Reinforce your knowledge of radiographic positioning and anatomy, and produce quality radiographs! Corresponding to the chapters in Bontrager and Lampignano's Textbook of Radiographic Positioning and Related Anatomy, 8th Edition, this practical workbook offers a wide variety of exercises including situation-based questions, film critique questions, laboratory activities, and self-evaluation tests. A wide variety of exercises include questions on anatomy, positioning critique, and image evaluation, with answers at the end of the

workbook. Chapter competencies are formatted as a set of tasks that you should be able to perform after working through the material. Situational questions describe clinical scenarios, then ask you to apply your knowledge to real-life examples. Film critique questions prepare you to evaluate the quality of radiographs and ask what positioning corrections need to be made to improve the image. Laboratory exercises provide hands-on experience as you perform radiographs using phantoms, evaluate the images, and practice positioning. Self-tests at the ends of chapters help you assess your learning with multiple choice, labeling, short answer, and true/false

questions. Updated content matches the revisions to the textbook. Stronger focus on computed and digital radiography in questions includes images from the newest equipment. Expanded coverage of computed tomography reflects changes in practice. *The Annual American Catalogue ...* IET This valuable new addition to the Encyclopaedia of Sports Medicine series provides a comprehensive and logical look at the principles and mechanisms of endocrinology as related to sports and exercise. It looks at growth hormone factors involved in exercise and the endocrinology of sport competition. It

considers various factors and stresses on the body that may alter sporting performance.
