Brain On Fire: My Month of Madness
Wildside Press LLC

The author of Sweet and Low presents a historical profile of Samuel Zemurray that traces his rise from a penniless youth to one of the world's wealthiest and most powerful men, offering insight into his capitalist talents and the ways in which his life reflected the best and worst of American business dealings.

The Bock Saga Harper Collins

'My first serious blackout marked the line between sanity and insanity. Though I

would have moments of lucidity over the coming days and weeks, I would never again be the same person ...' Susannah Cahalan was a happy, clever, healthy twenty-four-year old. Then one day she woke up in hospital, with no memory of what had happened or how she had got there. Within weeks, she would be transformed into someone unrecognizable, descending into a state of acute psychosis, undergoing rages and convulsions, hallucinating that her father had murdered his wife; that she could control time with her mind. Everything she had taken for granted about her life, and who she was, was wiped out. Brain on Fire is Susannah's story of her terrifying descent into madness and the desperate hunt for a

diagnosis, as, after dozens of tests and scans, baffled doctors concluded she should be confined in a psychiatric ward. It is also the story of how one brilliant man, Syria-born Dr Najjar, finally proved - using a simple pen and paper - that Susannah's psychotic behaviour was caused by a rare autoimmune disease attacking her brain. His diagnosis of this little-known condition, thought to have been the real cause of devil-possession through history, saved her life, and possibly the lives of many others. Cahalan takes readers inside this newly-discovered disease through the progress of her own harrowing journey, piecing it together using memories, journals, hospital videos and records. Written with passionate honesty and

intelligence, *Brain on Fire* is a searingly personal yet universal book, which asks what happens when your identity is suddenly destroyed, and how you get it back. 'With eagle-eye precision and brutal honesty, Susannah Cahalan turns her journalistic gaze on herself as she bravely looks back on one of the most harrowing and unimaginable experiences one could ever face: the loss of mind, body and self. *Brain on Fire* is a mesmerizing story' -Mira Bartók, New York Times bestselling author of *The Memory Palace* Susannah Cahalan is a reporter on the New York Post, and the recipient of the 2010 Silurian Award of Excellence in Journalism for Feature Writing. Her writing has also appeared in the New York Times, and is frequently picked up by the Daily Mail, Gawker, Gothamist, AOL and Yahoo among other news aggregator sites.

Going beyond the message of *Lean In* and *The Confidence Code*, Gannett's Chief Content Officer contends that to achieve parity in the office, women don't have to change—men do—and in this inclusive and realistic handbook, offers solutions to help professionals solve gender gap issues and achieve parity at work. Companies with more women in senior leadership perform better by virtually every financial measure, and women employees help boost creativity and can temper risky behavior—such as the financial gambles behind the 2008 economic collapse. Yet in the United States, ninety-five percent of Fortune 500 chief executives are men, and women hold only seventeen percent of seats on corporate boards. More men are reaching across the gender divide, genuinely trying to reinvent the culture and transform the way we work together.

Despite these good intentions, fumbles, missteps, frustration, and misunderstanding continue to inflict real and lasting damage on women's careers. What can the Enron scandal teach us about the way men and women communicate professionally? How does brain circuitry help explain men's fear of women's emotions at work? Why did Kimberly Clark blindly have an all-male team of executives in charge of their Kotex tampon line? In *That's What She Said*, veteran media executive Joanne Lipman raises these intriguing questions and more to find workable solutions that individual managers, organizations, and policy makers can employ to make work more equitable and rewarding for all professionals. Filled with illuminating anecdotes, data from the most recent relevant studies, and stories from Lipman's own journey to the top of a male-dominated industry, *That's What She Said* is a book about success that persuasively shows why empowering women as true equals is an essential goal for us all—and offers a roadmap for getting there. As enlightening as *The Facebook Effect*, *Elon Musk*, and *Chaos Monkeys*—the compelling, behind-the-scenes story of the creation of one of the most essential applications ever devised, and the rag-tag team that built it and changed how we navigate the world *Never Lost Again* chronicles the evolution of mapping technology—the "overnight success twenty years in the making." Bill Kilday takes us behind the scenes of the tech's development, and introduces to the team that gave us not only Google Maps but Google Earth, and most recently, Pokémon GO. He takes us back to the beginning to Keyhole—a cash-strapped startup mapping company started by a small-town Texas boy named John Hanke, that nearly folded when the tech bubble burst. While a contract with the CIA kept them afloat, the company's big break came with the first invasion of Iraq; CNN used their technology to cover the war and made it famous. Then Google came on the scene, buying the company and relaunching the software as Google Maps and Google Earth. Eventually, Hanke's original company was spun back out of Google, and is now responsible for Pokémon GO

and the upcoming *Harry Potter: Wizards Unite*. Kilday, the marketing director for Keyhole and Google Maps, was there from the earliest days, and offers a personal look behind the scenes at the tech and the minds developing it. But this book isn't only a look back at the past; it is also a glimpse of what's to come. Kilday reveals how emerging map-based technologies including virtual reality and driverless cars are going to upend our lives once again. *Never Lost Again* shows us how our worldview changed dramatically as a result of vision, imagination, and implementation. It's a crazy story. And it all started with a really good map.

The Bock Saga is the story of mankind as passed down through the generations of the Bock family, whom, according to Ior Bock, was the keeper of an ancient oral tradition that sheds light on the time period from the beginning of prehistory -- also called "Paradiset" -- to the present time. It begins with the first two people dwelling on this earth and ends with the untimely and tragic death of Ior Bock in 2010. It covers a huge time span and an enormous number of events have taken place since then. The Bock Saga narrates this all in great detail. It is, in short, an enormous story...

From the Nobel Prize-winning Icelandic author, a magnificent, epic novel—"funny, clever, sardonic and brilliant" (Annie Proulx)—at last available to contemporary American readers. Set in the early twentieth century, *Independent People* recalls both Iceland's medieval epics and such classics as Sigrid Undset's *Kristin Lavransdatter*. If Bjartur of Summerhouses, the book's protagonist, is an ordinary sheep farmer, his flinty determination to achieve independence is genuinely heroic and, at the same time, terrifying and bleakly comic. Having spent eighteen years in humiliating servitude, Bjartur wants nothing more than to raise his flocks un beholden to any man. But Bjartur's spirited daughter wants to live un beholden to him. What ensues is a battle of wills that is by turns harsh and touching, elemental in its emotional intensity and intimate in its homely detail. Vast in scope and deeply rewarding, *Independent People* is a masterpiece.

The National Book Award winning history of how racist ideas were created, spread, and deeply rooted in American society. Some Americans insist that we're living in a post-racial society. But racist thought is not just alive and well in America -- it is more sophisticated and more insidious

than ever. And as award-winning historian Ibram X. Kendi argues, racist ideas have a long and lingering history, one in which nearly every great American thinker is complicit. In this deeply researched and fast-moving narrative, Kendi chronicles the entire story of anti-black racist ideas and their staggering power over the course of American history. He uses the life stories of five major American intellectuals to drive this history: Puritan minister Cotton Mather, Thomas Jefferson, abolitionist William Lloyd Garrison, W.E.B. Du Bois, and legendary activist Angela Davis. As Kendi shows, racist ideas did not arise from ignorance or hatred. They were created to justify and rationalize deeply entrenched discriminatory policies and the nation's racial inequities. In shedding light on this history, *Stamped from the Beginning* offers us the tools we need to expose racist thinking. In the process, he gives us reason to hope.

Culture Shock Simon and Schuster
The #1 New York Times bestseller from Walter Isaacson brings Leonardo da Vinci to life in this exciting new biography that is "a study in creativity: how to define it, how to achieve it...Most important, it is a

powerful story of an exhilarating mind and life" (The New Yorker). Based on thousands of pages from Leonardo da Vinci's astonishing notebooks and new discoveries about his life and work, Walter Isaacson "deftly reveals an intimate Leonardo" (San Francisco Chronicle) in a narrative that connects his art to his science. He shows how Leonardo's genius was based on skills we can improve in ourselves, such as passionate curiosity, careful observation, and an imagination so playful that it flirted with fantasy. He produced the two most famous paintings in history, *The Last Supper* and the *Mona Lisa*. With a passion that sometimes became obsessive, he pursued innovative studies of anatomy, fossils, birds, the heart, flying machines, botany, geology, and weaponry. He explored the math of optics, showed how light rays strike the cornea, and produced illusions of changing perspectives in *The Last Supper*. His ability to stand at the crossroads of the humanities and the sciences, made iconic by his drawing of *Vitruvian Man*, made him history's most creative genius. In the "luminous" (Daily Beast) *Leonardo da Vinci*, Isaacson describes how Leonardo's

delight at combining diverse passions remains the ultimate recipe for creativity. So, too, does his ease at being a bit of a misfit: illegitimate, gay, vegetarian, left-handed, easily distracted, and at times heretical. His life should remind us of the importance to be imaginative and, like talented rebels in any era, to think different. Here, da Vinci "comes to life in all his remarkable brilliance and oddity in Walter Isaacson's ambitious new biography...a vigorous, insightful portrait" (The Washington Post).

From Neil Gaiman, the best-selling novelist and creator of the world-renowned comics title *The Sandman*, comes a mesmerizing tale of the dangers and opportunities of youth, and its endless possibilities. Illustrated by four of comics' most accomplished artists, John Bolton, Scott Hampton, Charles Vess and Paul Johnson, *THE BOOKS OF MAGIC* collects all four issues of the original miniseries that introduced the character of Timothy Hunter and set the stage for his continuing adventures. Timothy Hunter could be the most powerful magician in the world, but

does he really want to be? Guided through the magical world starting at the beginning of time by a group of DC Universe magicians, often referred to as the Trenchcoat Brigade (John Constantine, Phantom Stranger, Mister E, and Doctor Occult), they attempt to aid Timothy in his decision whether or not to embrace his gift. However, by the time Timothy makes a choice, it may have already been made for him.

NATIONAL BESTSELLER • The gripping story of Elizabeth Holmes and Theranos—one of the biggest corporate frauds in history—a tale of ambition and hubris set amid the bold promises of Silicon Valley, rigorously reported by the prize-winning journalist. With a new Afterword covering her trial and sentencing, bringing the story to a close. “Chilling ... Reads like a thriller ... Carreyrou tells [the Theranos story] virtually to perfection.” —The New York Times Book Review In 2014, Theranos founder and CEO Elizabeth Holmes was widely seen as the next Steve Jobs: a brilliant Stanford dropout whose startup “unicorn” promised to revolutionize the

medical industry with its breakthrough device, which performed the whole range of laboratory tests from a single drop of blood. Backed by investors such as Larry Ellison and Tim Draper, Theranos sold shares in a fundraising round that valued the company at more than \$9 billion, putting Holmes’s worth at an estimated \$4.5 billion. There was just one problem: The technology didn’t work. Erroneous results put patients in danger, leading to misdiagnoses and unnecessary treatments. All the while, Holmes and her partner, Sunny Balwani, worked to silence anyone who voiced misgivings—from journalists to their own employees. *We Are Not Ourselves* HarperCollins Hendrik Petrus Berlage, the Dutch architect and architectural philosopher, created a series of buildings and a body of writings from 1886 to 1909 that were among the first efforts to probe the problems and possibilities of modernism. Although his Amsterdam Stock Exchange, with its rational mastery of materials and space, has long been celebrated for its seminal influence on the architecture of the 20th century, Berlage's writings are highlighted here. Bringing together

Berlage's most important texts, among them "Thoughts on Style in Architecture", "Architecture's Place in Modern Aesthetics", and "Art and Society", this volume presents a chapter in the history of European modernism. In his introduction, Iain Boyd Whyte demonstrates that the substantial contribution of Berlage's designs to modern architecture cannot be fully appreciated without an understanding of the aesthetic principles first laid out in his writings.

The Code Breaker Vertigo

There were no surprises in Gatlin County. We were pretty much the epicenter of the middle of nowhere. At least, that's what I thought. Turns out, I couldn't have been more wrong. There was a curse. There was

a girl. And in the end, there was a grave. Lena Duchannes is unlike anyone the small Southern town of Gatlin has ever seen, and she's struggling to conceal her power and a curse that has haunted her family for generations. But even within the overgrown gardens, murky swamps and crumbling graveyards of the forgotten South, a secret cannot stay hidden

forever. Ethan Wate, who has been counting the months until he can escape from Gatlin, is haunted by dreams of a beautiful girl he has never met. When Lena moves into the town's oldest and most infamous plantation, Ethan is inexplicably drawn to her and determined to uncover the connection between them. In a town with no surprises, one secret could change everything.
