Summary Updated with new code, new projects, and new chapters, Machine Learning with TensorFlow, Second Edition gives readers a solid foundation in machine-learning concepts and the TensorFlow library. Written by NASA JPL Deputy CTO and Principal Data Scientist Chris Mattmann, all examples are

accompanied by downloadable Jupyter Notebooks for a hands-on experience coding TensorFlow with Python. New and revised content expands coverage of core machine learning algorithms, and advancements in neural networks such as VGG-Face facial identification classifiers and deep speech classifiers. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. About the technology Supercharge your data analysis with machine learning! ML algorithms automatically improve as they process data, so results get better over time. You don't have to be a mathematician to use ML: Tools like Google's TensorFlow library help with complex calculations so you can focus on

getting the answers you need. About the book Machine Learning with TensorFlow, Second Edition is a fully revised guide to building machine learning models using Python and TensorFlow. You'll apply core ML concepts to real-world challenges, such as sentiment analysis, text classification, and image recognition. Hands-on examples illustrate neural network techniques for deep speech processing, facial identification, and auto-encoding with CIFAR-10. What's inside Machine Learning with TensorFlow Choosing the best ML approaches Visualizing algorithms with TensorBoard Sharing results with collaborators Running models in Docker About the reader Requires intermediate Python skills and knowledge of general algebraic concepts like vectors and

matrices. Examples use the super-stable 1.15.x branch of TensorFlow and TensorFlow 2.x. About the author Chris Mattmann is the Division Manager of the Artificial Intelligence, Analytics, and Innovation Organization at NASA Jet Propulsion Lab. What Every Horse Should Know Trafalgar Square Books Briggens House, near Harlow in Essex, was one of the most important of the establishments requisitioned by the Special Operations Executive (SOE) during the Second World War. Its mission was to accomplish Winston Churchill's directive to 'set Europe ablaze', and, initially, the house was used as a finishing school for the Cichociemni, elite Polish saboteurs, to prepare to parachute into Nazi-occupied Poland. In need of false identity documents to avoid the arrest, interrogation and execution of its agents, SOE gradually built up a printing department on site and Station 14 became the organisation's False Document Section. This is the true story of the house and its highly skilled wartime personnel, including British officers, Polish agents and

the women of the First Aid Nursing Yeomanry. For the resident staff it was a relatively safe posting, but tension built as the Poles, fighting their own battle for Polish independence, competed for scarce resources in wartime Britain. SOE historian Des Turner uses first-hand accounts, memoirs and official records to reveal long-forgotten stories of tragedy, humour and frustration, giving long-overdue credit to the men and women of Briggens House who were prevented by the Secrets Act from ever speaking about their wartime work.

The Dressage Horse Manifesto

Nevzorov Haute Ecole

Those who work with and train horses on a regular basis are likely constantly searching for new ways to make inroads and find answers when faced with tough training or behavior problems. Grand Prix dressage rider and performer Yvonne Barteau has trained her share of horses over the years—from off-track racing Thoroughbreds, to Arabians, to Friesians, to Warmbloods—and she asserts that everything that needs to be known about effectively training a horse is already known...by any horse. “Each horse,” says

Barteau, “will know and respect the person who figures out how to train him, if that person is fair. The best trainers are not only ‘horse whisperers,’ they are listeners. And readers. They listen to what the horse has to say. They can read horse body language and behavior patterns. They are calm and they stay calm under pressure. How did they learn that? By studying horses. Over time the horses told them how to be a horse trainer and they listened.” Barteau believes that every dressage rider can learn to listen and read, and so experience greater success and partnership with his or her horse. In this book Barteau has used her knowledge and decades of experience and success in and out of the dressage ring to help put to paper what 10 different dressage horses would say to you about horse training if they could. Through the dressage horse’s mouth, from his point of view, readers learn: how simple things really are and how complicated we make them; the value of routine, consequence, and peace; the importance of leadership, fairness, and trust; the need for your sense of responsibility to match your ambition; plus, what kinds of rewards really work

and what frightens, annoys, or causes horses to disregard us altogether. If you listen properly, horses will tell you how to train them. This book is a published declaration of their needs as our athletic partners, fellow competitors, and friends.

The Ancient Lost World of Zanterian is a very complexed in existence. It is a world with 10 layers “Planes “, that coexist with each other. Paradox- The Dragon Emperor of the gods. He has intervened in the prophecy. Paradox has created ancient portals that connect the planes and other worlds for his dragons, and the magic weave. The other gods / goddess intervened in mortality to enhance their power and domain. This is forbidden by the goddess of Destiny. She had slammed her Scepter of Destiny into the ground of the world of Zanterian; Creating what is known as The Lost Ancient World of Zanterian. It is a world trapped between Planes; stuck in a time lock. The World’s Dangerous Dungeon sets deep beneath the earth in the Ancient World of Zanterian. It is an ancient prison designed by Embreal the ancient goddess of Creation. She designed it upon request for Clearalious the ancient goddess of Righteousness and Judgement. She is a Chaotic Good goddess. Her Angel- Queen Vargon imprisoned most of the evil being

and monsters in the dungeon, which most of them can’t be destroyed. The Dungeon walls, ceilings, and under-floor are made of living magical stones. These stones regenerate. It is impossible to break through, destroy, or pass through the magic. The stones are black granite with glitter throughout it. There are beings and monsters that are stone granite golems. They are one with the dungeon and will reform back into existence in 1d6 days. These golems are intelligent and they acted as one with the dungeon.

IN 2002 Australia witnessed a witch hunt the size and complexity of which had not been seen since the Lindy Chamberlain case. At its centre stood the horse Cambridge, his owners and a team of veterinarians attempting to save his life. The accusers comprised a protest group, the proprietors of a web site reputed to represent Australia's equestrian fraternity (8 million hits per month), the Bureau of Animal Welfare and the RSPCA, who claimed to have "never had such a response to one issue in its entire history". All forms of media weighed in, including newspapers, radio stations, television news and affairs programs. An on-line chat forum publicized thousands of postings with no regard for modulation. It even made parliamentary discussion. The Materiality of the Horse Trafalgar Square Books
Relationships with horses, whether for companionship or competition, are complex and ever-changing. This is one of the reasons why "horsemanship" can become a lifelong pursuit: There is always

a balance to be struck with our equine partners, and it demands continual growth and understanding on our side. In this book, horsewoman Lynn Acton explains that when the focus in the relationship is on what we want from the horse, his compliance becomes the measure of success, and what he thinks and feels is often overlooked. Is he calm, confident, and trusting? Or anxiously wishing he could escape? His behavior, performance, and reliability—in whatever discipline we prefer or equestrian sport we pursue—depend on the answers to those questions. Horses want security and social bonds. They want leaders they trust to protect them—not only from danger, but from stress. When we provide this security, they accept our rules. This not only puts us in charge, it makes our leadership more effective because we do not force it on them; they seek it. The result is less anxiety, fewer behavior problems, more efficient learning, and better reliability. Acton refers to this relationship as Protector Leadership because being the "protector" is the foundation. Building methodology based on time-tested training theories that we

are often exposed to in bits and pieces, Acton shows why Protector Leadership works and how to make it work for us, fitting the separate pieces together, and illustrating the connections with practical examples of real horses in everyday life. *Index to the Catalogue of the Library of Parliament: Part II*. _____ The bookies always win. But one man has been proving them wrong for four decades. In the summer of 1975 Barney Curley, a fearless and renowned gambler, masterminded one of the most spectacular gambles of all time with a racehorse called Yellow Sam. With a meticulous, entirely legal plan involving dozens of people, perfectly timed phone calls, sealed orders and months of preparation, Curley and Yellow Sam beat the bookmakers and cost them millions. They said that it could never happen again. But in May 2010, thirty-five years after his first coup, Curley staged the ultimate multi-million-pound-winning sequel. The Sure Thing tells the complete story of how he managed to organise the biggest gamble in racing history - and how he then followed up with yet another audacious scheme in January 2014.
