The stunning new 10+ story from the bestselling and award-winning author of TIME TRAVELLING WITH A HAMSTER, for anyone who loved the humour of WALL-E, the action of STAR WARS and the deeply touching emotion of ET. A small village in the wilds of Northumberland is rocked by the disappearance of twelve-year-old Tammy. Only her twin brother, Ethan, knows she is safe - and the extraordinary truth of where she is. It is a secret he must keep, or risk never seeing her again. But that doesn't mean he's going to give up. Together with his friend Iggy and the mysterious (and very hairy) Hellyann, Ethan teams up with a spaceship called Philip, and Suzy the trained chicken, for a nail-biting chase to get his sister back... that will take him further than anyone has ever been before. A remarkable story of sibling connection, friendship and interstellar adventure from the author Kiran Millwood Hargrave called "one of my favourite middle grade writers".

The subject of food security and land issues in Africa has become one of increased importance and contention over recent years. In particular, the focus has shifted to the role new global South donors - especially India, China and Brazil - are playing in shaping African agriculture through their increased involvement and investment in the continent. Approaching the topic through the framework of South-South co-operation, this highly original volume presents a critical analysis of the ways in which Chinese, Indian and Brazilian engagements in African agriculture are structured and implemented. Do these investments have the potential to create new opportunities to improve local living standards, transfer new technology and knowhow to African producers, and reverse the persistent productivity decline in African agriculture? Or will they simply aggravate the problem of food insecurity by accelerating the process of land alienation and displacement of local people from their land? Topical and comprehensive, *Agricultural Development and Food Security in Africa* offers fresh insight into a set of relationships that will shape both Africa and the world over the coming decades.

Who can resist a good story, especially when it's being told by Grandma? From her bag emerges tales of kings and cheats, monkeys and mice, bears and gods. Here comes the bear who ate some really bad dessert and got very angry; a lazy man who would not put out a fire till it reached his beard; a princess who got turned into an onion; a queen who discovered silk, and many more weird and wonderful people and animals. Grandma tells the stories over long summer days and nights, as seven children enjoy life in her little town. The stories entertain, educate and provide hours of enjoyment to them. So come, why don't you too join in the fun.

Advertisers may want us to believe that our food is produced on picturesque farms, but the cold reality is that the plants and animals we consume may be the result of genetic engineering in the laboratories of multinational corporations. Biotechnology brings with it implications for human and animal health, the threat of environmental damage, a possible redefining of our global food system and a Pandora's box of ethical questions. But the consuming public remains virtually unaware of the genetic alterations of their food and what that may hold in store. Thoroughly researched and accessibly written, "Unnatural Harvest" holds nothing back in telling us how the food we now serve ourselves and our children may be altered and why we should be very concerned.
