Leadership in Organizations, Global Edition Cengage Learning
Leadership in Dangerous Situations provides in-depth coverage of the key psychological, social and organization factors that impact individual and organizational effectiveness for First Responders in dangerous environments. Leading scholars discuss how current theories and empirical research provides guidelines to help solve the challenges leaders are likely to face in dangerous contexts. This book is directed to First Responders leaders from the Military, Law Enforcement, Fire, Emergency Services and Not-for profit agencies working in dangerous areas. The purpose of this book is to assist the First Responders who risk their lives to serve the public, to prepare for the unique challenges of leading and operating in dangerous situations. Dangerous situations are environments where group members must routinely engage in events that place their physical and psychological well-being at risk to accomplish the organization's objectives. International scholars and practitioners from the military, law enforcement, fire and rescue, teamed together to address the unique challenges facing dangerous context leaders. Each chapter integrates theory and research with practical experience to address the various challenges these leaders will face while operating in dangerous situations. The intent is to provide practitioners an easily understandable guide, backed by scholarly findings, to prepare themselves and their organizations for the unique psychological, social, and physical challenges of leading and operating in dangerous contexts. The blending of theory and empirical

research with practical experience clearly illustrates the principles of effective leadership in dangerous contexts Whether one is a young leader preparing for war, a seasoned commander with multiple combat tours, a Special Weapons and Tactics (SWAT) team leader, Emergency Medical Technician (EMT) supervisor, first line supervisor of a law enforcement patrol unit, or a lieutenant responsible for a shift of firemen, the challenges of leading people in contexts where life and death decisions are common are very similar. The purpose here is to provide the leader with a better understanding of what is required to lead in dangerous contexts. The contributing authors delve into the psychological, social, and physical factors that can impact the ability to lead, the ability of personnel to perform, and the organization's ability to accomplish the mission. In the end, the leader will take away not only a understanding of how leading in dangerous contexts is different than leading in contexts where lives are not on the line, but also gain a deeper understanding of why it differs, where commonalities occur, and – perhaps more importantly – how to prepare leaders, whether military or civilian to guide their first responder organizations to perform successfully in dangerous situations.

Leading Change in Multiple Contexts Xlibris Corporation
Are leaders morally special? Is there something ethically distinctive about the relationship between leaders and followers? Should leaders do whatever it takes to achieve group goals? *Leadership Ethics* uses moral theory, as well as empirical research in psychology, to evaluate the reasons everyday leaders give to justify breaking the rules. Written for people without a background in philosophy, it introduces readers to the moral theories that are relevant to leadership ethics: relativism, amoralism, egoism, virtue ethics, social contract theory, situation ethics, communitarianism, and cosmopolitan theories such as utilitarianism and transformational leadership. Unlike many introductory texts, the book does more than simply acquaint readers with different approaches to leadership ethics. It defends the Kantian view that everyday leaders are not justified in breaking the moral rules.

Dynamic Leadership Models for Global Business: Enhancing Digitally Connected Environments Partridge Publishing

Designed specifically to develop students' understanding of leadership in a variety of contexts, and assuming no prior experience of leadership in the business world, this book is a must-read for students embarking on their study of leadership, while thinking ahead to their own future employment. The book is divided into two clear parts to logically guide the reader through the key theoretical models of leadership, as well as the issues and themes that surround the subject. Part 1 examines the main theories in the field, including situational and contingency theories, behavioural models, and trait theory, while Part 2 draws on a number of different themes to add depth to the theoretical ideas discussed, such as diversity, power, and ethics. To help to interpret the key theories, the book also illustrates leadership in action using a wealth of diverse case studies, 50% of which are new for this third edition. Examples have been carefully selected to highlight the practical application of leadership theory, both in a formal business context and in everyday life, and to dispel the common misconception for students new to leadership that it is only for the 'great and good'. A broad variety of case studies are included from the world of politics, entertainment, food and sport; these include Boris Johnson, the Spice Girls, Cadbury, and Lance Armstrong. These case studies explore leadership across a variety of contexts and cultures, giving students the broad perspective they need to consider the subject critically. Pause for thought boxes and self-test questionnaires encourage students to reflect on the theories and practices they've learned about and how such concepts and issues might apply in their own approach to leadership. Together with the lively writing style, stimulating case studies, and further learning features, this allows students to fully engage with the subject and use the book as an essential tool in

their leadership studies. New to this edition Added coverage on technological developments (such as virtual treams, AI, Big Data, VR/AR) and the impact on leadership practice. Revised case studies include contemporary figures and events such as PewDiePie, Jacinda Arden, the Spice Girls and Boris Johnson. The content is now further balanced to reflect both 'good' and 'bad' leadership styles, with new coverage on the negative or 'dark side' of leadership included in chapters 2, 6 and 11. A new online test bank resource increases the variety of ways in which lecturers can assess student knowledge. This title is available as an eBook.
