Toy of the Year, Toy of the Century, Greatest Toy of All Time . . . there aren't many titles that haven't been bestowed on LEGO toys, and it's not hard to see why. From its inception in the early 1930s right up until today, the LEGO Group's history is as colorful as the toys it makes. Few other playthings share the LEGO brand's creative spirit, educative benefits, resilience, quality, and universal appeal. The LEGO name is now synonymous with playtime, but it wasn't always so. This history charts the birth of the LEGO Group in the workshop of a Danish carpenter and its steady growth as a small, family-run toy manufacturer to its current position as a market-leading, award-winning brand. The company's ever-increasing catalog of products—including the earliest wooden toys, plastic bricks, play themes, and other building systems such as DUPLO, Technic, and MINDSTORMS—are

chronicled in detail, alongside the manufacturing process, LEGOLAND parks, licensed toys, and computer games. Learn all about how LEGO pulled itself out of an economic crisis and embraced technology to make building blocks relevant to twenty-first-century children and discover the vibrant fan community of kids and adults whose conventions, websites, and artwork keep the LEGO spirit alive. As nostalgic as it is contemporary, *A Million Little Bricks* will have you reminiscing about old Classic Space sets, rummaging through the attic for forgotten Minifigure friends, and playing with whatever LEGO bricks you can get your hands on (even if it means sharing with your kids).

Sensory analysis is an important tool in new product development. There has

recently been significant development in the methods used to capture sensory perception of a product. Rapid Sensory Profiling Techniques provides a comprehensive review of rapid methods for sensory analysis that can be used as alternatives or complementary to conventional descriptive methods. Part one looks at the evolution of sensory perception capture methods. Part two focuses on rapid methods used to capture sensory perception, and part three covers their applications in new product development and consumer research. Finally, part four explores the applications of rapid methods in testing specific populations.

How does one address homophobia without threatening majority rule democracy and freedoms of speech and faith? How does one "Africanize" sexuality research, empirically and theoretically, in an environment that is not necessarily welcoming to African scholars? In *Sexual Diversity in Africa*, contributors critically engage with current debates about sexuality and gender identity, as well as with contentious issues relating to methodology, epistemology, ethics, and pedagogy. They present a tapestry of issues that testify to the complex nature of sexuality, sexual practices, and gender performance in Africa. Essays examine topics such as the well-established same-sex networks in Accra and Bamako, African "traditions" defined by European observers, and the bizarre mix of faith, pharmaceuticals, and pseudo-science used to "cure" homosexual men. Their evidence also demonstrates the indefensibility of over-simplified constructions of

homosexuality versus heterosexuality, modern versus traditional, Africa versus the West, and progress from the African closet towards Western models of out politics, all of which have tainted research on same-sex practices and scientific studies of HIV/AIDS. Asserting that the study of sexuality is intellectually and politically sustainable in Africa, *Sexual Diversity in Africa* contributes to the theorization of sexualities by presenting a more sensitive and knowledgeable study of African experiences and perspectives. Contributors include Olajide Akanji, Christophe Broqua, Cheryl Cooky, Serena Owusua Dankwa, Shari L. Dworkin, Marc Epprecht, Melissa Hackman, Notisha Massaquoi, Crystal Munthree, Kathleen O'Mara, Stella Nyanzi, S.N.Nyeck, Vasu Reddy, Amanda Lock Swarr, and Lisa Wiebesiek.

In *Disturbing Pleasures* Henry Giroux demonstrates how his well-known theories of education, critical pedagogy and popular culture can be put to use in the classroom and in other cultural settings. Adding an entirely new dimension to his thinking about the cultural sites at which pedagogical practice takes place, Giroux illustrates how professors, school teachers and other cultural workers can appropriate what he refers to as a "pedagogy of cultural studies."

"What I fear most, I think, is the death of

the imagination. . . . If I sit still and don't do anything, the world goes on beating like a slack drum, without meaning. We must be moving, working, making dreams to run toward; The poverty of life without dreams is too horrible to imagine." — Sylvia Plath, "Cambridge Notes" (From Notebooks, February 1956)

Renowned for her poetry, Sylvia Plath was also a brilliant writer of prose. This collection of short stories, essays, and diary excerpts highlights her fierce concentration on craft, the vitality of her intelligence, and the yearnings of her imagination. Featuring an introduction by Plath's husband, the late British poet Ted Hughes, these writings also reflect themes and images she would fully realize in her poetry. *Johnny Panic and the Bible of Dreams* truly showcases the talent and genius of Sylvia Plath.

Is there a Buddhist discourse on sex? In this innovative study, Bernard Faure reveals Buddhism's paradoxical attitudes toward sexuality. His remarkably broad range covers the entire geography of this religion, and its long evolution from

the time of its founder, Xvkyamuni, to the premodern age. The author's anthropological approach uncovers the inherent discrepancies between the normative teachings of Buddhism and what its followers practice. Framing his discussion on some of the most prominent Western thinkers of sexuality--Georges Bataille and Michel Foucault--Faure draws from different reservoirs of writings, such as the orthodox and heterodox "doctrines" of Buddhism, and its monastic codes. Virtually untapped mythological as well as legal sources are also used. The dialectics inherent in Mahvyvna Buddhism, in particular in the Tantric and Chan/Zen traditions, seemed to allow for greater laxity and even encouraged breaking of taboos. Faure also offers a history of Buddhist monastic life, which has been buffeted by anticlerical attitudes, and by attempts to regulate sexual behavior from both within and beyond the monastery. In two chapters devoted to Buddhist homosexuality, he examines the way in which this sexual behavior was simultaneously condemned and idealized in medieval Japan. This book will appeal especially to those interested in the cultural history of Buddhism and in premodern Japanese culture. But the story of how one of the world's oldest religions has faced one of life's greatest problems makes fascinating reading for all.

In *Introduction to a Phenomenology of Life*, renowned French philosopher Renaud Barbaras aims to construct the basis for a phenomenology of life. Called an introduction because it has to deal with philosophical limits and presuppositions, it is much more, as Barbaras investigates life in its phenomenological senses, approached through the duality of its intransitive and transitive senses. Originally published in French (*Introduction à une phénoménologie de la vie*) *Introduction to a Phenomenology of Life* first defines the problem of life phenomenologically, then studies the failures of the phenomenological movement to adequately think about life, and finally elaborates a new, original, and productive approach to the problem. Combining original interpretations and expert readings of philosophers such as Heidegger, Henry, Bergson, and Merleau-Ponty, Barbaras offers a powerful and important contribution to phenomenology and continental thought.

"This is the first paperback edition of the only English-language translation of the Haitian scholar Antenor Firmin's *The Equality of the Human Races*, a foundational text in critical anthropology first published in 1885 when anthropology was just emerging as a specialized field of study. Marginalized for its "radical" position that the human races were equal, Firmin's lucid and persuasive treatise was decades ahead of its time. Arguing that the equality of the races could be demonstrated through a positivist scientific approach, Firmin challenged racist writings and the dominant views of the day. Translated by Asselin Charles and framed by Carolyn Fluehr-Lobban's substantial introduction, this rediscovered text is an important contribution to contemporary scholarship in anthropology, pan-African studies, and colonial and postcolonial studies."

Michel Foucault remains the essential philosopher of the modern world Three decades after his death, Michel Foucault remains one of the towering intellectual figures of the last half-century. His works on sexuality, madness, the prison, and medicine are enduring classics. From 1971 until his death in 1984, Foucault gave public lectures at the famous Collège de France. These seminal events, attended by thousands, created the benchmarks for contemporary social

enquiry. The lectures comprising *Abnormal* begin by examining the role of psychiatry in modern criminal justice, and its method of categorising individuals who “resemble their crime before they commit it.” Building on the themes of societal self-defence developed in earlier works, Foucault shows how defining “normality” became a prerogative of power in the nineteenth century, shaping the institutions—from the prisons to the family—meant to deal with “monstrosity,” whether sexual, physical, or spiritual. The *Collège de France* lectures add immeasurably to our appreciation and understanding of Foucault’s thought.

The poems of the Epic Cycle are assumed to be the reworking of myths and narratives which had their roots in an oral tradition predating that of many of the myths and narratives which took their present form in the *Iliad* and the *Odyssey*. The remains of these texts allow us to investigate diachronic aspects of epic diction as well as the extent of variation within it on the part of individual authors - two of the most important questions in modern research on archaic epic. They also help to illuminate the early history of Greek mythology. Access to the poems, however, has been thwarted by their current fragmentary state. This volume provides the scholarly community and graduate students with a thorough critical foundation for reading and interpreting them.

Autonome Systeme sind ein Trendthema. Durch zunehmende Vernetzung, Sensorik und

Maschinenlernen wird ihre Entwicklung stetig vorangetrieben. Länder wie die USA, Korea, Japan, China, aber auch Deutschland nehmen dabei eine Vorreiterrolle ein. Der internationalen Technikentwicklung steht die nationale Konzeption und Entwicklung des Rechts gegenüber. Spannungen zwischen den beiden Disziplinen lassen sich – insbesondere bei der Geschwindigkeit der technischen Entwicklung – kaum vermeiden. Die hier vorgelegten Untersuchungen behandeln grundlegende Fragen des rechtlichen Umgangs mit den neuen technischen Entwicklungen, aber auch Spezialfälle wie Autonome Fahrzeuge oder Drohnen. A COMPANION TO THE ARCHAEOLOGY OF THE ANCIENT NEAR EAST A Companion to the Archaeology of the Ancient Near East is a comprehensive and authoritative overview of ancient material culture from the late Pleistocene to Late Antiquity. This expansive two-volume work includes 58 new essays from an international community of ancient Near East scholars. With coverage extending from Asia Minor, the eastern Mediterranean, and Egypt to the Caucasus, Central Asia, and the Indo-Iranian borderlands, the book highlights the enormous variation in cultural developments across roughly 11,000 years of human endeavor. In

addition to chapters devoted to specific regions and particular periods, many contributors concentrate on individual industries and major themes in ancient Near Eastern archaeology, ranging from metallurgy and agriculture to irrigation and fishing. Controversial issues, including the nature and significance of the antiquities market, ethical considerations in archaeological praxis, the history of the foundation of departments of antiquities, and ancient attitudes towards the past, make this a unique collection of studies that will be of interest to scholars, students, and interested readers alike.

In the religious systems of ancient Mesopotamia, Egypt, and the Mediterranean, gods and demigods were neither abstract nor distant, but communicated with mankind through signs and active intervention. Men and women were thus eager to interpret, appeal to, and even control the gods and their agents. In *Prayer, Magic, and the Stars in the Ancient and Late Antique World*, a distinguished array of scholars explores the many ways in which people in the ancient world sought to gain access to--or, in some cases, to bind or escape from--the divine powers of heaven and earth. Grounded in a variety of disciplines, including Assyriology, Classics, and early Islamic history, the fifteen essays in this volume cover a broad geographic area: Greece, Egypt, Syria-Palestine, Mesopotamia, and Persia. Topics include celestial divination in early Mesopotamia, the civic festivals of classical Athens, and Christian magical papyri from Coptic Egypt. Moving forward to Late Antiquity, we see

how Judaism, Christianity, and Islam each incorporated many aspects of ancient Near Eastern and Graeco-Roman religion into their own prayers, rituals, and conceptions. Even if they no longer conceived of the sun, moon, and the stars as eternal or divine, Christians, Jews, and Muslims often continued to study the movements of the heavens as a map on which divine power could be read. The reader already familiar with studies of ancient religion will find in *Prayer, Magic, and the Stars* both old friends and new faces. Contributors include Gideon Bohak, Nicola Denzey, Jacco Dieleman, Radcliffe Edmonds, Marvin Meyer, Michael G. Morony, Ian Moyer, Francesca Rochberg, Jonathan Z. Smith, Mark S. Smith, Peter Struck, Michael Swartz, and Kasia Szpakowska. Published as part of Penn State's *Magic in History* series, *Prayer, Magic, and the Stars* appears at a time of renewed interest in divination and occult practices in the ancient world. It will interest a wide audience in the field of comparative religion as well as students of the ancient world and late antiquity.

Ours is essentially a tragic age, so we refuse to take it tragically. The cataclysm has happened, we are among the ruins, we start to build up new little habitats, to have new little hopes. It is rather hard work: there is now no smooth road into the future: but we go round, or scramble over the obstacles. We've got to live, no matter how many skies have fallen. This was more or less Constance Chatterley's position. The war had brought the roof down over her head. And she had realized that one must live and learn.
