Khalik Allah is a New York-based photographer and filmmaker whose work has been described as

"street opera," simultaneously penetrative, hauntingly beautiful, and visceral. His photography has been acclaimed by the New York Times, TIME Light Box, the New Yorker, the Guardian, the Village Voice, the BBC, and the Boston Globe. Since 2012, Allah has been photographing people who frequent the corner of 125th Street and Lexington Avenue in Harlem. Shooting film at night with only the light pouring from storefront windows, street lights, cars, and flashing ambulances, he captures raw and intimate portraits of "souls against the concrete." This volume presents a gallery of 105 portraits created with a Nikon F2 35mm camera and a photography predicated on reality. Inviting viewers to look deeply into the faces of people living amid poverty, drug addiction, and police brutality, but also leading everyday lives, Allah seeks to dispel fears, capture human dignity, and bring clarity to a world that outsiders rarely visit. This nuanced portrayal of nocturnal urban life offers a powerful and rare glimpse into the enduring spirit of a slowly gentrifying Harlem street corner and the great legacies of black history that live there.

There is the raw edge of combat portrayed at the siege of St. Malo and in the bitterly fought Alsace campaign, and the disbelief and outrage Miller describes on witnessing the victims of Dachau. The war's horror is relieved by the spirit of post-liberation Paris, where she indulged in frivolous fashions and recorded memorable conversations with Picasso, Cocteau, Eluard, Aragon, and Colette. The book ends with Miller's on-the-scene report giving a sardonic description of Hitler's abandoned house in Munich and the looting and burning of his alpine fortress at Berchtesgaden, which marked a symbolic end to the war.

Queering Contemporary Asian American Art takes Asian American differences as its point of departure, and brings together artists and scholars to challenge normative assumptions, essentialisms, and methodologies within Asian American art and visual culture. Taken together, these nine original artist interviews, cutting-edge visual artworks, and seven critical essays explore contemporary currents and experiences within Asian American art, including the multiple axes of race and identity; queer bodies and forms; kinship and affect; and digital identities and performances. Using the verb and critical lens of *queering* to capture transgressive cultural, social, and political engagement and practice, the contributors to this volume explore the connection points in Asian American experience and cultural production of surveillance states, decolonization and diaspora, transnational adoption, and transgender bodies and forms, as well as heteronormative respectability, the military, and war. The interdisciplinary and theoretically informed frameworks in the volume engage readers to understand global and historical processes through contemporary Asian American artistic production.

Focusing on the first four images of the Other mobilized in Descartes' Meditations—namely, the blind, the mad, the dreamy, and the bad—Reading Descartes Otherwise casts light on what have heretofore been the phenomenological shadows of "Cartesian rationality." In doing so, it discovers dynamic signs of spectral alterity lodged both at the core and on the edges of modern Cartesian subjectivity. Calling for a Copernican reorientation of the very notion "Cartesianism," the book's series of close, creatively critical readings of Descartes' signature images brings the dramatic forces, moments, and scenes of the cogito into our own contemporary moment. The author patiently unravels the knotted skeins of ambiguity that have been spun within philosophical modernity out of such clichés as "Descartes, the abstract modern subject" and "Descartes, the father of modern philosophy"—a figure who is at once everywhere and nowhere. In the process, she revitalizes and reframes the legacy of Cartesian modernity, in a way more mindful of its proto-phenomenological traces.

This photographic Tokyo travel guide explores the dynamic Japanese culture, art and architecture that make Tokyo a world-class city. It has been said that "every city has its high points, but Tokyo is all exclamation points!" The largest and most populous city in the world, Tokyo must be experienced in person to be understood truly. The next best thing? Tokyo Megacity—a visual and descriptive exploration of a city that combines old with new and traditional with trendy, like no other city in the world. This extraordinary book explores Tokyo through 250 revealing photographs by well-known

photographer Ben Simmons and over 30 essays by famed author Donald Richie. Their love of the city, their sense of its history, and the deep respect and pure joy felt in being here, shine through on every page. Simmons and Richie show us how modern Tokyo evolved from a patchwork of villages that still exist today as distinct neighborhoods and districts to the modern, trendsetting metropolis renowned the world over—that combine to make Tokyo a unique and special place. Tokyo Megacity presents the districts of the city in the order that they originally developed, starting with the Imperial Palace, sliding down to the "Low City" along the Sumida River, soaring back up to the "Mid-City," and finally, climbing the hills to the newer districts of the "High City." The combination of Ben Simmons' photographs and Donald Richie's text capture, as never before, the tremendous diversity, vitality and sheer livability of the megacity that is Tokyo.

Antiblack racism avows reason is white while emotion, and thus supposedly unreason, is black. Challenging academic adherence to this notion, Lewis R. Gordon offers a portrait of Martinican-turned-Algerian revolutionary psychiatrist and philosopher Frantz Fanon as an exemplar of "living thought" against forms of reason marked by colonialism and racism. Working from his own translations of the original French texts, Gordon critically engages everything in Fanon from dialectics, ethics, existentialism, and humanism to philosophical anthropology, phenomenology, and political theory as well as psychiatry and psychoanalysis. Gordon takes into account scholars from across the Global South to address controversies around Fanon's writings on gender and sexuality as well as political violence and the social underclass. In doing so, he confronts the replication of a colonial and racist geography of reason, allowing theorists from the Global South to emerge as interlocutors alongside northern ones in a move that exemplifies what, Gordon argues, Fanon represented in his plea to establish newer and healthier human relationships beyond colonial paradigms.
