Not illustrated. 1908 edition. Excerpt: ... THE LITERATURE OF CHECKERS. I Willlam Payne. An Introduction to the Game of Draughts. London, 1756. Last page number, 67.. Present value, \$15. This is the first work on the game of checkers printed in the English language. It contains fifty games, fourteen critical situations, and twenty-four stroke problems. The dedication notice and preface were written by Dr. Samuel Johnson, the lexicographer; but his name does not appear. This book has held the respect of all succeeding checker authors and compilers. A reprint, bearing the same date as the original issue, was published in (perhaps) 1795. In the original the name of the author on the title page is followed by the line, "Teacher of the Mathematics." In the reprint the word "the" is omitted from the line. In the fortysixth game of the original the word "drawn" does not appear at the end of the play. In the reprint it does appear. The tailpiece ornamenting page 59 of the original may be roughly described as a crown resting on a three-cornered table. The tailpiece to the same page of the reprint may also be roughly described as a bouquet supported by two birds. The reprint is worth \$10 a copy. 2 Hoyle's Games. The first edition of this perennial handbook, a treatise on the game of whist by Edmond Hoyle, was issued in 1742. The second and third editions were issued in the succeeding year, 1743. An article on chess appeared in the edition of 1761. In 1779 Hoyle's Games, revised and corrected by Charles Jones, opened its pages to the game of checkers for the first time, by reprinting a part of Payne's work, under headlines reading as follows: "By permission of Mr. Payne; an extract from

his game of draughts. Containing twenty select games, together with many critical situations for drawn...

Forgotten Books

Excerpt from Vocabulary of Checkers: A Dictionary of Words, Terms and Phrases Used in the Game Called Checkers, or English Draughts The words, terms, and phrases explained in these pages were obtained chiefly from the 227 separate works on the game of checkers that have been printed in English in the period of a little more than a century and a half, extending from 1756 to the present time. Each magazine, regardless of the number of volumes issued, is here counted as one work. The sources of information are thus more extensive than the mere mention of 227 works would indicate. Another storehouse, not included in any way in this count, is the great mass of printed matter on the game found in the checker columns of newspapers. An important additional supply department is the checker chatter of the players themselves. No term of interest that the writer could find, or get any one to find for him, has been omitted.

The guiding idea in accepting or rejecting a term was this: Does it refer to something a student of the pastime anywhere many have occasion to use or look up? Chess and Checkers: the Way to

Mastership: Large Print By Edward Lasker The present world war has given great impetus to the game of Chess. In the prison camps, in the field hospitals, in the training camps and even in the trenches Chess has become a favorite occupation in hours of leisure, not only because it offers a most fascinating pastime, but mainly because it serves beyond any doubt to develop what is now the most interesting study for every soldier—the grasp of the principles underlying military strategy and the ability to conceive and to carry out military operations on a large scale.

Frederick the Great, Napoleon and Moltke, the great scientists of war, had a decided liking for the game of Chess and owed to it many an inspiration which helped them in laying out their military plans. Indeed, no other game exists which offers such complete analogies to war. Two armies oppose each other on the Chess board, composed of different units which may well be compared with infantry, cavalry and artillery. The success of the operations on the board, which represents the battlefield, does not depend upon any element of chance, but solely upon the ingenuity and the skill of the players who are the commanders-in-chief of the forces.
