In this breakthrough student resource, two committed, tech-savvy professors, Deborah Licht and Misty Hull, combine years of research and teaching insights with the journalistic skill of science writer, Coco Ballantyne, who came to the project directly from Scientific American. Together, they have created an introductory psychology textbook and online learning and comprehension system that draws on written profiles and video interviews of 26 real people to help students better understand, remember, apply, and relate to psychology's foundational concepts and ideas. Beautifully designed, the printed text is filled with high-interest examples and features, including full-page infographics that help students understand and retain key concepts. Online, additional author-created resources, including scaffolded activities and adaptive quizzes, provide a seamless learning experience for students and a reliable assessment mechanism for instructors and programs. This innovative collaboration between Worth Publishers and Scientific American reflects a commitment to engaging and educating all students, including those who sometimes seem difficult to engage—in the contemporary style of the world's most respected science magazine. Along with student engagement with the personal stories, Presenting Psychology 2e also aims to: Demonstrate that psychology is a science Help students see the "big picture" Provide high-quality accessible visuals that make a difference! Illustrate real-world applications Maintain a positive perspective of psychology Emphasize gender and cultural diversity Help dispel myths Provide quality assessments Create interactive, technology-based learning that appeals to students

Psychology is an integral element of sport today, from the applied techniques of coaches and athletes, to the socio-psychological behaviour of sport fans. Sport and Exercise Psychology: The Key Concepts offers an introductory guide to the vocabulary of sport psychology, to its central theories and most important avenues of research, and to its application in sports performance. Modern and historical illustrations are used throughout the text, while an extensive bibliography and index ensure that the book is an indispensable research tool for any student of sport psychology.

[Exploring Psychology, Sixth Edition, in Modules Study Guide](#) Macmillan

"This syllabus is an endeavor to practice what educational psychology preaches. It applies in the educational psychology course the principle that material should be learned in the form in which it is to be used. It abandons the idea of teacher or text book setting forth a series of propositions somehow to be absorbed and some day to be applied. It calls upon the teacher to be a kind of learning engineer. The activity is in the learner. The teacher stimulates, guides, and enriches this active process. The learner is to feel a need, formulate the problem, seek answers, organize data, and test hypotheses. This is not merely the formula of the classroom. It is the mental activity which should continue throughout a lifetime of professional growth"--Preface. (PsycINFO Database Record (c) 2005 APA, all rights reserved).

Creating an exceptionally student-friendly textbook in psychology isn't just about making the chapters shorter and pages more colorful. It's about using that type of format to provide a clear portrait of psychological science, concise but not oversimplified, all while continually answering the recurring student question: "What does this have to do with me?" David Myers' brief introduction to psychology, Psychology in Everyday Life, certainly does offer brief, easily manageable chapters and a colorful, image-rich design (both shaped by extensive research, class testing, and instructor/student feedback). But what makes it such an exceptional text is what flows through those chapters—rich presentations of psychology's core concepts and field-defining research, examined in context of the everyday lives of all kinds of people around the world and communicated in the captivating storyteller's voice that is instantly recognizable as Myers'. The new edition of Psychology in Everyday Life offers an extraordinary amount of new research, effective new inquiry-based study tools, and further design innovations, all while maintaining its trademark brevity and clean layout. And it is accompanied by an innovative media/supplements of the same scope as all of David Myers' more comprehensive textbooks.

Sandra Hockenbury and new coauthor Susan Nolans remarkable textbook is grounded in the belief that all kinds of students can develop a real understanding of psychology and lasting scientific literacy. The authors act on that belief by using relatable personal stories to communicate the concepts of psychological science (and the process of science itself), and by presenting important research in a clear not oversimplified way. Hockenbury and Nolan also take full advantage of online learning, creating activities in LaunchPad that have students thinking about psychology as scientists do. New co-author, Susan Nolan of Seton Hall University was recently designated a Master Teacher by the Society for Teaching Psychology. She regularly gives talks about incorporating scientific

literacy into the introductory course and across the psychology curriculum.
