Rachel Simon's debut, originally published in 1990, is a collection of stories about the struggle for love and intimacy, told from the point of view of adolescent girls, young mothers, and elderly women. Some are rooted in reality, others in magical realism, with tones ranging from serious to comic, sunny to

dark. Throughout, Simon employs such a wide range of voices—sweet, shrewd, wistful, irascible, vulnerable, sensual—the Philadelphia Inquirer hailed her as “a literary ventriloquist.” Among the highlights are “Little Nightmares, Little Dreams,” in which an elderly couple enters the unknown by trying to dream the same dream; “Paint,” in which a runaway-turned-artist’s-model provokes protests after her naked body becomes the canvas; “Afterglow,” in which a

plucky thirteen-year-old playing hooky is held hostage by an escaped convict; “Grandma Death,” in which an overbearing grandmother can’t seem to go anywhere without someone dropping dead; and “Better Than A Box of Dreams,” in which a maid irritated by her boss’s dream therapy sessions dreams her own fondest wish back to life. Little Nightmares, Little Dreams was presented on NPR’s Selected Shorts and the Lifetime program The Hidden Room. “Paint” and

“The Speed of Love” were adapted by the Arden Theatre Company, and “Better Than A Box of Dreams” for InterAct Theatre, both in Philadelphia. This 2014 ebook rerelease includes four previously uncollected stories. It also includes a new introduction that tells the story of the book’s astonishing path to publication, reveals the inspiration behind several stories, and offers wisdom from a seasoned writing friend that writers everywhere will treasure.

The beloved debut novel about an affluent Indian family forever changed by one fateful day in 1969, from the author of The

Houghton Mifflin Harcourt  
From the No. 1 bestselling

author of What If? - the man who created xkcd and explained the laws of science with cartoons - comes a series of brilliantly simple diagrams ('blueprints' if you want to be complicated about it) that show how important things work: from the nuclear bomb to the biro. It's good to know what the parts of a thing are called, but it's much more interesting to know what they do. Richard Feynman once said that if you can't explain something to a first-year student, you don't really get it. In Thing

Explainer, Randall Munroe takes a quantum leap past this: he explains things using only drawings and a vocabulary of just our 1,000 (or the ten hundred) most common words. Many of the things we use every day - like our food-heating radio boxes ('microwaves'), our very tall roads ('bridges'), and our computer rooms ('datacentres') - are strange to us. So are the other worlds around our sun (the solar system), the big flat rocks we live on (tectonic plates), and

even the stuff inside us (cells). Where do these things come from? How do they work? What do they look like if you open them up? And what would happen if we heated them up, cooled them down, pointed them in a different direction, or pressed this button? In Thing Explainer, Munroe gives us the answers to these questions and many, many more. Funny, interesting, and always understandable, this book is for anyone -- age 5 to 105 -- who has ever wondered how things

work, and why.

**Radio Times**

The classic book on the development of human language by the world's leading expert on language and the mind. In this classic, the world's expert on language and mind lucidly explains everything you always wanted to know about language: how it works,

how children learn it, how it changes, how the brain computes it, and how it evolved. With deft use of examples of humor and wordplay, Steven Pinker weaves our vast knowledge of language into a compelling story: language is a human instinct, wired into our brains by evolution. The

Language Instinct received the William James Book Prize from the American Psychological Association and the Public Interest Award from the Linguistics Society of America. This edition includes an update on advances in the science of language since The Language Instinct was first published.
