The continous worldwide demand for this standard atlas prompted the authors to assemble an updated and enlarged second edition. Recent developments and insights are described in a new chapter on "Advanced Dermatoscopic Diagnosis." It covers new aspects, predominantly on pathological changes of the facial skin, such as in melanoma. Approximately 70 illustrations have been included keeping the didactical concept of combining macro- and microscopical images in one figure plate.

This book is supposed to be a warm thanks to all those who have supported the Austrian Ethnomedical Society (Osterreichische Ethnomedizinische Gesellschaft) in the last three decades and who have turned it into what it is today. The 29 authors of this volume have been connected to the Society and the Unit Ethnomedicine and International Health , Medical University of Vienna, in various ways. Apart from the guest professors John Janzen, Wolfgang Jilek, Ma Kanwen, Margaret Lock, Richard Ralston, Sjaak van der Geest and Zohara Yaniv, many other medical anthropologists have contributed to this volume. After giving an introduction to the history of the Austrian Ethnomedical Society and other ethnomedical institutions, a selection of theories and research topics in current medical anthropology and ethnopharmacology is presented. This book is also dedicated to Els van Dongen and Nina Etkin, two medical anthropologists of international format and guest lecturers at the Unit, who recently passed away.

This book has emerged as a consequence of the difficulties we experienced in finding information when we first started researching. The goal was to produce a book where as many existing studies as possible could be presented in a single volume, making it easy for the reader to compare methods, results and conclusions. As a result, studies from countries such as Thailand, Spain, Sweden, Lithuania, Czech, Mexico, etc. have been brought together as individual chapters, and references to studies from other countries have been included in the overview chapters where possible. We believe that this opportunity to compare results from different countries will open a new perspective on the subject, allowing the typical characteristics of Organic Agriculture and Organic Food to be seen more clearly. Finally, we would like to thank the contributing authors and the staff at InTech for their efforts and cooperation during the course of publication. I sincerely hope that this book will help researchers and students all over the world to reach new results in the field of Organic Agriculture and Organic Food.

First published in 1964, Ruth Harrison's book Animal Machines had a profound and lasting impact on world agriculture, public opinion and the quality of life of millions of farmed animals. Concerned with welfare standards at a time when animal production was increasing in scale and mechanization, Ruth Harrison set about investigating the situation in a fair and even-handed way. Reporting her findings in this book, Harrison alerted the public to the undeniable suffering of calves living in veal crates and birds in battery cages. Written at the beginning of the intensive farming movement, which promised progress but in reality worsened conditions for domesticated animals, Animal Machines provides a fascinating insight into the system we are living with today and must

continue with as the global population increases. Harrison's work brought about legal reforms, a greater understanding of farm conditions for animals and increased public awareness. Animal Machines is reprinted here in its entirety, accompanied by new chapters by world-renowned experts in animal welfare discussing the legacy and impact of Animal Machines 50 years on.

“One of the greatest writers of the twentieth century . . . Simenon was unequalled at making us look inside, though the ability was masked by his brilliance at absorbing us obsessively in his stories.” —The Guardian In this Georges Simenon classic, a Dutch clerk flees to Paris with his crooked boss's money and meets the woman behind the man “A certain furtive, almost shameful emotion . . . disturbed him whenever he saw a train go by, a night train especially, its blinds drawn down on the mystery of its passengers.” Kees Poppinga is a respectable Dutch citizen and family man—until the day he discovers his boss has bankrupted the shipping firm he works for, and something snaps. Kees used to watch the trains go by on their way to exciting destinations. Now, on some dark impulse, he boards one at random, and begins a new life of recklessness and violence. The Man Who Watched the Trains Go By is a chilling portrayal of a man who breaks from society and goes on the run asks who we are, and what we are capable of.

This book communicates the latest findings in pediatric orthopedics and answers key everyday questions in the field in an informative, readily understandable manner. The scope is comprehensive, encompassing all aspects of diagnosis and therapy. After an opening section on basic principles, the two main sections discuss diseases and injuries by site and cover systemic conditions including trauma, infections, juvenile rheumatoid arthritis, tumors and hereditary diseases. The book is the translation of the latest edition of the well-known classic Kinderorthopädie in der Praxis, which presents the collected knowledge of experts from Basel University Children's Hospital - Fritz Hefti and his co-workers Reinald Brunner, Carol Claudius Hasler, and Gernot Jundt. This edition has been revised and updated in a variety of ways. New findings are incorporated into all chapters, important advances in treatment are presented and the latest concepts in tumor diagnosis and neuro-orthopedics are discussed. The book contains more than 150 additional illustrations, including new clinical images and radiographs and many further amusing cartoons by Franz Freuler. The aim is to make children's orthopedics fun - in both practice and theory! The book has received several awards.

The classic edition is back! First published in 1988, Weiss's Herbal Medicine is revered by herbalists and medical professionals alike as the seminal work in the field of phytotherapy. This book has established itself as an indispensable resource and is widely acknowledged as the key text in the field of medical herbalism. You will find clear, detailed information on treating conditions ranging from colds and influenza to rheumatic problems, metabolic and endocrine disorders, cancer, and much more. Conveniently arranged by organ system, the text provides guidelines for prescribing herbal remedies, with sections on dosage, application, and precautionary measures. Plus, for each plant discussed, you will find lists of their occurrence, botanical features, differentiation from related species, constituents, and medical benefits. Proprietary formulations, full references, and a comprehensive subject index of almost 2,000 entries round out the superb coverage! Weiss's life's work examines the subject of herbal medicine from both a clinical and practical viewpoint, incorporating his personal observations and clinical experience with scientific studies. This material formed the basis of Herbal Medicine, 2E, also by Thieme. The second edition, revised, expanded and modernized by Volker Fintelmann, streamlines the work into a more clinical text, incorporating the latest scientific research and Commission E findings on the efficacy of herbs. This edition is recommended for allopathic physicians and other medical professionals who

are new to the field of herbal medicine. Professor Rudolf Fritz Weiss (1895-1991) is highly regarded as the founding father of modern German phytotherapy. He studied botany and medicine at the University of Berlin, qualifying as a doctor in 1922 and subsequently taking additional qualifications in internal medicine. A teaching post in herbal medicine was interrupted by war service as an army doctor, followed by seven years in Russian captivity as a doctor in prisoner-of-war camp hospitals. After retiring from clinical practice in 1961, he devoted his life to the scientific development and acceptance of herbal medicine. Weiss was appointed as a member of the

German Commission E in 1978. He was founder and editor of the Zeitschrift fuer Phytotherapie, and lectured on current advances in the subject at the University of Tuebingen.
