YAZMIN DOWNS

Predicting Earthquakes Charlesbridge Publishing

From the root chakra to the crown chakra, Mind Body Baby: Chakras is a board book that teaches little ones the colors of the rainbow through the energies of the body. This board book introduces the concept of chakras and color to the youngest readers. With simple text and instructive illustrations, babies will learn about each of the seven chakras, the energy centers in our bodies, and how we express this energy in our daily lives. This book also serves as a first introduction to colors! With adorable illustrated babies and a hip design, the Mind Body Baby series is the perfect way for adults and their little ones to create a healthy mind and body connection together. An Imprint Book
Engineering for Babies Crabtree Classics

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical

foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed

recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

No Voice Too Small Charlesbridge Publishing

Big, brainy science for the littlest listeners. Baby discovers the science behind Christmas lights! Accurate enough to satisfy an expert, yet simple enough for baby, this clever board book explores electricity, circuits, and electrical safety. Beautiful, visually stimulating illustrations complement age-appropriate language to encourage baby's sense of wonder. Parents and caregivers may learn a thing or two as well.

Think Like an Engineer Charlesbridge Publishing

Celebrate the silliness that comes with a big family in this playful read aloud about a big brother, a sleeping baby, and a very noisy family. Baby is finally asleep. But everyone is much too loud! Can

Mom, Daddy, Grammy, Pop Pop, Shae, Dante, Rover the dog, and even the neighbor keep quiet? Just when they think they can rest—oh no. The baby's awake. One savvy little narrator knows just the way to make his baby sister fall back asleep: by reading her a good book! A hilarious cast of characters will keep readers laughing throughout this amusing celebration of early literacy and intergenerational family relationships.

All About Mechanical Engineering Charlesbridge Publishing

"Architects design and plan for the world of tomorrow. Will less available land mean buildings will be taller to fit more people? Will new materials and energy sources help heat and cool our homes? An architect's notebook helps answer these and other questions in Futuristic Homes."--Page 4 of cover.

Building Bridges Carson-Dellosa Publishing

Big, brainy science for the littlest listeners Accurate enough to satisfy an expert, yet simple enough for baby, this book explores the basics of particle physics and chemistry - quarks, protons, neutrons, atoms and molecules - and ties it all to baby's world. Beautiful, visually stimulating illustrations complement age-appropriate language to encourage baby's sense of wonder. Parents and caregivers may learn a thing or two, as well. With tongue firmly in cheek, the Baby Loves Science series introduces highly intellectual science concepts to the littlest learners.

Ten Beautiful Things National Geographic Books

Gives readers a behind-the-scenes look at the building of the Transcontinental Railroad. Additional features include a table of contents, a Fast Facts spread, critical-thinking questions, primary source quotes and accompanying source notes, a phonetic glossary, an index, and sources for further research.

Transforming the Workforce for Children Birth Through Age 8
Charlesbridge Publishing

Big, brainy science for the littlest listeners. Accurate enough to satisfy an expert, yet simple enough for baby, this clever board book showcases the use of logic, sequence, and patterns to solve problems. Can Baby think like a coder to fix her train? Beautiful, visually stimulating illustrations complement age-appropriate language to encourage baby's sense of wonder. Parents and caregivers may learn a thing or two, as well! Author's Note: The goal of the Baby Loves Science books is to introduce STEM topics in a developmentally appropriate way. As a precursor to learning programming languages and syntax, Baby Loves Coding presents the concepts of sequencing, problem solving, cause and effect, and thinking step-by-step. Practicing these skills early creates a solid foundation for reading, writing, math and eventually, programming.

Baby Loves Political Science: Democracy! North Star Editions, Inc.

Give your child a head start by building a STEM foundation with fifty everyday, play-based activities for infants and toddlers
Baby Loves Gravity! Charlesbridge Publishing

A new addition to the beloved and bestselling Baby Loves series! This cute and clever introduction to political science is accurate and simple enough for baby, and ready to teach Baby what makes a great democracy. Baby learns what it means to participate in a democracy where everyone has a voice in electing our leaders. There are many ways for all of us, including the youngest children, to participate--such as making signs and sending postcards, campaigning, attending rallies, and of course

getting out the vote!

Baby Loves Electrical Engineering on Christmas! Carson-Dellosa Publishing

Big, brainy science for the littlest listeners. Accurate enough to satisfy an expert, yet simple enough for baby, this clever board book engages readers in a game of hide-and-seek with Schrodinger's famous feline. Can cat be awake and asleep at the same time? Beautiful, visually stimulating illustrations complement age-appropriate language to encourage baby's sense of wonder. Parents and caregivers may learn a thing or two, as well! With tongue firmly in cheek, the Baby Loves Science series introduces highly intellectual science concepts to the littlest learners.

Futuristic Homes Baby 101

Babies who love science can be anything! Move over Wonder Woman and Superman--here come Aerospace Engineer and Particle Physicist! Baby loves to explore the world of science! What's next for Baby after learning about physics, engineering, computers, and the natural world? Becoming a scientist of course! In this fun look at several scientific careers, parents and children can talk about different science fields and the everyday heroes that work in them. Beautiful, visually stimulating illustrations complement age-appropriate language to encourage baby's sense of wonder. Parents and caregivers may learn a thing or two as well.

Baby Loves Quarks! Momentum

From video games and sports equipment, to cars and cleaning products, many of the things we use everyday were designed by engineers. This exciting title incorporates child-centered

examples and engaging text to capture the readers' attention as they explore the connections between engineering, science, and technology, and discover how engineering impacts our day-to-day lives. Teacher's guide available.

Baby Loves Scientists National Academies Press

Aspiring astronomers and space explorers can engage in more than 20 activities in this volume, ranging from building a simple model to illustrate the vast scope of our solar system to a demonstration of the speed of light. Full color.

Baby Loves Scientists Charlesbridge Publishing

Big, brainy science for the littlest listeners. Accurate enough to satisfy an expert, yet simple enough for baby, this clever board book explores the basics of building--from foundation to rooftop--and ties it all to baby's world. Beautiful, visually stimulating illustrations complement age-appropriate language to encourage baby's sense of wonder. Parents and caregivers may learn a thing or two, as well!

Reading Picture Books with Children Charlesbridge Publishing

A heartfelt story of changing perspectives, set in the Midwest. *Ten Beautiful Things* gently explores loss, a new home, and finding beauty wherever you are. Lily and her grandmother search for ten beautiful things as they take a long car ride to Iowa and Lily's new home with Gran. At first, Lily sees nothing beautiful in the April slush and cloudy sky. Soon though, Lily can see beauty in unexpected places, from the smell of spring mud to a cloud shaped like a swan to a dilapidated barn. A furious rainstorm mirrors Lily's anxiety, but as it clears Lily discovers the tenth beautiful thing: Lily and Gran and their love for each other. *Ten Beautiful Things* leaves the exact cause of Lily's move

ambiguous, making it perfect for anyone helping a child navigate change, whether it be the loss of a parent, entering or leaving a foster home, or moving.

Future Engineer Young Architect

Engineers are the reason we have everything from thumbtacks to rocket ships. But what do engineers think about? Where do they get their amazing ideas? Discover the ways engineers solve problems, learn about some engineering feats, and find out whether you may also think like an engineer.

Baby Loves Quarks! Charlesbridge Publishing

Decades of research have demonstrated that the parent-child dyad and the environment of the family--"which includes all primary caregivers"--are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and

services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. *Parenting Matters* identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Baby Loves Structural Engineering! /cRuth Spiro ;

Illustrated by Irene Chan Charlesbridge Publishing

In Great Wall of China, readers will explore the use of super

structures around the world and how they have shaped future technological advancements. This title is the perfect blend of historical content and STEM engagement, and makes a great addition to library collections at home or at school. The *Engineering Wonders* series takes readers on a historical journey and focuses on the construction of amazing man-made structures and their effects on society. Each 48-page title features full-color photographs, fascinating sidebars, a timeline, a glossary, a list of websites, and comprehension and extension questions. This series engages learners while also reinforcing concepts and helping them strengthen their reading comprehension skills

Parenting Matters National Academies Press

Big, brainy science for the littlest listeners. On Saint Patrick's Day, Baby learns why plants like clovers are green: photosynthesis! Accurate enough to satisfy an expert, yet simple enough for Baby, this clever board book explores the science of photosynthesis, leaf anatomy, and traditions surrounding St. Patrick's Day. Beautiful, visually stimulating illustrations complement age-appropriate language to encourage Baby's sense of wonder. Parents and caregivers may learn a thing or two as well.
