Remodelista: The Organized Home HarperCollins

A comprehensive guide to small-space secrets and real-life solutions for living in 1,200 square feet or less. The Little Book of Living Small shows readers how to make the most of limited square footage—with grace and style—and serves as the cheerleader readers need to help themselves feel satisfied and proud of their choice to live with less. In addition to exploring both the motivation behind choosing to live in a small space, as well as the practical, everyday advice for managing a tight footprint, The Little Book of Living Small also includes case studies: 12 style-savvy, small-space dwellers open their doors and share their design secrets. Author Laura Fenton covers a range of homes including studio apartments, one- and two-bedroom houses, a tiny house, a co-living space, and even whole houses. Stylistically these homes range from urban, rural, minimalist, and country, with the unifying thread that they are all real homes of less than 1,200 square feet that offer clever solutions that readers can use in their own homes. Laura Fenton is the lifestyle director at Parents magazine. With more than fifteen years of experience, her work has appeared in major publications including Better Homes & Gardens, Country Living, Good Housekeeping, and on leading home websites including Remodelista.com, HGTV.com, ElleDecor.com, HouseBeautiful.com, Refinery29, and elsewhere. Through her writing she has explored the topic of living small for more than a decade. She lives small with her husband, a photographer, and their son in Jackson Heights, Queens, in New York.

This book provides guidelines for the design process based upon actual tenant behaviors and uses of space in housing for older people. It sets forth new or neglected issues which should concern program planners, housing developers and designers with regard to the impact and future marketability of these special-purpose settings. A product of a five-year HEW study which won the 1979 Progressive Architecture Award Competition in architectural research, this book contains the behavioral evidence on which alternative design solutions ought to be decided. Designing for Aging describes and interprets the responses of a large national sample of residents living in apartment buildings across the United States which conform to Federal Minimum Property Standards. In addition, an in-depth analysis of carefully selected specific spaces and their use by tenants was conducted in Cambridge, Massachusetts sites. Hundreds of hours of research time were spent in on-site observations and interviews with older inhabitants of government-subsidized housing. The techniques used to collect and analyze data are made explicit throughout the book for the benefit of professional readers and also in an attempt to demystify the research process and to open it to critical review. Howell notes, "the most important point that this material should convey is that older people need variations in the space in which they live." She argues that this necessitates not so much additional square footage as more careful spatial definition on the part of designers. Contents: Introduction; Housing and the Stages of Life; The Bases for Standardization of Built Environments; Studying Effects of Standardized Housing on Behavior; Case Studies of Elderly Housing; Guidelines for Programming and Design Review; Social Uses of Space; Private Space and Personal Identity; Age and Habitability; Index.
