shapes and patterns provide your baby with something simple and engaging to focus on which in turn will allow his/her mind to rest. High-contrast shapes are usually very basic and may even appear to be a little boring to adults, but they are designed to hold your baby's attention. Anything with very obvious contrast - such as black and white edges and lines - is an optimal stimulant for the visual system. Newborn babies are highly attracted to black and white images due to their limited vision when first born. A newborn retina can only detect large contrasts between light and dark, or black and white. High-contrasting, black and white images with sharp outlines are therefore much easier for your baby to see in these first few months of life. Your baby will be completely absorbed when this black and white book is put in front of them. Baby Vision - Birth to 4 months From birth to about 4 months of age, your baby's eyes will not focus on objects more than 8 inches from his/her face.

Your child will look intently at the high-contrast images but he/she will not have yet developed the ability to easily tell the difference between two objects or move his/her eyes between two images. However...looking at these types of images is perfect training! Allowing your child to repeatedly look at these contrasting black and white images will help increase your baby's attention span. High-contrasting black-and-white books or images are easiest for your baby to see at this age. By eight weeks, your baby will begin to more easily focus his/her eyes on things. There have been studies where many parents have reported that their newborn's attention span increased from 10 seconds to 90 seconds after only one week of looking at black and white image books for just a few minutes a day. The high-contrast images in this book will allow your child to track with more ease because of his/her increased interest. Tracking helps your baby to learn where an object is and how it differs from its background. The beautifully designed, striking and stylish images in this book are ideal for babies just beginning to look and learn. The large images in this book will help to calm and also captivate your baby's interest while at the same time provide the building blocks for his/her developing mind. Buy Now! An ideal little library of first words books Age: birth+ *Black and White Baby Book: Alphabet* Bloomsbury Children's Books Black and white illustrations that are perfect for newborn babies! *Baby's First Book: Shapes High-Contrast, Black & White Book For Newborns* This charming high-contrast, black and white book is an introduction to various shapes and includes bold basic images to help stimulate your child's developing mind. Designed for babies 6 weeks to 6 months, the bold black-and-white high-contrast images will engage your baby and provide a calming, natural learning experience. Babies respond to the strong contrast between black and white, which helps to stimulate development within your baby's eyes. With all the activity going on around a newborn baby it is easy for his/her brain to become completely overwhelmed. High contrast shapes and patterns provide your baby with something simple and engaging to focus on, which in turn will allow his/her mind to rest. Researchers have shown that newborns actually prefer to look at black and white images, rather than bright colors....(that you will see in most "general" newborn baby books). Contrasting colors are most appealing to babies. Black and white provide the greatest contrast. Black and white are the easiest for your baby to perceive.

Hello Winter Charlesbridge Publishing

These stylishly illustrated, predominantly black and white books follow that scientific research that has shown that young babies respond best to high-contrast images. Titles included are, 'Animals', 'Babies', 'Faces', and 'Going Out'.

Baby Loves Sports Usborne Books

Show your child how to fall in love with reading at a very early age! *Baby's First Book: Animals High-Contrast, Black & White Book For Newborns* This charming high-contrast, black and white book is an introduction to bugs/insects, and includes bold images to help stimulate your child's developing mind. Designed for babies 6 weeks to 6 months, the bold black-and-white high-contrast images will engage your baby and provide a calming, natural learning experience. Babies respond to the strong contrast between black and white, which helps to stimulate development within your baby's eyes. With all the activity going on around a newborn baby it is easy for his/her brain to become completely overwhelmed. High contrast shapes and patterns provide your baby with something simple and engaging to focus on, which in turn will allow his/her mind to rest. High-contrast shapes are usually very basic and may even appear to be a little boring to adults, but they are designed to hold your baby's attention. Researchers have shown that newborns actually prefer to look at black and white images, rather than bright colors....(that you will see in most "general" newborn baby books). Contrasting colors are most appealing to babies. Black and white provide the greatest contrast. Black and white are the easiest for your baby to perceive. Fixation Your baby can see clearly at birth and can fixate and maintain his/her gaze intently on an object. Allowing your child to repeatedly look at these contrasting black and white images will help increase your baby's attention span. There have been studies where many parents have reported that their newborn's attention span increased from 10 seconds to 90 seconds after only one week of looking at black and white image books for just a few minutes a day. Tracking Your baby will track appealing objects with his/her eyes. The more appealing the object, the more intense and prolonged the tracking. When

you use high-contrast images your child will be able to track with more ease because of his/her increased interest. Tracking helps your baby to learn where an object is and how it differs from its background. Scanning When your baby scans, he/she learns how to see and compare entire objects. This ability eventually helps him/her to distinguish all the objects in the environment. The large images in this book will help to calm and also captivate your baby's interest while at the same time provide the building blocks for his/her developing mind.

First Baby Book Blue Star Press

A golfer swings her club. Look at the ball fly! A player gears up to kick a soccer ball soaring toward him. A basketball player's open - here comes the ball! Making connections between images on a page and the real world is an important building block for your baby's communication skills—and this charming introduction to sports in bold, basic patterns, provides a great high-contrast experience for young developing eyes. As newborns' vision is not developed enough to recognize colors, the sharp contrast of high-contrast patterns and illustration allows their eyes to differentiate between the images on a page. Sure to grab little ones' attention! Also available: Hello, Baby Animals; Hello, Ocean Friends; and Hello, Garden Bugs. Coming soon: Hello, My World.

Baby's First Book Gakken

This black-and-white book features beautiful fine art that is specially designed for a baby's visual development. Plus, the accordion-style format means the book stands upright and is perfect for tummy time! Infants have limited capabilities with vision upon birth and respond well to high-contrast images, which is why this black-and-white contrast book is perfect for their young and growing minds. Baby's Black and White Contrast Book provides developmentally appropriate visual stimuli for your baby's visual development, while exposing them to life-like imagery that can grow with them and expand their vocabulary. Each animal painting was designed by Tabitha Paige, artist, speech-pathologist, and author of the bestselling series Our Little Adventures. This book is meant to

be functional for your child's many different learning needs as well as versatile for any space. The unique accordion-style format is perfect for tummy time, allowing your child to unfold the pages and stare and play with them, either with you or on their own.

Fun, effective novelties and extras - from pops and tactiles to shiny cover finishes ensure parents will love to share these with their baby.

The Black & White Baby Book - Transport duopress

What's going on, zebra? Quack quack, baby duck. Hola, baby owl! Making connections between images on a page and the real world is an important building block for your baby's communication skills—and this charming introduction to ten baby animals, paired with friendly greetings and bold, basic patterns, provides a great high-contrast experience for young developing eyes. As newborns' vision is not developed enough to recognize colors, severe black-and-white contrast of patterns and images allow their eyes to differentiate between what they're seeing. Sure to grab little ones' attention! Also available: Hello, Ocean Friends and Hello, Garden Bugs. Coming soon: Hello, My World.

Black and White Usborne Publishing Ltd

"Each page has a word, with a matching picture, on the theme of faces."--Cataloguer.

Look, Look! Amazing Baby

For the first 0-9 months of their lives, babies respond well to simple black and white patterns. For short periods of time, high contrast black and white images support their visual development by stimulating optic nerves. Because babies' retinas are not fully developed, the images teach their eye muscles and brain to coordinate, which also aids in developing their eyesight. First Baby Book offers a multisensory experience through strong black and white patterns that aid babies in developing the ability to focus their concentration and attention.
