Enjoy the Ride! We all ride the Mood Elevator up and down every day. How well we do it impacts our relationships, our personal effectiveness, our career, and our experience of life. Most people take that ride for granted—but what if we knew the right buttons to push to move to the top? In this very practical guide, Larry Senn provides an operating manual to keep you out of the emotional basement. He shows how to interrupt negative thought patterns that keep you stuck on a lower floor—depressed, stressed, anxious, judgmental—and move higher by cultivating mental attitudes like curiosity and gratitude. Through Senn's decades of work as a consultant, the Mood Elevator has been enthusiastically embraced by hundreds of thousands of people around the world. By sharing his work with a wider audience, Senn hopes to help all of us live life at our best.

Math with Lego® and Brainers is a series of engaging, and fun math workbooks, that motivates students to gain confidence on all levels of math problem-solving; builds conceptual deeper understanding of math and geometry problems and creative and analytical thinking. Topics laid out in the national Common Core State Standards, enriched with step-by-step strategies implemented by Brainers, appeal to every student. The problems evolve and become more challenging through excitement, adventure, and Olympiad Math; sparking students' desire to learn, play, explore, and think. Real-life situations, together with algorithms, diagrams, and tables, help students smoothly and logically work their way to multi-step problems, fluency and strengthening in mental calculations skills, and test preparations. Brainers used in a comical way help students work independently, hold their interest, and present step-by-step solutions for any math problem or strategy. Where to start: An advanced or interested in math 2nd grader may start at Grades 2-3 if they are in 2nd grade. If math is a challenging subject, start at Grades 2-3 if they are in 3rd grade. MATH with LEGO and BRAINERS makes the foundations for students' success in MATH and Geometry: · Common Core State Standards · preparation for standardized tests such as SCAT®, CogAT®, and etc. · full math and geometry curriculum that covers each grade level in great depth · procedural fluency · modeling and building with Lego bricks · using and creating tables and diagrams for future programming skills · numerous number sense strategies · step-by-step strategies · I-

approach word problem strategies · information coding (color-, border-, line coding) · alive, engaging, and fun explanations with Brainers · a good training for teachers in how to explain math concepts · no lengthy teaching manuals for parents and teachers · favorite children's font · answers with step-by-step solutions.

The Mood Elevator Harvard University Press

Cheating Lessons is a guide to tackling academic dishonesty at its roots. James Lang analyzes the features of course design and classroom practice that create cheating opportunities, and empowers teachers to build more effective learning environments. Instructors who curb academic dishonesty become better educators in other ways as well.

Word Problems and Critical Thinking with LEGO and Brainers Grades 2-3A Ages 7-9 Stem Mindset, LLC

Impulse explores what people do despite knowing better, along with snap decisions that occasionally enrich their lives. This eye-opening account looks at two kinds of thinking--one slow and reflective, the other fast but prone to error--and shows how our mental tracks switch from the first to the second, leading to impulsive behavior.
