The I Ching, or "Book of Change," is considered the oldest of the Chinese classics and has throughout history commanded unsurpassed prestige and popularity. Containing several layers of text and given numerous levels of interpretation, it has captured continuous attention for well over two thousand years. It has been considered a book of fundamental principles by philosophers, politicians, mystics, alchemists, yogins, diviners, sorcerers, and more recently by scientists and mathematicians. This first part of the present volume is the text of the I Ching proper—the sixty-four hexagrams plus sayings on the hexagrams and their lines—with the commentary composed by Liu I-ming, a Taoist adept, in 1796. The second part is Liu I-ming's commentary on the two sections added to the I Ching by earlier commentators, believed to be members of the original Confucian school; these two sections are known as the Overall Images and the Mixed Hexagrams. In total, the book illuminates the Taoist inner teachings as practiced in the School of Complete Reality. Well versed in Buddhism and Confucianism as well as Taoism, Liu I-ming intended his work to be read as a guide to comprehensive self-realization while living an ordinary life in the world. In his attempt to lift the veil of mystery from the esoteric language of the I Ching, he employs the terminology of psychology, sociology, history, myth, and religion. This commentary on the I Ching stands as a major contribution to the elucidation of Chinese spiritual genius.

The Tao of Management adapts the teaching of Taoism to the world of the modern manager. It will enable managers to see how things happen in their work environment and to understand how work energies flow or become blocked. It presents a time-tested framework within which to improve awareness, understanding and skills. Improved results at work, at home, and at play invariably follow. The Tao enables the manager to tap his inner resources on the way to real success, human accomplishment and satisfaction.

The I Ching, usually translated as Book of Changes, is an ancient Chinese divination text and among the oldest of the Chinese classics. Originally a divination manual in the Western Zhou period (1000–750 BC), over the course of the Warring States period and early imperial period (500–200 BC) it was transformed into a cosmological text with a series of philosophical commentaries known as the "Ten Wings". The I Ching is used in a type of divination called cleromancy, which uses apparently random numbers. Six numbers between 6 and 9 are turned into a hexagram, which can then be looked up in the text, in which hexagrams are arranged in an order known as the King Wen sequence. The interpretation of the readings found in the I Ching is a matter which has been endlessly discussed and debated over in the centuries following its compilation, and many commentators have used the book symbolically, often to provide guidance for moral decision making as informed by Confucianism, Taoism and Buddhism.

 Loveting! è la mappa dei bisogni umani nata dall'analisi di 127 archetipi dell'inconscio collettivo. Rivoluziona scopi e strategie del marketing alla luce dei bisogni dei nostri clienti ma, prima ancora, dei nostri bisogni personali di professionisti ed esseri umani. Una nuova geografia interiore dell'advertising, marketing e branding che scopre il paradigma del Marketing Transpersonale, dove i confini dell'identità individuale si allargano fino a comprendere gli altri, le comunità, il mondo, guidandoci verso obiettivi sempre più ampi e comunitari. Loveting! è un percorso interiore formato da 64 archetipi-base - spettro dei bisogni umani e gamma espressiva della capacità di amare - che vengono costellati in ulteriori 63 archetipi-bisogni, aggregati interiori sempre più ampi e profondi, dai quali affiora il più grande e importante, ma scarsamente riconosciuto e quindi ancora insoddisfatto: l'unione con gli altri. Creare, prima dentro di noi e poi dentro e fuori l'azienda, comunità prospere, giuste e felici emerge come guida per una costruttiva azione aziendale. Loveting! è il risultato cui si giunge affrontando marketing e management partendo dagli archetipi dell'inconscio collettivo descritti da Jung, Hillman, Zolla, Neumann e dalle grandi e antiche tradizioni archetipiche mondiali, dal pensiero taoista, zen, cristiano, confuciano (attualizzato da freschi riferimenti contemporanei ispirati dalla narrativa, da poesia, saggistica, musica, cinema), dai quali scaturiscono le immagini archetipiche più diffuse e condivise dei nostri giorni.

Information Security Management Handbook, Volume 3 Gruppo 24 Ore

This book describes how a deeper knowledge and understanding of cultural differences represents a meaningful and useful tool for management of companies, and in particular SMEs, in the People's Republic of China. After introductory chapters on the internationalization of SMEs and the role played by management in this process, the authors explore the implications of academic discourses on culture and its dimensions for company management. The influence of Chinese cultural roots and the country's current cultural environment on management is then examined, with provision of guidance on response to the identified challenges. A key feature of the book is the presentation of important recent fieldwork in the main economic regions of China. This research further clarifies how business culture and cultural differences impact on company activities in China and casts light on various aspects of the adaptive capability of SMEs within the country, highlighting the value of cultural awareness and intelligence. The book will be of interest to academics and practitioners alike.

This book provides a multidisciplinary approach to Corporate Social Responsibility. While for decades a purely mathematical-technical orientation dominated the business curriculum, this book presents CSR and sustainability as a business concept embedded in its cultural and spiritual context. It initially approaches practical wisdom from different cultural and religious traditions as a source of spiritual capital for sustainable business practices. Subsequently, it links current CSR concepts and the latest thinking in CSR with long-standing cultural and spiritual knowledge, promoting a more comprehensive view on sustainability management and its implementation at business enterprises. The book collects and unites viewpoints from various cultural and religious contexts, offering a comprehensive guide for international and globally active companies.

Composed in 2 B.C., as "The I Ching revised and enlarged," The Elemental Changes is a divination manual providing a clear method for distinguishing alternative courses of action. Structured in 81 tetragrams (as opposed to the 64 hexagrams of the I Ching), the book offers much to the modern reader. Today in the West, The Elemental Changes is an essential tool for understanding the Tao as it operates in the Cosmos, in the minds of sages, and in sacred texts. It is also one of the great philosophical poems in world literature, assessing the rival claims on human attention of fame, physical immortality, wealth, and power while it situates human endeavor within the larger framework of cosmic energies. The complete text of The Elemental Changes and its ten autocommentaries are here translated into accessible and, whenever possible, literal English.

Following the Chinese tradition, supplementary comments are appended to each tetragram in order to indicate the main lines of interpretation suggested by earlier commentators.
