*** A BBC2 BETWEEN THE COVERS BOOK CLUB PICK *** BBC RADIO 4 BOOK AT BEDTIME *** 'A fascinating, beautiful, heartwarming novel. It kept me gripped from the very first chapter' -- BETH O'LEARY In Second World War Bath, young, naïve wireless engineer Will meets Austrian refugee Elsa Klein: she is sophisticated, witty and worldly, and at last his life seems to make sense . . . until, soon after, the newly married couple's

home is bombed, and Will awakes from the wreckage to find himself alone. No one has heard of Elsa Klein. They say he was never married. Seventy years later, social worker Laura is battling her way out of depression and off medication. Her new case is a strange, isolated old man whose house hasn't changed since the war. A man who insists his wife vanished many, many years before. Everyone thinks he's suffering dementia. But Laura begins to suspect otherwise . . . From Keith Stuart, author of the much-loved Richard & Judy bestseller *A Boy Made of Blocks*, comes a stunning, emotional novel about an impossible mystery and a true love that refuses to die. 'Enthralling, a real thing of beauty. Dazzling' -- JOSIE SILVER 'The

Frequency of Us is a novel with a bit of everything: a sweeping love story, wonderfully complex characters, and a sprinkling of the supernatural. I loved it, and know it'll stay with me for some time' -- CLARE POOLEY 'A complete joy! An intelligent, intricate and emotive mystery' -- LOUISE JENSON

PIANO, THE - WITH PACK CD (STAGE 2)
John Wiley & Sons

This book explores the power dimensions of participatory development and research, and examines what shifts in power within communities and institutions are needed for participatory ideas to be effective.

Searching for Faith (Crime Thriller) Oxford University Press

This book is intended for Prizes won etc.
The Frequency of Us Oxford University Press

The aim of this volume is to explain the differences between research-level mathematics and the maths taught at school. Most differences are philosophical and the first few chapters are about general aspects of mathematical thought.

Quantum Space Open Road Media

Since its publication in 1984, *The Mysteries of Harris Burdick* has stimulated the minds of readers of all ages and backgrounds. Now the original fourteen drawings are available in a large portfolio edition of loose sheets. In addition, a newly discovered fifteenth drawing, titled *The Youngest Magician*, has been added, as well as an updated introduction by the author. The puzzles of these mysterious drawings will be even more provocative because of the larger size and the exceptional printing quality. For the first time, the drawings can be shared with groups or displayed singly. *The Mysteries of Harris Burdick* was a New York Times Best Illustrated Book of 1984.

The Star Zoo Oxford Paperbacks
 Written by one of the world's leading

neuroscientists, *Making Up the Mind* is the first accessible account of experimental studies showing how the brain creates our mental world. Uses evidence from brain imaging, psychological experiments and studies of patients to explore the relationship between the mind and the brain. Demonstrates that our knowledge of both the mental and physical comes to us through models created by our brain. Shows how the brain makes communication of ideas from one mind to another possible.

A List of the Early Settlers of Georgia

Ballantine Books

Introducing physics in the language of mathematics and providing revision of the mathematical techniques and physical concepts, this text also features instructive questions with full solutions and is intended for students starting, or preparing for, the study of physical science or engineering at university.

The Trial Routledge

A level 3 Oxford Bookworms Library graded readers. Written for Learners of English by Harry Gilbert. In our world today a hummingbird is a small, brilliantly coloured bird that lives in the tall trees of

tropical forests. In the far distant future, Hummingbird (Hummy for short) is a girl of sixteen who lives somewhere in the Galaxy, on a planet called Just Like Home. She has the name 'Hummingbird' in big letters on all her clothes, but she has never seen a real hummingbird. She has never seen any living animal or bird at all. *The Book of Remembering* says that there were once many animals on a planet called Earth, but that was before the Burning, a long, long time ago . . .

Paragon Walk Oxford University Press

A level 2 Oxford Bookworms Library graded reader. Written for Learners of English by Rosemary Border. One day, a farmer tells a farm boy to take everything out of an old building and throw it away. 'It's all rubbish,' he says. In the middle of all the rubbish, the boy finds a beautiful old piano. He has never played before, but now, when his fingers touch the piano, he begins to play. He closes his eyes and the music comes to him - and the music moves his fingers. When he opens his eyes again, he knows that his life is changed for ever . . .

The House by the Sea Oxford University Press, USA

A married couple, Carl and Linda Anderson, buy a house by the sea to spend their weekends. But one weekend Linda does not arrive at the house and Carl begins to worry. What has happened to her? Who is the taxi driver that follows Carl? And how much do the people in the village really know?

Reducing Underage Drinking Open Road Media

A level 3 Oxford Bookworms Library graded readers. Written for Learners of English by Tim Vicary. London: November. Terrorists blow up the Queen's coach outside Parliament. The Queen escapes, but five people are killed, and forty others badly hurt – ordinary, innocent people, like Alan Cole, the Queen's coachman, who loses his leg in the bombing. And for Alan and his daughter Jane there is more terror to come, in the search for the truth behind the bombing. Will the terrorists be caught and brought to justice? But what kind of justice? What can give Alan Cole his leg back, or give life back to people who have been blown to pieces by a bomb?

Gulliver's Travels Oxford University Press
A mother's worst nightmare - can her son be guilty of murder? Sarah Newby, who

left school at 15, and was living as a teenage single parent on an inner-city estate, has worked her way up to begin a career as a criminal barrister. But what should she do when her own son, Simon, is arrested and charged with a series of brutal rapes and murders? Has Sarah, in her single-minded determination to create a career for herself, neglected her son so much that she no longer knows him? He has often lied to her in the past, so how can she trust him when he says he is innocent this time? And what should she do when she herself uncovers evidence that seems to suggest his guilt?

Parish Priests and Their People in the Middle Ages in England Oxford University Press

Alcohol use by young people is extremely dangerous - both to themselves and society at large. Underage alcohol use is associated with traffic fatalities, violence, unsafe sex, suicide, educational failure, and other problem behaviors that diminish the prospects of future success, as well as health risks " and the earlier teens start drinking, the greater the danger. Despite these serious concerns, the media continues to make drinking look attractive

to youth, and it remains possible and even easy for teenagers to get access to alcohol. Why is this dangerous behavior so pervasive? What can be done to prevent it? What will work and who is responsible for making sure it happens? *Reducing Underage Drinking* addresses these questions and proposes a new way to combat underage alcohol use. It explores the ways in which may different individuals and groups contribute to the problem and how they can be enlisted to prevent it. *Reducing Underage Drinking* will serve as both a game plan and a call to arms for anyone with an investment in youth health and safety.

The Mysteries of Harris Burdick Oxford University Press, USA

This book takes a problem-based approach to explore the dilemmas that arise when the law and social work ethics conflict. It highlights what the law says, what ethical principles are at stake, and what these imply for policy and practice, helping students to develop an understanding of the issues involved.

Skyjack! Oxford University Press, USA
Discover the Dr Ruth Galloway Mysteries, one of the most popular crime series in

Britain, with this beautiful special edition. START THE JOURNEY HERE AND YOU WILL BE HOOKED Dr Ruth Galloway is called in when a child's bones are discovered near the site of a prehistoric henge on the north Norfolk salt marshes. Are they the remains of a local girl who disappeared ten years earlier - or are the bones much older? DCI Harry Nelson refuses to give up the hunt for the missing girl. Since she vanished, someone has been sending him bizarre anonymous notes about ritual sacrifice, quoting Shakespeare and the Bible. He knows that Ruth's expertise and experience could help him finally to put this case to rest. But when a second child goes missing, Ruth finds herself in danger from a killer who knows she's getting ever closer to the truth...

[The Crossing Places](#) National Geographic Books

Terttu Nevalainen helps students to place the language of the period 1500-1700 in its historical context, whilst showing its regional and social variations. He focuses on the structure of the 'general dialect' and its spelling, vocabulary, grammar and pronunciation, as well as its dialectal origins.

Making up the Mind Sphere

Surveys the online social habits of American teens and analyzes the role technology and social media plays in their lives, examining common misconceptions about such topics as identity, privacy, danger, and bullying.

Resurrection Row University of Georgia Press

Today we are blessed with two extraordinarily successful theories of physics. The first is Albert Einstein's general theory of relativity, which describes the large-scale behaviour of matter in a curved spacetime. This theory is the basis for the standard model of big bang cosmology. The discovery of gravitational waves at the LIGO observatory in the US (and then Virgo, in Italy) is only the most recent of this theory's many triumphs. The second is quantum mechanics. This theory describes the properties and behaviour of matter and radiation at their smallest scales. It is the basis for the standard model of particle physics, which builds up all the visible constituents of the universe out of collections of quarks, electrons and force-carrying particles such as photons. The

discovery of the Higgs boson at CERN in Geneva is only the most recent of this theory's many triumphs. But, while they are both highly successful, these two structures leave a lot of important questions unanswered. They are also based on two different interpretations of space and time, and are therefore fundamentally incompatible. We have two descriptions but, as far as we know, we've only ever had one universe. What we need is a quantum theory of gravity.

Approaches to formulating such a theory have primarily followed two paths. One leads to String Theory, which has for long been fashionable, and about which much has been written. But String Theory has become mired in problems. In this book, Jim Baggott describes "": an approach which takes relativity as its starting point, and leads to a structure called Loop Quantum Gravity. Baggott tells the story through the careers and pioneering work of two of the theory's most prominent contributors, Lee Smolin and Carlo Rovelli. Combining clear discussions of both quantum theory and general relativity, this book offers one of the first efforts to explain the new quantum theory of space

and time.
