Anthony has two dollars and three quarters and one dime and seven nickels and eighteen pennies. Nicholas has one dollar and two quarters and five dimes and five nickels and thirteen pennies. Alexander has...bus tokens. And even when he's rich, pretty soon all he has is bus tokens. He was rich. Last Sunday. Grandma Betty and Grandpa Louie came and gave Anthony and Nicholas and Alexander each a dollar. Alexander was saving his. Maybe for a walkie-talkie. And then there was bubble gum, some bets with Anthony and Nicholas (that Alexander lost), a snake rental, a garage sale, and all kinds of other things to spend money on. And now all he has is bus tokens. When he used to be rich last Sunday.

"Our calling is to drop our egos, commit to removing barriers, and treat our learners with the unequivocal respect and dignity they deserve." --Mirko Chardin and Katie Novak When it comes to the hard work of

reconstructing our schools into places where every student has the opportunity to succeed, Mirko Chardin and Katie Novak are absolutely convinced that teachers should serve as our primary architects. And by "teachers" they mean legions of teachers working in close collaboration. After all, it's teachers who design students' learning experiences, who build student relationships . . . who ultimately have the power to change the trajectory of our students' lives. *Equity by Design* is intended to serve as a blueprint for teachers to alter the all-too-predictable outcomes for our historically under-served students. A first of its kind resource, the book makes the critical link between social justice and Universal Design for Learning (UDL) so that we can equip students (and teachers, too) with the will, skill, and collective capacity to enact positive change. Inside you'll find: Concrete strategies for designing and delivering a culturally responsive, sustainable, and equitable framework for all students Rich examples, case studies, and implementation spotlights of educators, students (including Parkland survivors), and programs that have embraced a social

justice imperative Evidence-based application of best practices for UDL to create more inclusive and equitable classrooms A flexible format to facilitate use with individual teachers, teacher teams, and as the basis for whole-school implementation "Every student," Mirko and Katie insist, "deserves the opportunity to be successful regardless of their zip code, the color of their skin, the language they speak, their sexual and/or gender identity, and whether or not they have a disability." Consider Equity by Design a critical first step forward in providing that all-important opportunity. How appropriate for today and for the future are the policies and practices of higher education that largely assume a norm of traditional-age students with minimal on-campus, or no, work commitments? Despite the fact that work is a fundamental part of life for nearly half of all undergraduate students – with a substantial number of “traditional” dependent undergraduates in employment, and working independent undergraduates averaging 34.5 hours per week – little attention has been given to how working influences the integration and engagement experiences of students who work, especially those who work full-time, or how the benefits and costs of

working differ between traditional age-students and adult students. The high, and increasing, prevalence and intensity of working among both dependent and independent students raises a number of important questions for public policymakers, college administrators, faculty, academic advisors, student services and financial aid staff, and institutional and educational researchers, including: Why do so many college students work so many hours? What are the characteristics of undergraduates who work? What are the implications of working for students’ educational experiences and outcomes? And, how can public and institutional policymakers promote the educational success of undergraduate students who work? This book offers the most complete and comprehensive conceptualization of the “working college student” available. It provides a multi-faceted picture of the characteristics, experiences, and challenges of working college students and a more complete understanding of the heterogeneity underlying the label “undergraduates who work” and the implications of working for undergraduate

students' educational experiences and outcomes. The volume stresses the importance of recognizing the value and contribution of adult learners to higher education, and takes issue with the appropriateness of the term "non-traditional" itself, both because of the prevalence of this group, and because it allows higher education institutions to avoid considering changes that will meet the needs of this population, including changes in course offerings, course scheduling, financial aid, and pedagogy.

Welcome to the Consumer Financial Protection Bureau's Your Money, Your Goals: A financial empowerment toolkit for social services programs! If you're reading this, you are probably a case manager, or you work with case managers. Finances affect nearly every aspect of life in the United States. But many people feel overwhelmed by their financial situations, and they don't know where to go for help. As a case manager, you're in a unique position to provide that help. Clients already know you and trust you, and in

many cases, they're already sharing financial and other personal information with you. The financial stresses your clients face may interfere with their progress toward other goals, and providing financial empowerment information and tools is a natural extension of what you are already doing. What is "financial empowerment" and how is it different from financial education or financial literacy? Financial education is a strategy that provides people with financial knowledge, skills, and resources so they can get, manage, and use their money to achieve their goals. Financial education is about building an individual's knowledge, skills, and capacity to use resources and tools, including financial products and services. Financial education leads to financial literacy. Financial empowerment includes financial education and financial literacy, but it is focused both on building the ability of individuals to manage money and use financial services and on providing access to products that work for them. Financially empowered individuals are informed and skilled; they know where to get help with their financial challenges.

This sense of empowerment can build confidence that they can effectively use their financial knowledge, skills, and resources to reach their goals. We designed this toolkit to help you help your clients become financially empowered consumers. This financial empowerment toolkit is different from a financial education curriculum. With a curriculum, you are generally expected to work through most or all of the material in the order presented to achieve a specific set of objectives. This toolkit is a collection of important financial empowerment information and tools you can access as needed based on the client's goals. In other words, the aim is not to cover all of the information and tools in the toolkit - it is to identify and use the information and tools that are best suited to help your clients reach their goals.
